Our HPE Storage Solutions study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit HPE0-J68 exam questions. It points to the exam heart to solve your difficulty. With a minimum number of questions and answers of HPE0-J68 Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the HPE0-J68 exam questions help users quickly to pass the exam.

Sometimes many people find they always have one begin that if I have money.....If so I advise you apply for an IT certification steadfastly. HP HPE0-J68 valid exam questions and answers give an excellent beginning for your dream. If you pass exams and get a certification, you can obtain a high-salary job and realize your goal. HPE0-J68 Valid Exam Questions and answers help you pass exam certainly. We have a series of products for IT certification exams.

There is no doubt that obtaining this HPE0-J68 certification is recognition of their ability so that they can find a better job and gain the social status that they want. Most people are worried that it is not easy to obtain the certification of HPE0-J68, so they dare not choose to start. We are willing to appease your troubles and comfort you. We are convinced that our HPE0-J68 test material can help you solve your problems. Compared to other learning materials, our HPE0-J68 exam questions are of higher quality and can give you access to the HPE0-J68 certification that you have always dreamed of.

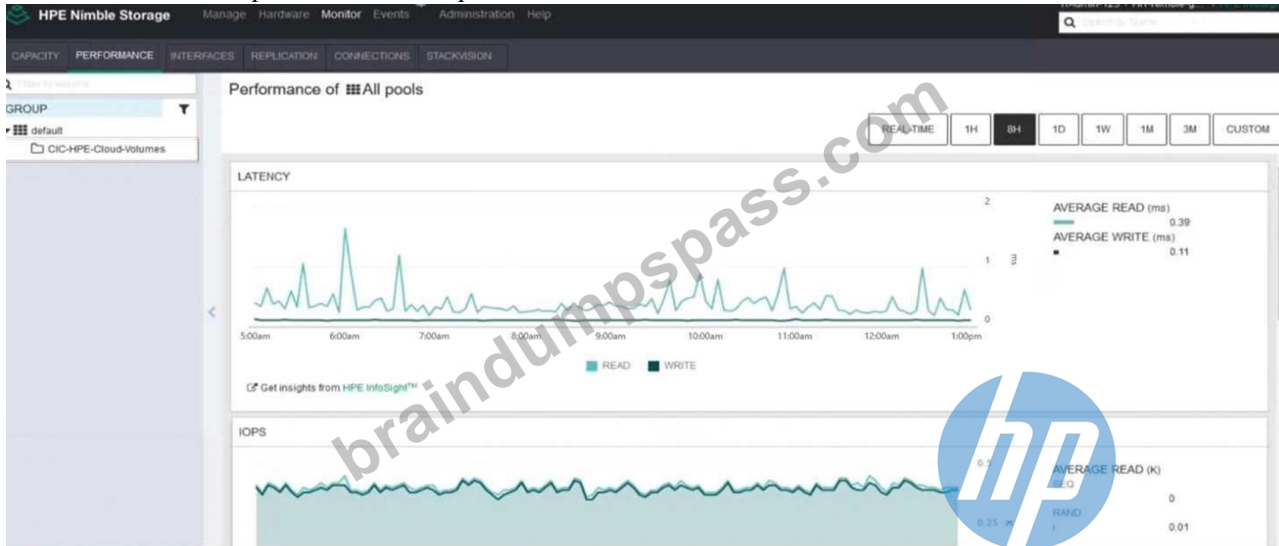

HPE Storage Solutions Sample Questions (Q257-Q262):

NEW QUESTION # 257

Hotspot Question

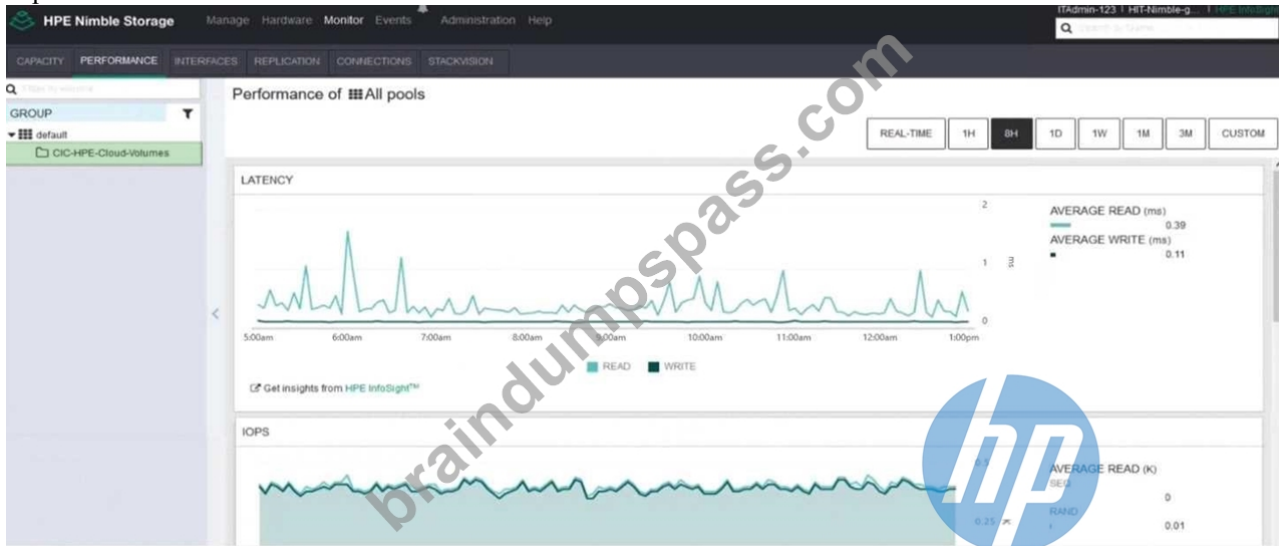

You are handing over the installed array to customer. The customer wants to review the amount of HDDs and SSDs in the system.

Click the relevant menu option where the front panel of the head shelf can be visualized.

Answer:

NEW QUESTION # 258

Your customer would like to implement a data protection technology that will offer the lowest possible RPO and will protect from entire array failure. Which technology should be used?

- A. Disk-based backup
- B. Snapshots
- C. Asynchronous replication
- **D. Synchronous replication**

Answer: D

Explanation:

Synchronous replication is the data protection technology that offers the lowest possible Recovery Point Objective (RPO) and can protect against an entire array failure. Synchronous replication ensures that data is simultaneously written to both the primary and secondary storage sites, providing real-time data protection. This approach minimizes data loss in the event of a disaster, as both sites contain identical data, making it the best choice for environments where data integrity and minimal RPO are critical.

NEW QUESTION # 259

What data access protocol does the HPE Alletra dHCI solution use between storage and compute layers?

- A. NVMe-oF
- **B. iSCSI**
- C. NFC
- D. FC

Answer: B

Explanation:

The HPE Alletra dHCI solution uses the iSCSI protocol for data access between the storage and compute layers. iSCSI is a network protocol that enables the transport of SCSI commands over IP networks, allowing for efficient and scalable storage networking. This protocol is commonly used in hyper-converged and disaggregated hyper-converged infrastructure (dHCI) environments, providing flexibility and ease of integration.

NEW QUESTION # 260

Match the HPE converged Strategy principle with its function

- A. Deduplication:- Reduce allocated capacity by eliminating data redundancy
- B. Federated Storage:- Move data between storage systems in peer-to-peer relationship simply, dynamically and nondestructively
- C. Storage tiering:- Use combination of I/O accelerator to place data to meet price, performance, and latency requirements .
- D. Thin provisioning:- Reduce TCO ,Opex and CPEX by using virtualization technology to make storage resources more efficient.
- **E. Storage virtualization:- Deliver simplified management ,higher utilization ,efficient, and agility by separating the logical and physical resource.**

Answer: E

Explanation:

These principles represent key components of HPE's converged strategy, each contributing to more efficient, agile, and cost-effective storage management:

Federated Storage: This principle allows seamless data movement between storage systems, enhancing flexibility and simplifying data management.

Deduplication: Reduces storage space by eliminating duplicate data, resulting in more efficient use of resources.

Thin Provisioning: Allows over-provisioning of storage to optimize costs while ensuring that resources are available when needed.

Storage Tiering: Dynamically places data on the appropriate storage tier based on performance and cost requirements, optimizing storage utilization.

Storage Virtualization: Separates the physical storage hardware from the logical storage services, providing greater flexibility and efficiency in managing storage resources.

NEW QUESTION # 261

Which HPE storage family should you recommend for a hybrid array, utilizing both SSD and HDD media, supporting 512TiB of raw storage and centralized cloud-based management?

- A. HPE GreenLake for Block
- B. HPE Alletra 6000
- C. HPE XP8
- **D. HPE Alletra 5000**

Answer: D

Explanation:

The HPE Alletra 5000 is the recommended storage family for a hybrid array that utilizes both SSD and HDD media, supports up to 512TiB of raw storage, and provides centralized cloud-based management. The Alletra 5000 series is designed to deliver a blend of performance and capacity, making it ideal for hybrid storage needs. Additionally, it integrates seamlessly with HPE's cloud-based management tools, offering a simplified and unified management experience across on-premises and cloud environments.

NEW QUESTION # 262
