2V0-16.25考試心得，最新2V0-16.25題庫資源

NewDumps VMware的2V0-16.25考試認證培訓資料是互聯網裏最好的培訓資料，在所有的培訓資料裏是佼佼者。它不僅可以幫助你順利通過考試，還可以提高你的知識和技能，也有助於你的職業生涯在不同的條件下都可以發揮你的優勢，所有的國家一視同仁。

最新的 VCP-VVF Admin 2V0-16.25 免費考試真題 (Q34-Q39):

問題 #34

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- A. Create the widget in Explore Logs and click Add to Dashboard.
- B. Drag and drop the widget in the dashboard design pane.
- C. Clone the widget from an existing dashboard.
- D. Import the widget in the dashboard design pane.
- E. Open Management Pack Builder and clone the widget.

答案: A,B

解題說明:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

- * From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)
- * Dashboard Design Pane- Use the design interface to drag and drop widgets. (C) Other options:
- * A. Clone widget from existing dashboard# Not a supported method.
- * D. Import widget in design pane# Import is for dashboards, not individual widgets.
- * E. Management Pack Builder# Not related to Logs dashboard widgets.

問題 #35

An administrator has licensed vSphere components in Connected mode and then switched to Disconnected mode to meet the company security restrictions, which cannot be violated.

What must the administrator do to ensure the VMware vSphere Foundation license remains valid?

- A. Switch to Connected mode, validate that VCF Operations has downloaded a new license file from VCF Business Services console, and then switch to Disconnected mode at least once every 365 days.
- **B. Manually exchange a registration and license file between the VCF Operations instance and the VCF Business Services console at least once every 180 days.**
- C. Provide an internet connection to VCF Operations, then download a new license file from the VCF Business Services console at least once every 180 days.
- D. Nothing. The license is perpetual.

答案: B

解題說明:

For Disconnected mode licensing in vSphere Foundation:

- * Administrators must manually export a registration file, upload it to the VCF Business Services console, and then import the license file back into VCF Operations.
- * This process must be repeated every 180 days to maintain license validity.

Other options:

- * A. Switch to Connected mode once every 365 days# Incorrect; 180-day requirement.
- * C. License is perpetual# Not correct; subscription-based license requires refresh.
- * D. Provide internet connection every 180 days# Violates security restriction (Disconnected mode is required).

問題 #36

An administrator has been tasked to share resources in the cluster between the Quality Assurance (QA) Department and Marketing Department. The following information has been provided:

- * In the case of contention, the QA Department must not lose any performance.
- * When the QA Department is not using all of its allocated resources, the Marketing Department requires the ability to consume them.
- * The administrator has set up resource pools for the QA Department (RP-QA) and Marketing Department (RP-MKT).
How should the resource shares be configured for each pool?

- A. It is not possible to satisfy the requirements of both departments.
- **B. Set RP-QA to Fixed and RP-MKT to Scalable.**
- C. Set RP-QA to Scalable and RP-MKT to Fixed.
- D. Set both Resource Pools to Fixed.

答案: B

解題說明:

The requirements:

- * QA must not lose performance during contention# QA must have guaranteed resources, so Fixed is correct.
- * Marketing can use leftover resources when QA is idle# Marketing must be Scalable, so it can borrow resources from QA's allocation when available.

Other options:

- * A. Both Fixed# Marketing would not be able to use QA's unused resources.
- * C. QA Scalable, MKT Fixed# QA would lose guaranteed resources, violating requirements.
- * D. Not possible# Incorrect; VMware supports this configuration.

問題 #37

What is the benefit of enabling lockdown mode on VMware ESX hosts?

- **A. Restricts direct access to the ESX host, enhancing security.**
- B. Improves network performance.
- C. Increases CPU and memory resources available to virtual machines (VMs).
- D. Simplifies the management of virtual machines.

答案: A

解題說明:

Lockdown Mode on ESXi hosts is a security feature that restricts direct login to the ESXi host.

* Once enabled, administrators must manage the host through vCenter Server instead of direct DCUI/SSH access (except for exception users).

* This prevents unauthorized local access and improves overall security compliance.

Other options:

- * A. Improves network performance# Not related.
- * C. Increases CPU/memory for VMs# Not related.
- * D. Simplifies VM management# It actually makes direct management more restricted.

問題 #38

An administrator is tasked to optimize storage utilization in an existing VMware vSAN Original Storage Architecture (OSA) cluster.

The cluster has the following configuration:

- * Eight-node cluster with 1 disk group per node.
- * Virtual machines (VMs) are configured with 1 failure - RAID-1 storage policy.
- * Storage utilization is at 70%.

Which action can the administrator take to reduce the existing storage utilization with the minimum impact to the cluster?

- A. Change the storage policy to 3 failure - RAID-1.
- B. Enable Deduplication and Compression on the cluster.
- **C. Change the storage policy to 2 failure - RAID-6.**
- D. Enable Compression only on the cluster.

答案: C

解題說明:

In vSAN Original Storage Architecture (OSA) cluster, the choice of storage policy directly impacts storage efficiency and resilience:

* Current Setup:

* Eight-node cluster, 1 disk group per node.

* VMs are using FTT=1 RAID-1 (mirroring) policy.

* Storage utilization is already at 70%.

* RAID-1 (Mirroring):

* Each piece of data is mirrored, requiring 2x storage capacity.

* Space efficiency ~50%.

* RAID-6 (Erasure Coding, FTT=2):

- * Requires a minimum of 6 hosts, satisfied here with 8.
- * Uses erasure coding instead of full mirroring, giving ~67% space efficiency.
- * Provides resilience against 2 host failures while using less space than RAID-1.

Thus, switching from RAID-1 FTT=1 to RAID-6 FTT=2 reduces overall storage utilization while still improving resilience.

Why not the other options?

- * A. Enable Deduplication and Compression###In OSA, enabling this requires a cluster-wide disk group reformat, which is disruptive and not the minimal impact choice.
- * B. Change policy to 3 failure - RAID-1###Increases redundancy but consumes much more capacity, worsening utilization.
- * C. Enable Compression only###Not available in OSA (only in ESA). OSA supports deduplication + compression together, not compression-only.
- * D. Change to 2 failure - RAID-6###Meets resilience requirements, reduces storage usage, and is supported on 8-node OSA clusters.
