

Free PDF Quiz Fantastic Fortinet - Exam FCP_GCS_AD-7.6 Topics

To find better job opportunities you have to learn new and in-demand skills and upgrade your knowledge. With the FCP - Google Cloud Security 7.6 Administrator FCP_GCS_AD-7.6 Exam you can do this job nicely and quickly. To do this you just need to get registered in the 2Pass4sure FCP - Google Cloud Security 7.6 Administrator exam and put all your efforts to pass this challenging FCP - Google Cloud Security 7.6 Administrator exam with good scores. However, you should keep in mind that the FCP - Google Cloud Security 7.6 Administrator exam is a valuable credential and will play an important role in your career advancement

In today's highly developed and toughly competitive society, professional certificates are playing crucial importance for individuals like FCP_GCS_AD-7.6. The choices of useful FCP_GCS_AD-7.6 study materials have become increasingly various which serve to convey information about the FCP_GCS_AD-7.6 Exam. And we have become a famous brand for we have engaged in this career. If you choose our FCP_GCS_AD-7.6 practice engine, you will find the shortcut to the success.

FCP_GCS_AD-7.6 Certification Test Answers | Accurate FCP_GCS_AD-7.6 Test

We know that you have strong desire for success in your career, now, we recommend you to get the FCP_GCS_AD-7.6 exam certification. 2Pass4sure will help you and provide you with the high quality Fortinet training material. FCP_GCS_AD-7.6 questions are selected and edited from the original questions pool and verified by the professional experts. Besides, the updated of FCP_GCS_AD-7.6 Pdf Torrent is checked every day by our experts and the new information can be added into the FCP_GCS_AD-7.6 exam dumps immediately.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q26-Q31):

NEW QUESTION # 26

An administrator has been tasked with modifying their organization's existing active-passive high-availability (HA) FortiGate cluster and turn it into an active-active HA cluster.

Which two behavior changes will the administrator see in the cluster after the change? (Choose two.)

- A. There is no longer a need to reserve a dedicated port for HA communications.
- B. The sessions will no longer be synchronized between cluster members.
- C. The cluster no longer act as a single logical instance.
- D. The configuration will no longer be synchronized between cluster members.

Answer: A,C

Explanation:

Active-active HA does not require a dedicated HA communication port as each member handles traffic independently. In active-active mode, cluster members operate more independently and do not present as a single logical device like in active-passive mode.

NEW QUESTION # 27

Which architecture inspection type in Google Cloud is most closely associated with Google Cloud Interconnect?

- A. Inbound north-south traffic inspection
- B. Outbound north-south traffic inspection
- C. East-west traffic inspection
- D. Hybrid cloud inspection

Answer: D

Explanation:

Google Cloud Interconnect connects on-premises networks with Google Cloud, enabling hybrid cloud environments. Inspection related to this connectivity focuses on hybrid cloud traffic flows.

NEW QUESTION # 28

An administrator wants to use the FortiGate automation stitch feature to quarantine compromised hosts. Which native Google Cloud service should the administrator integrate with FortiGate to achieve this?

- A. Google Cloud Run functions
- B. Google Cloud Interconnect
- C. Google Cloud App_Engine
- D. Google Cloud IAM

Answer: A

Explanation:

Google Cloud Run allows you to run serverless containerized functions that can be triggered by FortiGate automation stitches to perform actions such as quarantining compromised hosts. It is the native service best suited for automating responses in cloud environments.

NEW QUESTION # 29

An organization has decided to deploy an active-active high-availability cluster in Google Cloud. Which three load balancing features are critical to the successful deployment of the cluster? (Choose three.)

- A. The session termination of the external passthrough network load balancer
- B. The symmetric hashing of the internal passthrough network load balancer
- C. The L3_DEFAULT protocol in the forwarding rule of the internal passthrough network load balancer
- D. The forwarding rule for the internal passthrough network load balancer as the next hop for custom routes
- E. The health check used by the internal and the external passthrough network load balancer

Answer: B,D,E

Explanation:

Health checks ensure load balancers route traffic only to healthy cluster members.

Forwarding rules act as next hops in routing, directing traffic appropriately within the HA cluster.

Symmetric hashing ensures consistent and balanced traffic distribution across cluster members, critical for active-active deployments.

NEW QUESTION # 30

Refer to the exhibit.

Diagnose output

```
passive # diagnose debug application gcpd -1
passive # diagnose debug enable

...

passive # HA event
eip cluster-ip-vpm(34.68.13.24) is attached in remote instance: us-central1-c/fgt-vpm, should be moved to local
[pid 9000]: failover eip: cluster-ip-vpm(34.68.13.24)
[pid 9000]: get nics info for instance fgt-vpm
[pid 9000]: get instance nic: nic0, 172.16.0.2, vpc-vpm, accessConfig(external-nat), eip(34.68.13.24), tier(PREMIUM)
[pid 9000]: get instance nic: nic1, 172.16.1.2, vpc2-vpm
[pid 9000]: get instance nic: nic2, 172.16.2.2, vpc3-vpm, accessConfig(external-nat), eip(34.66.4.139), tier(PREMIUM)
[pid 9000]: nic0 of instance fgt-vpm is using eip 34.68.13.24
[pid 9000]: remove eip 34.68.13.24 from instance fgt-vpm(nic0).
gcpd checking route: internal-route-vpm
failover route: internal-route-vpm, move next hop from 172.16.1.2 to 172.16.1.3
[pid 9004]: failover route: internal-route-vpm
[pid 9004]: remove route internal-route-vpm on next hop 172.16.1.2
gcpd checking forwardrule: fgt-forwarding-rule
failover forwardrule: fgt-forwarding-rule, move target from fgt-target-vpm to fgt-target2-vpm
[pid 9006]: failover forwardrule: fgt-forwarding-rule
[pid 9006]: set target forwardrule fgt-forwarding-rule point to target instance fgt-target2-vpm
[pid 9004]: route internal-route-vpm is updated to next hop 172.16.1.3 successfully.
[pid 9000]: attach eip 34.68.13.24 to instance fgt-2-vpm(nic0).
[pid 9000]: eip cluster-ip-vpm(34.68.13.24) is attached to local successfully.
[pid 9006]: forwardrule fgt-forwarding-rule is updated to next hop fgt-target2-vpm successfully.
==== gcpd ha failover exit ====
```

An administrator is troubleshooting an issue when a high-availability (HA) failover occurs.

Which conclusion can you draw from the debug output?

- A. The health check has successfully updated the internal custom route to forward all internal traffic to 172.16.1.3.
- B. The HA cluster is deployed using the software-defined network (SDN) connector.
- C. Both cluster members are located in the same zone.
- D. The HA cluster is accessible using HTTPS on 34.68.13.24 and 34.66.4.139.

Answer: A

Explanation:

The debug output shows the internal route being updated and moved to the new next hop (172.16.1.3), indicating the health check and failover process successfully redirected internal traffic to the active HA node.

NEW QUESTION # 31

.....

FCP_GCS_AD-7.6 exam dumps provided by 2Pass4sure are tested through practice, and are the most correct and the newest practical FCP_GCS_AD-7.6 test dumps. Our 2Pass4sure can provide accurate FCP_GCS_AD-7.6 certification training questions based on extensive research and the experience of real world to make you pass FCP_GCS_AD-7.6 Certification Exam in a short time. If you purchase our FCP_GCS_AD-7.6 exam dumps, we will offer free update service within one year.
