

GICSP Latest Exam Notes | Exam GICSP Discount

In order to ensure the quality of our GICSP preparation materials, we specially invited experienced team of experts to write them. The content of our GICSP practice engine comes from a careful analysis and summary of previous exam syllabus, so that you can accurately grasp the core test sites. At the same time, our professional experts are keeping a close eye on the changes of the exam questions and answers. So that our GICSP Study Guide can be the latest and most accurate.

Different person has different goals, but our Exam4PDF aims to help you successfully pass GICSP exam. Maybe to pass GICSP exam is the first step for you to have a better career in IT industry, but for our Exam4PDF, it is the entire meaning for us to develop GICSP exam software. So we try our best to extend our dumps, and our Exam4PDF elite comprehensively analyze the dumps so that you are easy to use it. Besides, we provide one-year free update service to guarantee that the GICSP Exam Materials you are using are the latest.

2026 Useful GICSP Latest Exam Notes | GICSP 100% Free Exam Discount

In our study, we found that many people have the strongest ability to use knowledge for a period of time at the beginning of their knowledge. As time goes on, memory fades. Our GICSP study materials are designed to help users consolidate what they have learned, will add to the instant of many training, the user can test their learning effect in time after finished the part of the learning content, have a special set of wrong topics in our GICSP Study Materials, enable users to find their weak spot of knowledge in this function, iterate through constant practice, finally reach a high success rate.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q65-Q70):

NEW QUESTION # 65

Implementation of LDAP to manage and control access to your systems is an outcome of which NIST CSF core function?

- A. Detect
- B. Identify
- C. Protect
- D. Respond

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

LDAP (Lightweight Directory Access Protocol) is used to manage authentication and authorization services, controlling user access to systems and resources.

This function aligns with the Protect function (A) of the NIST Cybersecurity Framework (CSF), which focuses on access control, identity management, and protective technology to safeguard systems.

Identify (B) relates to asset management and risk assessment.

Respond (C) deals with incident response.

Detect (D) relates to discovering cybersecurity events.

GICSP maps LDAP implementation as a key protective control to ensure authorized access in ICS environments.

NEW QUESTION # 66

As part of the security architecture for Level 3, you need to ensure that SCADA systems are protected from potential cyberattacks. Which of the following actions should be included in your security strategy?

(Select all that apply)

Response:

- A. Use encryption for data transmitted between SCADA systems and Level 2 devices
- B. Disable all firewalls to improve system performance
- C. Implement strong authentication for SCADA system access
- D. Regularly monitor network traffic for suspicious activity

Answer: A,C,D

NEW QUESTION # 67

Which document should be updated to include incident handling while in the Planning phase of incident response?

- A. Access control policy
- B. Vulnerability report
- C. Disaster recovery plan
- D. Backup policy

Answer: C

Explanation:

The Disaster Recovery Plan (DRP) (A) is the document that should incorporate incident handling procedures during the planning phase. It details how to respond to and recover from incidents to restore normal operations.

Access control policy (B) governs permissions.

Backup policy (C) describes data backup processes but not incident handling.

Vulnerability report (D) is an assessment document, not a procedural plan.

GICSP underscores integrating incident response within disaster recovery planning to ensure comprehensive preparedness.

NEW QUESTION # 68

What is a common challenge when implementing encryption for ICS communication protocols?

Response:

- A. Limited processing power of field devices
- B. Lack of bandwidth
- C. Difficulty in establishing secure wireless networks
- D. Excessive latency caused by encryption algorithms

Answer: A

NEW QUESTION # 69

Which of the following is located in user mode of a typical realtime OS, but in kernel mode of a typical standard OS?

- A. Virtual memory
- B. Device drivers

- C. Process scheduling
- **D. Interprocess communication**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In many real-time operating systems (RTOS), interprocess communication (IPC) mechanisms (A) operate in user mode to minimize latency and overhead.

In typical standard operating systems, IPC is usually handled by the kernel (kernel mode) for security and control.

Virtual memory (B), device drivers (C), and process scheduling (D) are typically kernel mode in both OS types.

GICSP covers these architectural differences important in ICS device security and performance.
