We constantly improve and update our 400-007 study guide and infuse new blood into them according to the development needs of the times and the change of the trend in the industry. We try our best to teach the learners all of the related knowledge about the test 400-007 certification in the most simple, efficient and intuitive way. We pay our experts high remuneration to let them play their biggest roles in producing our 400-007 Exam Prep. The share of our 400-007 test question in the international and domestic market is constantly increasing.

Cisco 400-007 exam is a computer-based test that consists of multiple-choice questions and simulations. 400-007 exam is designed to evaluate the candidate's ability to analyze complex network problems and propose effective solutions. 400-007 exam is timed and candidates are given a specific amount of time to complete each section. 400-007 exam is rigorous and challenging, and candidates are expected to have a high level of knowledge and experience in network design.

Cisco 400-007 Exam is designed to test the knowledge and skills of individuals seeking to become Cisco Certified Design Experts (CCDE v3.0). This is a written exam that covers a wide range of topics related to network design and architecture, including network infrastructure, security, and performance.

Take a Leap Forward in Your Career by Earning Cisco 400-007

Our 400-007 vce braindumps will boost your confidence for taking the actual test because the pass rate of our preparation materials almost reach to 98%. You can instantly download the free trial of 400-007 Exam PDF and check its credibility before you decide to buy. Our 400-007 free dumps are applied to all level of candidates and ensure you get high passing score in their first try.

Passing the Cisco 400-007 Exam requires a deep understanding of network design principles and advanced networking technologies. Candidates must be familiar with the latest industry trends and be able to apply their knowledge to solve complex network problems. They must also have excellent communication and collaboration skills, as network design often involves working closely with other IT professionals and stakeholders.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q262-Q267):

NEW QUESTION # 262

Which security protocol should a network engineer select to ensure packet authentication and data integrity across an IP network without encrypting the underlying payload?

- A. GRE tunnel
- B. GRE over IPsec
- C. IPsec AH
- D. IPsec ESP

Answer: C

Explanation:

Explanation:

D: IPsec Authentication Header (AH) provides integrity and authentication, but not encryption. It's ideal when data confidentiality is handled at the application layer and minimal overhead is desired.

Incorrect options:

A: GRE is a tunneling protocol, but it does not provide integrity or security.

B: GRE over IPsec is more complex and includes encryption (not needed here).

C: IPsec ESP provides encryption and integrity-overkill for this use case.

#

NEW QUESTION # 263

Refer to the exhibit.

	Equipment Cost	ISP Cost	Licenses Cost
SD-WAN over L3VPN	\$\$	\$\$	\$\$\$
SD-WAN over L2VPN	\$\$	\$	\$\$\$
Managed SD-WAN	\$	\$\$\$	-
DMVPN over L3VPN	\$\$	\$\$	\$

The WAN network of the General Bank of Greece has experienced several outages. It takes too long to activate a new branch site. The networking department of the bank plans to upgrade the legacy end-of-life WAN network with a new flexible, manageable, and scalable in-house solution. The number of branches will increase exponentially in the next fiscal year. The CTO states that the bank's main goal is OPEX reduction.

The network engineering team prepares a table to evaluate the available options. Which WAN technology can be used for the solution?

- A. DMVPN over L3VPN
- B. SD-WAN over L2VPN
- C. SD-WAN over L3VPN
- D. Managed SD-WAN

Answer: C

Explanation:

The scenario prioritizes:

In-house management (not managed services)

Scalability (exponential branch growth)

OPEX reduction (low operational cost)

SD-WAN over L3VPN offers a balance of:

Mid-level ISP cost (leveraging L3VPN as transport)

Centralized management and automation (ZTP, templates)

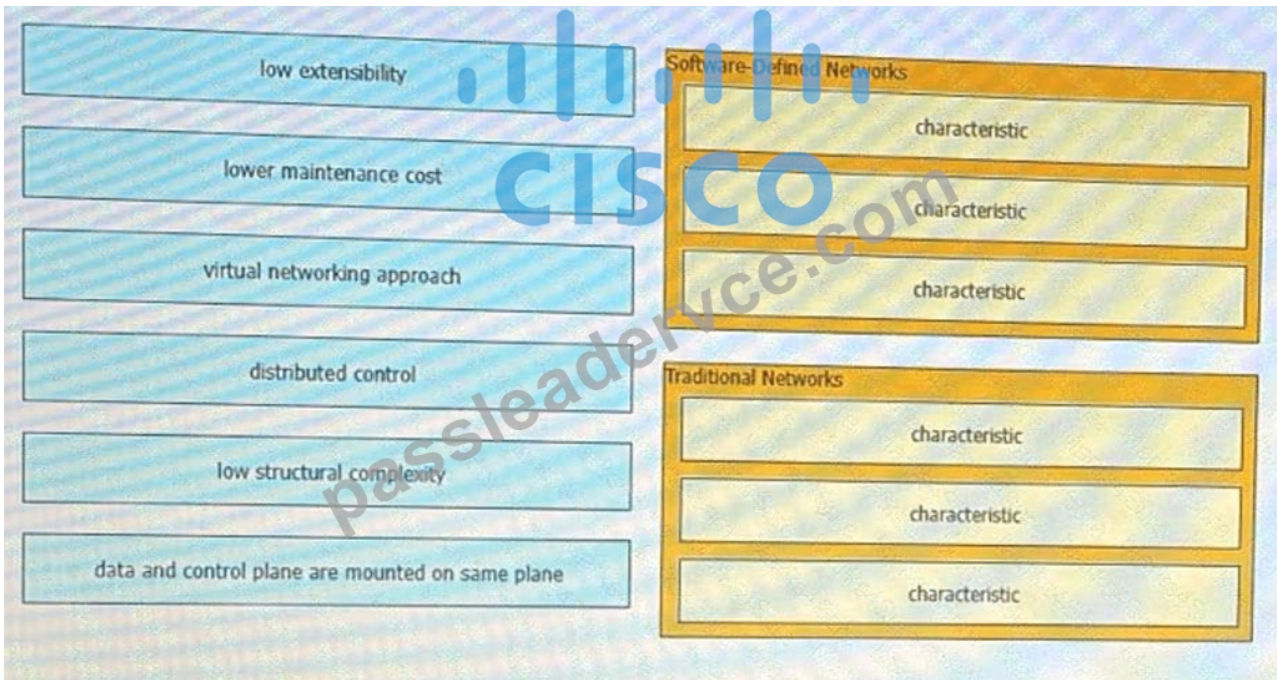

Support for segmentation, application-aware routing, and path control

Lower OPEX due to simplified configuration and monitoring

Managed SD-WAN has higher ISP and OPEX cost, and DMVPN is more manual and complex to scale. SD-WAN over L2VPN might reduce ISP cost but is less common and not optimal for rapid scalability.

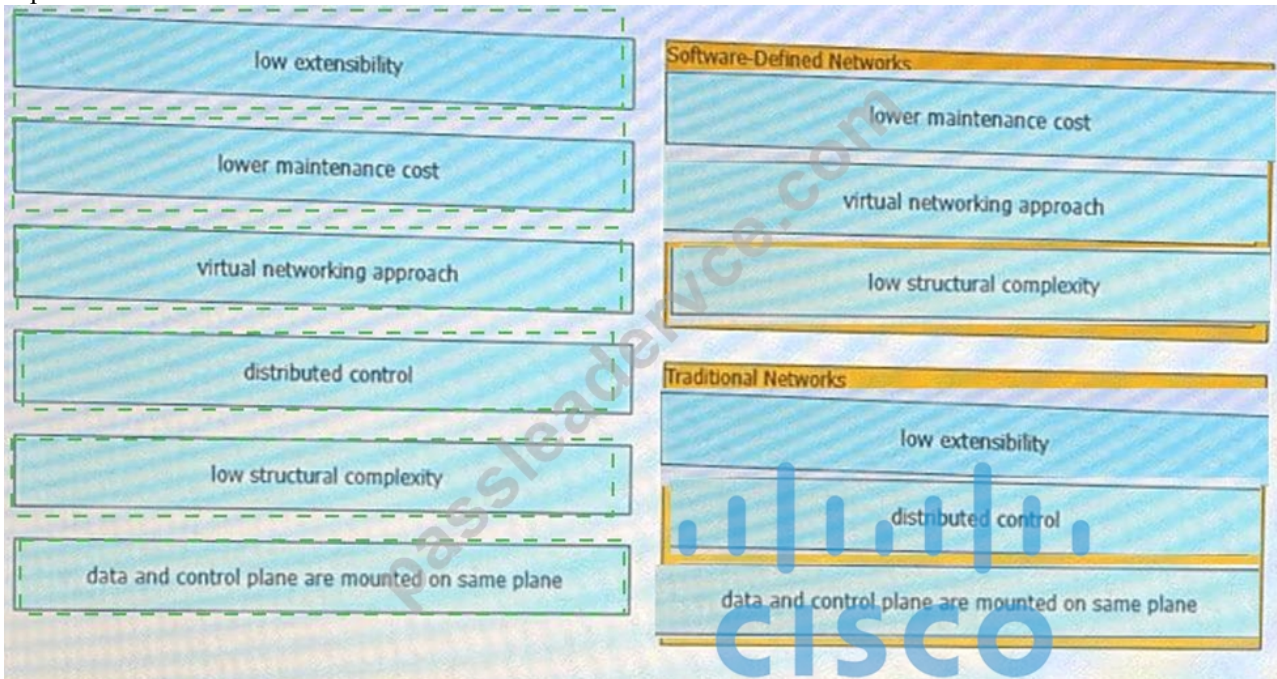

NEW QUESTION # 264

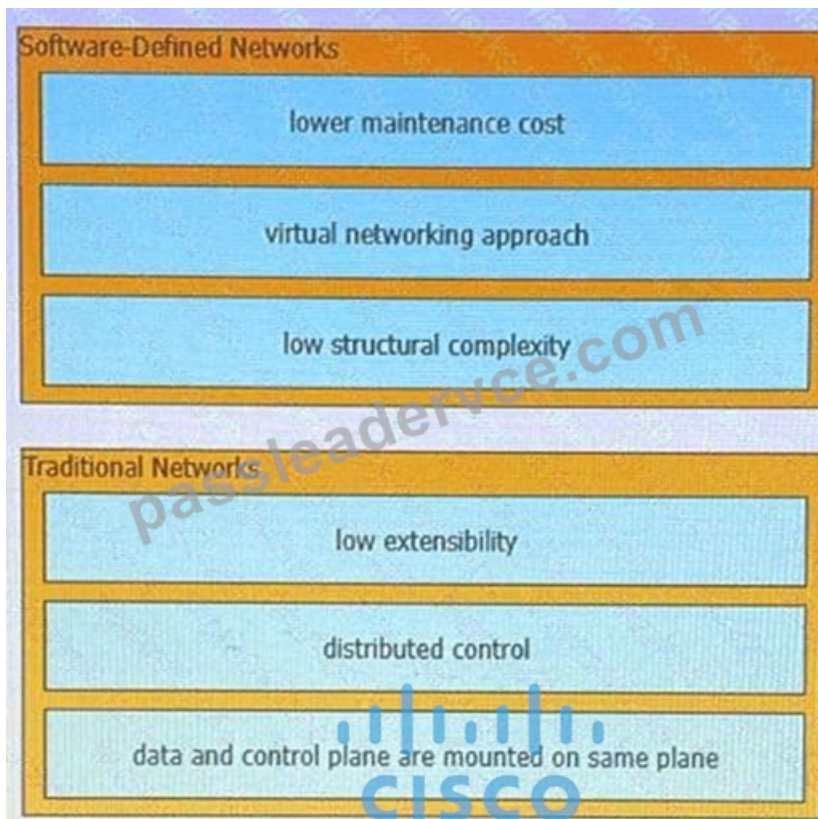

Software-defined network and traditional networks might appear the same to the end-user, but behind the scenes, each has unique sets of characteristics. Drag and drop these characteristic found on the left to the corresponding category on the right in no particular order?

Answer:

Explanation:

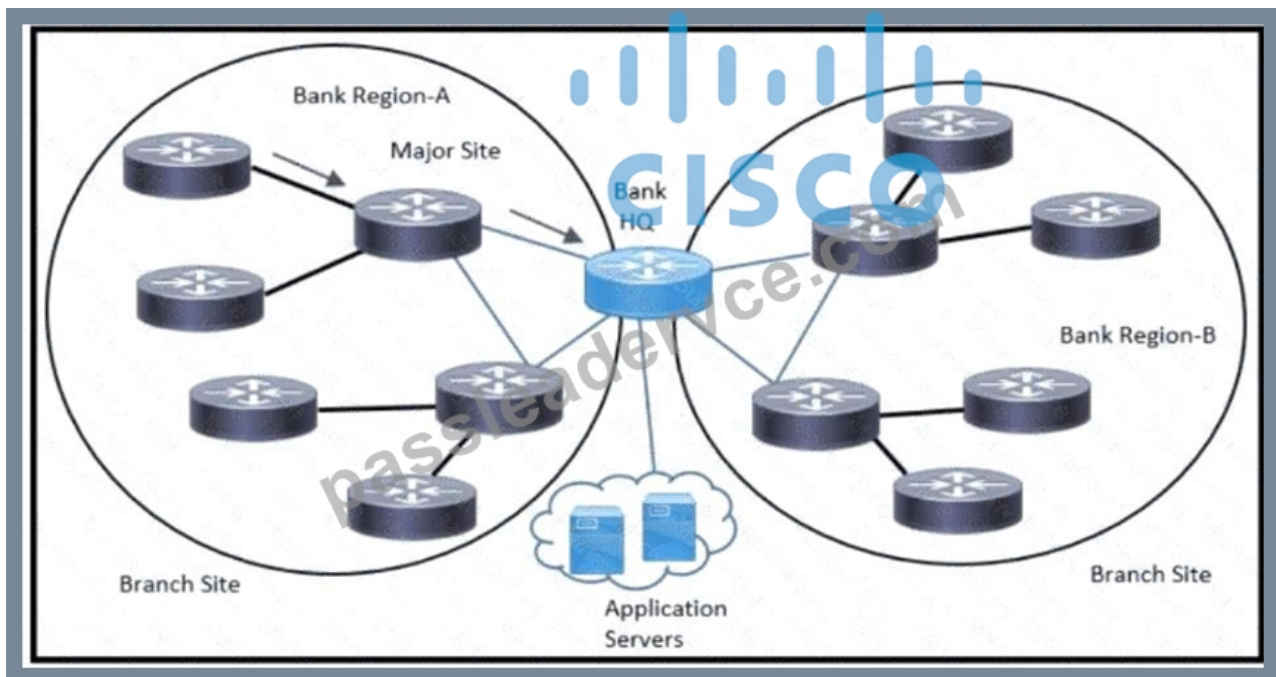

NEW QUESTION # 265

According to the CIA triad principles for network security design, which principle should be priority for a Zero Trust network?

- A. requirement for data-in-motion encryption and 2FA authentication
- B. ensuring that authorized users have high-availability system access from defined zones to defined systems or zones
- C. categorization of systems, data, and enterprise BYOD assets that are connected to network zones based on individual privacy needs
- **D. requirement for data-at-rest encryption for user identification within the VPN termination hardware**

Answer: D

NEW QUESTION # 266

Refer to the exhibit. An architect has been tasked to design an ISIS solution for a medium-size financial customer. The resulting design must meet these requirements:

- Traffic from the branches toward major sites is limited to 500 Mbps.
- Traffic from the major sites toward HQ is limited to 1Gbps.
- The number of branch sites will increase to 30 within the next three years.
- Link and node failures in a region must only have an impact within that region.

Which two ISIS design aspects must be included? (Choose two.)

- A. Region-A and Region-B major routers establish passive ISIS peering with HQ router.
- **B. Branch site routers establish L1 adjacencies and major site routers establish L1/L2 adjacencies.**
- C. Region-A and Region-B major routers advertise a default route toward the other region.
- D. Branch site routers and major site routers establish L2 adjacency.
- **E. Different ISIS instances on HQ router to separate Region-A and Region-B.**

Answer: B,E
