

NCP-CI-AWS問題と解答、NCP-CI-AWS資格模擬

P.S.ShikenPASSがGoogle Driveで共有している無料の2026 Nutanix NCP-CI-AWSダンプ: <https://drive.google.com/open?id=1vAoQ72ILWwmMcN8maO5jo4MDXcbBo7Ce>

当社ShikenPASSの専門家は、NCP-CI-AWSテストクイズが毎日更新されるかどうかを確認しています。NCP-CI-AWS試験トレンドは、更新システムによってデジタル化された世界に対応できることを保証できます。私たちは、お客様が教材に関する最新情報を入手できるように最善を尽くします。弊社のNCP-CI-AWS試験トレンドを購入する意思がある場合は、更新システムを楽しむ権利があることは間違いありません。NCP-CI-AWS試験のダンプが更新されると、NCP-CI-AWSテストクイズの最新情報がすぐに届きます。すぐにNCP-CI-AWS試験準備をすぐに購入しましょう！

Nutanix NCP-CI-AWS 認定試験の出題範囲:

| トピック | 出題範囲 |
|--------|--|
| トピック 1 | <ul style="list-style-type: none"> Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health. |
| トピック 2 | <ul style="list-style-type: none"> Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites. |
| トピック 3 | <ul style="list-style-type: none"> Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges. |
| トピック 4 | <ul style="list-style-type: none"> Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues. |

試験の準備方法-権威のあるNCP-CI-AWS問題と解答試験-素晴らしいNCP-CI-AWS資格模擬

NCP-CI-AWSの科学技術の改善は、社会の将来の建設と発展に強大な力を生み出します。NCP-CI-AWS模擬試験は、緊急の課題に対処するための最適な選択および有用なツールとなります。10年以上の努力により、当社のNCP-CI-AWSトレーニング資料は、業界で最も広く称賛され、待望の製品になりました。NCP-CI-AWS模擬試験の計画と設計において、プロのエリートから完全な技術サポートを受けています。もうheしないでください。NCP-CI-AWS学習エンジンの購入を後悔することはありません！

Nutanix Certified Professional - Cloud Integration - AWS 認定 NCP-CI-AWS 試験問題 (Q70-Q75):

質問 # 70

A company needs to create virtual interfaces directly to public AWS S3 services. The company also wants to bypass any internet service providers in the network path.

Which method will best satisfy this requirement?

- A. Bastion Host
- B. VPN
- C. Direct Connect
- D. SSH

正解: C

解説:

AWS Direct Connect allows companies to create private, dedicated connections between their data centers and AWS. This bypasses the internet and provides a more reliable and faster network connection directly to AWS services, including S3.

Reference:

AWS Direct Connect Documentation

AWS S3 Access over Direct Connect

質問 # 71

The ERP added to both the Transit and User VPC matches, but none of the VMs running on the cluster within the User VM subnets can communicate outbound. What could be the cause of this?

- A. The AWS security Group needs to be opened for the traffic.
- B. A static route needs to be added in the Transit VPC.
- C. The AWS VPC needs to have the ERP CIDR added.
- D. A static route needs to be added in the User VPC.

正解: D

解説:

In an NC2 environment using Flow Virtual Networking (FVN), the External Routable Prefix (ERP) is used to identify the address space that can reach external networks. If the ERP is correctly configured in both the Transit and User VPCs but outbound communication still fails, the issue typically lies within the virtual routing table. A static route (such as 0.0.0.0/0) must be manually added to the User VPC routing table with the next hop set to the overlay-external-subnet. Without this explicit static route, the virtual router within the User VPC does not know how to direct traffic toward the Transit VPC for outbound delivery, even if the address ranges are theoretically compatible. Verifying this routing path is a standard step in ensuring overlay workloads can reach on-premises or internet resources.

質問 # 72

How many Amazon Elastic Block Store(EBS) volumes are attached to each node within an AWS NC2 cluster upon creation.

- A. 0
- B. 1
- C. 2
- D. 3

正解: C

解説:

Upon creation, each node within an AWS NC2 cluster has 3 Amazon Elastic Block Store (EBS) volumes attached.

These volumes are used for different purposes, such as operating system storage, Nutanix services, and user data storage.

The number of EBS volumes is designed to ensure adequate storage performance and capacity for the NC2 cluster's operations and workload demands.

Reference:

Refer to the Nutanix documentation on NC2 cluster setup and AWS EBS volume configurations to confirm the details on the

number and purpose of EBS volumes attached to each node.

質問 # 73

An administrator wants to route the outbound and inbound traffic from the NC2 cluster through a proxy server. Which two statements are correct about using a proxy server? (Choose two.)

- A. NC2 clusters using Flow Virtual Networking do not support a proxy server.
- B. The proxy server must be configured only while creating a cluster because the proxy server settings cannot be configured after the cluster is deployed.
- C. A proxy server is only supported with AOS 6.7.1.6 or higher versions and only with user-created VPCs.
- D. The proxy configuration can be changed while tasks for adding or removing nodes are in progress.

正解: A、C

解説:

Configuring a proxy server for NC2 on AWS is a critical security step for organizations requiring centralized traffic inspection. This capability is specific to certain software versions and network architectures.

Support for proxy servers was introduced in AOS 6.7.1.6 and requires the deployment to be within a user-created VPC (Bring Your Own VPC), rather than an auto-created VPC managed by Nutanix. It is important to note that Flow Virtual Networking (FVN), which provides advanced overlay networking capabilities, currently does not support the use of a proxy server for cluster traffic. Therefore, administrators must choose between the advanced features of FVN and the traffic routing control provided by a proxy server based on their specific organizational requirements.

質問 # 74

Which environment is able to verify whether Multicloud Snapshot Technology (MST) is supported in a new NC2 on AWS deployment as well as confirm the best installation process?

- A. Prism Element
- B. YAML Templates
- C. OSM-based method
- D. Prism Central Marketplace

正解: D

解説:

The Prism Central Marketplace serves as the centralized hub for discovering, enabling, and managing various Nutanix services and integrated technologies. For administrators deploying NC2 on AWS, the Marketplace is the designated environment to verify the compatibility and support status of Multicloud Snapshot Technology (MST). Within this interface, the system provides documentation and automated workflows that confirm the best installation process for the specific environment. This ensures that the required software versions and dependencies are met before attempting to protect workloads to cloud object storage like Amazon S3. Utilizing the Marketplace simplifies the "Day Two" operational tasks by providing a validated path for deployment rather than relying on manual configuration or external templates.

質問 # 75

.....

IT業種が新しい業種で、経済発展を促進するチェーンですから、極めて重要な存在ということを我々は良く知っています。IT認証はIT業種での競争な手段の一つです。認証に受かったらあなたは各方面でよく向上させます。でも、受かることが難しいですから、トレーニングツールを利用するのを勧めます。トレーニング資料を選びたいのなら、ShikenPASSのNutanixのNCP-CI-AWS試験トレーニング資料は最高の選択です。この資料の成功率が100パーセントに達して、あなたが試験に合格することを保証します。
