

The Cisco 350-501 Exam is designed to cover a wide range of topics related to service provider networking, including network architecture, routing protocols, MPLS, VPNs, and Quality of Service (QoS). 350-501 exam also covers advanced topics such as network automation and network programmability, which are becoming increasingly important in today's dynamic networking environments.

350-501 Reliable Exam Cram & 350-501 Reliable Study Plan

You won't be anxious because the available Cisco 350-501 exam dumps are structured instead of distributed. Implementing and Operating Cisco Service Provider Network Core Technologies (350-501) certification exam candidates have specific requirements and anticipate a certain level of satisfaction before buying a Cisco 350-501 Practice Exam. The Cisco 350-501 practice exam applicants can rest assured that ITExamDownload's round-the-clock support staff will answer their questions.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q212-Q217):

NEW QUESTION # 212

How does Cisco MPLS TE use OSPF extensions to allow for optimized transit between a headend router and a destination router?

- A. ASBR Summary LSAs share OSPF domain information so that the two routers know how to reach each other during tunnel setup.
- **B. Opaque LSAs calculate and establish unidirectional tunnels that are set according to the network constraint.**
- C. Network LSAs share RSVP information to build the tunnel between the two routers.
- D. Router LSAs share router link advertisements to each router within the MPLS environment so that tunnels can be built bidirectionally.

Answer: B

Explanation:

Cisco MPLS TE uses OSPF extensions to allow for optimized transit between a headend router and a destination router by utilizing Opaque LSAs. Opaque LSAs allow for the calculation and establishment of unidirectional tunnels that are set according to the network constraint. The tunnels are built bidirectionally by utilizing Router LSAs, which share router link advertisements to each router within the MPLS environment. ASBR Summary LSAs are also used to share OSPF domain information so that the two routers know how to reach each other during tunnel setup. Furthermore, Network LSAs are used to share RSVP information which is necessary for setting up the tunnel between the two routers.

NEW QUESTION # 213

Refer to the exhibit:

Router R1 and its peer R2 reside on the same subnet in the network, If does it make connections to R2?

- A. R1 establishes TCP connections that are authenticated with a clear-text password
- B. R1 establishes UDP connections that are authenticated with an MD5 password
- **C. R1 establishes TCP connections that are authenticated with an MD5 password**
- D. R1 establishes UDP connections that are authenticated with a clear-text password

Answer: C

NEW QUESTION # 214

Refer to the exhibit:

Based on the show/ command output, which result m true after BGP session is established?

- **A. No routes are accepted from the neighbor 192.168.2.2, nor are any routes advertised to it**
- B. The IOS XR router does not advertise any routes to the neighbor 192.168.2.2, but it accepts all routes from 192.168.2.2.
- C. The IOS XR router advertises and accepts all routes to and from eBGP neighbor 192.168.2.2
- D. The IOS XR router advertises all routes to the neighbor 192.168.2.2, but it does not accept any routes from 192.168.2.2

Answer: A

NEW QUESTION # 215

Refer to the exhibit.

Refer to the exhibit. The radio network and packet core are using the route RX-RZ-RB to establish communication. The LDP session between 10.10.10.5 and 10.10.10.1 is experiencing link flapping at random intervals for 30-45 seconds each time. A network engineer must protect the LDP session and improve MPLS traffic convergence. Which action meets these requirements?

- A. Add session protection duration 60 for peer_acl_1 under the MPLS LDP instance on RZ.
- B. Configure Peer_acl_2 on RX and allow IP address 10.10.10.6 in LDP
- C. Enable IGP_LDP sysnc on RZ and RX
- D. Attach peer_acl_1 in for session protection duration 1 on RX.

Answer: A

NEW QUESTION # 216

Refer to the exhibit. Which the link aggregation configuration router is running on Cisco IOS XR software, which LACP interface configuration is needed to add the interface to the bundle?

- A. ☐
- B. ☐
- C. ☐
- D. ☒

Answer: D

NEW QUESTION # 217

ITExamDownload exam material is best suited to busy specialized who can now learn in their seemly timings. The 350-501 Exam dumps have been gratified in the PDF format which can certainly be retrieved on all the digital devices, including; Smartphone, Laptop, and Tablets. There will be no additional installation required for 350-501 certification exam preparation material. Also, this PDF can also be got printed. And all the information you will seize from 350-501 Exam PDF can be verified on the Practice software, which has numerous self-learning and self-assessment features to test their learning. Our software exam offers you statistical reports which will upkeep the students to find their weak areas and work on them.
