

Prominent Features of Palo Alto Networks NetSec-Pro Exam Practice Test Questions

PDF

Section	Weight	Objectives
		<ul style="list-style-type: none"> Maintain and configure Strata Cloud Manager (SCM) and Panorama in network security environments <ul style="list-style-type: none"> Supported products New device addition Reporting Configuration management
Connectivity and Security	14%	<ul style="list-style-type: none"> Maintain and configure network security of on-premises, cloud, and hybrid networks <ul style="list-style-type: none"> Network segmentation Policies (security and network) Monitoring and logging Certificates Maintain connectivity and security of remote users <ul style="list-style-type: none"> Remote access solutions Network segmentation Security policy tuning Monitoring and logging Certificates

What type of questions are on the Palo Alto NetSec-Pro exams?

- Single answer multiple choice
- Multiple answer multiple choice
- Drag and Drop (DND)
- Router Simulation
- Testlet

NetSec-Pro Practice Exam Questions.

Grab an understanding from these Palo Alto NetSec-Pro sample questions and answers and improve your NetSec-Pro exam preparation towards attaining a Palo Alto Network Security Professional Certification. Answering these sample questions will make you familiar with the types of questions you can expect on the actual exam. Doing practice with NetSec-Pro questions and answers before the exam as much as possible is the key to passing the Palo Alto NetSec-Pro certification exam.

The social environment is constantly changing, and our NetSec-Pro guide quiz is also advancing with the times. We have all kinds of experiences on the NetSec-Pro study braindumps for many years, so we know that the content of the exam is related to real-time information. The content of NetSec-Pro Exam Materials is constantly updated. Our professional experts have been specializing in this career for over ten years. And we can always provide with you the most accurate and valid NetSec-Pro learning guide.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

Topic 2	<ul style="list-style-type: none"> Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
Topic 3	<ul style="list-style-type: none"> GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 4	<ul style="list-style-type: none"> Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

>> Brain NetSec-Pro Exam <<

100% Pass Palo Alto Networks NetSec-Pro - Palo Alto Networks Network Security Professional Marvelous Brain Exam

One of the advantages of the NetSec-Pro training test is that we are able to provide users with free pre-sale experience, the NetSec-Pro study materials pages provide sample questions module, is mainly to let customers know our part of the subject, before buying it, users further use our NetSec-Pro Exam Prep. At the same time, it is more convenient that the sample users we provide can be downloaded PDF demo for free, so the pre-sale experience is unique. So that you will know how efficiency our NetSec-Pro learning materials are and determine to choose without any doubt.

Palo Alto Networks Network Security Professional Sample Questions (Q30-Q35):

NEW QUESTION # 30

A cloud security architect is designing a certificate management strategy for Strata Cloud Manager (SCM) across hybrid environments. Which practice ensures optimal security with low management overhead?

- A. Use cloud provider default certificates with scheduled synchronization and localized renewal processes.
- B. Implement separate certificate authorities with independent validation rules for each cloud environment.
- C. Configure manual certificate deployment with quarterly reviews and environment-specific security protocols.
- D. Deploy centralized certificate automation with standardized protocols and continuous monitoring.

Answer: D

Explanation:

A centralized certificate automation approach reduces management overhead and security risks by standardizing processes, automating renewals, and continuously monitoring the certificate lifecycle.

Implementing a centralized certificate management approach with automation and continuous monitoring ensures optimal security while reducing operational complexity in hybrid environments.

NEW QUESTION # 31

A network administrator obtains Palo Alto Networks Advanced Threat Prevention and Advanced DNS Security subscriptions for edge NGFWs and is setting up security profiles. Which step should be included in the initial configuration of the Advanced DNS Security service?

- A. Create overrides for all company owned FQDNs.
- B. Create a decryption policy rule to decrypt DNS-over-TLS / port 853 traffic.
- **C. Configure DNS Security signature policy settings to sinkhole malicious DNS queries.**
- D. Enable Advanced Threat Prevention with default settings and only focus on high-risk traffic.

Answer: C

Explanation:

Advanced DNS Security uses a signature policy to sinkhole malicious DNS queries and prevent them from resolving. The DNS Security service integrates with Anti-Spyware profiles, and you must configure signature policy settings to sinkhole malicious queries. This proactively stops traffic to known malicious domains.

Sinkholing ensures that DNS queries to malicious FQDNs are redirected to a safe IP, preventing compromise.

NEW QUESTION # 32

Which NGFW function can be used to enhance visibility, protect, block, and log the use of Post- quantum Cryptography (PQC)?

- **A. Decryption policy**
- B. Decryption profile
- C. Security policy
- D. DNS Security profile

Answer: A

Explanation:

A decryption policy allows the firewall to inspect encrypted traffic and apply security controls to Post- quantum Cryptography (PQC) usage, as PQC algorithms are typically implemented within encrypted sessions.

Decryption policies enable the firewall to see and control encrypted traffic. This visibility and control extend to new cryptographic algorithms, including PQC, to ensure that security measures are applied consistently.

By decrypting sessions, you ensure that even PQC traffic can be inspected, logged, and subject to security profiles for visibility and policy enforcement.

NEW QUESTION # 33

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Add a Dynamic Application Group to the Security policy.
- **B. Create a Security policy for the negated region with destination address "any".**
- C. Set the service to be application-default.
- D. Add all regions that contain private IP addresses to the source address.

Answer: B

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

"When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops." (Source: Prisma Access Policy Best Practices) This ensures explicit inclusivity for the excluded region, maintaining reliable connectivity.

NEW QUESTION # 34

In a Prisma SD-WAN environment experiencing voice quality degradation, which initial action is recommended?

- A. Switch all VoIP traffic to backup paths.
- B. Request an RMA of the ION devices.

- C. Immediately modify path quality thresholds.
- D. Review real-time analytics of path performance.

Answer: D

Explanation:

Voice quality issues in SD-WAN deployments are typically linked to path performance metrics (latency, jitter, packet loss). Reviewing real-time analytics helps pinpoint root causes and appropriate mitigation.

"When experiencing performance issues, the first step is to analyze real-time performance data. Prisma SD-WAN provides path quality analytics to identify degradation and ensure informed troubleshooting." (Source: Prisma SD-WAN Monitoring) This data-driven approach avoids unnecessary configuration changes.

NEW QUESTION # 35

.....

If the clients have any problems on our NetSec-Pro training guide they could contact our online customer service personnel or contact us by the mails. We will reply their questions sincerely and help them solve their problems at any time since we offer service on 24/7 time format. We provide the best NetSec-Pro Study Guide and hope our sincere service will satisfy all the clients. And our services are praised by our worthy customers who said that when they talked with us, they knew we are reliable and professional.
