

H13-811_V3.5認證題庫 & H13-811_V3.5權威考題

2026 NewDumps最新的H13-811_V3.5 PDF版考試題庫和H13-811_V3.5考試問題和答案免費分享：https://drive.google.com/open?id=1ev6c7JvsoLxvZM5_SoJ2bfFs5WemgZCy

如果你使用了我們的Huawei的H13-811_V3.5學習資料資源，一定會減少考試的時間成本和經濟成本，有助於你順利通過考試，在你決定購買我們Huawei的H13-811_V3.5之前，你可以下載我們的部門免費試題，其中有PDF版本和軟體版本，如果需要軟體版本請及時與我們客服人員索取。

Huawei H13-811_V3.5 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Database, Security, and Other Services	10%	- Database and Security Services 1. Content Delivery Network 2. Relational Database Service 3. Cloud security basics
Topic 2: Huawei Cloud O&M Basics	15%	- Operations and Maintenance 1. Billing and resource management 2. Cloud operations management 3. Cloud monitoring
Topic 3: Compute Cloud Services	20%	- Elastic Compute Services 1. Auto Scaling 2. Elastic Cloud Server 3. Image Management Service
Topic 4: Network Cloud Services	20%	- Cloud Networking 1. Elastic Load Balance 2. Virtual Private Cloud 3. Domain Name Service

Topic 5: Storage Cloud Services	20%	- Cloud Storage Solutions 1. Elastic Volume Service 2. Object Storage Service 3. Backup and Disaster Recovery
Topic 6: Cloud Basics	15%	- Cloud Computing Fundamentals 1. Virtualization technologies 2. Cloud computing concepts 3. Cloud service models

已驗證的Huawei H13-811_V3.5: HCIA-Cloud Service V3.5認證題庫 - 專業的NewDumps H13-811_V3.5權威考題

使用NewDumps Huawei的H13-811_V3.5考試認證培訓資料, 想過Huawei的H13-811_V3.5考試認證是很容易的, 我們網站設計的培訓工具能幫助你第一次嘗試通過測試, 你只需要下載NewDumps Huawei的H13-811_V3.5考試認證培訓資料也就是試題及答案, 很輕鬆很容易, 包你通過考試認證, 如果你還在猶豫, 試一下我們的使用版本就知道效果了, 不要猶豫, 趕緊加入購物車, 錯過了你將要遺憾一輩子的。

最新的 HCIA-Cloud Service H13-811_V3.5 免費考試真題 (Q46-Q51):

問題 #46

Which of the following statements is incorrect about Scalable File Service (SFS) Capacity-Oriented and SFS Turbo file systems?

- A. SFS Capacity-Oriented file systems have higher latency than SFS Turbo file systems.
- B. SFS Capacity-Oriented file systems provide more bandwidth than SFS Turbo Standard file systems.
- C. For the same unit price, an SFS Capacity-Oriented file system has greater capacity than an SFS Turbo file system.
- D. For the same amount of capacity, an SFS Capacity-Oriented file system is more expensive than an SFS Turbo file system.

答案: D

解題說明:

Option D is incorrect. The HCIA-Cloud Service V3.5 comparison positions SFS Capacity-Oriented as the large-capacity, high-bandwidth, cost-sensitive file-storage option. Huawei describes its principal advantages as large capacity, high bandwidth, and low cost, making it particularly appropriate for media processing, large-scale file sharing, HPC, and backup workloads.

The performance characteristics also support A and B. Huawei's documented SFS Capacity-Oriented implementation provides substantially greater maximum aggregate bandwidth than the previous-generation SFS Turbo Standard class. However, its access latency is approximately 3-20 ms, whereas SFS Turbo Standard provides lower latency, historically around 2-5 ms. SFS Turbo is therefore more appropriate where low-latency access and workloads involving large numbers of small files are important.

Capacity-Oriented storage can scale to petabyte-scale capacities and is specifically optimized economically for large-volume storage. Consequently, for equivalent expenditure, it can provide significantly greater capacity than performance-oriented SFS Turbo configurations.

Option D reverses this economic relationship. SFS Capacity-Oriented is not positioned as the more expensive alternative for equal capacity; low cost at large scale is one of its defining characteristics.

Reference topics: SFS File System Types; SFS Capacity-Oriented; SFS Turbo Standard; File Storage Performance and Cost.

問題 #47

Which of the following cloud services supports dynamic adjustment of the number of cloud hosts through policies?

- A. IMS
- B. AS
- C. SG
- D. VPN

答案： B

問題 #48

The multi-version control function of object storage OBS is enabled for the entire bucket. The multi- version control function cannot be enabled for a folder or file in the bucket.

- A. False
- B. True

答案： B

問題 #49

Which of the following is not one of the main functions of Web Application Firewall (WAF)?

- A. Brute force attack protection for elastic cloud servers
- B. Website Anti-Crawler
- C. Web page tamper-proofing
- D. Prevent sensitive information leakage

答案： A

問題 #50

Which of the following statements is incorrect about RDS for PostgreSQL?

- A. Up to 15 read replicas can be created for an RDS for PostgreSQL primary instance, with a scalability ratio of 0.9.
- B. RDS for PostgreSQL is suitable for websites, location-based applications, and complex data object processing.
- C. RDS for PostgreSQL provides multiple security policies to protect database and user privacy.
- D. Key performance metrics of RDS for PostgreSQL DB instances and DB engines can be monitored.

答案： A

解題說明：

Option D is incorrect. Huawei Cloud's official RDS for PostgreSQL constraints specify that a maximum of five read replicas can be created for one DB instance, not 15. Huawei's current read-replica documentation reiterates the same five-replica limit. The "15 read replicas" characteristic is associated with other Huawei database architectures, such as TaurusDB/GaussDB-related scaling designs, and must not be transferred to standard RDS for PostgreSQL.

Option C is directly supported by Huawei documentation. RDS for PostgreSQL is an object-relational database designed for complex OLTP and supports NoSQL and GIS data types. Huawei explicitly identifies websites, location-based applications, and complex data object processing as representative workloads.

Option B is also valid. Huawei Cloud provides real-time status and performance monitoring for RDS instances, exposing database-related metrics and allowing alarms to be configured for operational monitoring.

Option A reflects the managed-service security architecture: RDS provides controls involving network isolation, security groups, SSL, account authorization, backups, and other mechanisms to protect databases and user data.

The numerical scaling claim in D therefore makes it decisively incorrect.

Reference topics: RDS for PostgreSQL; Read Replicas; Database Monitoring; PostgreSQL Application Scenarios; RDS Security.

問題 #51
