SAP Certified Associate - Process Data Analyst - SAP Signavio 認定 C_SIGDA_2403 試験問題 (Q37-Q42):

質問 # 37

What can create a deadlock in process modelled?

- A. A merging exclusive gateway receives multiple tokens.
- B. A loop has been modelled.
- C. A parallel merging gateway expects more tokens than existing.
- D. One of many tokens receives the end event.

正解: C

質問 # 38

What are the typical roles required in projects? Note: There are 3 correct answers to this question.

- A. Project Lead
- B. Data & IT Expert
- C. Process Manager
- D. Process Analyst
- E. Process Owner

正解: B、D、E

質問 # 39

What are some benefits of the comment function in the SAP Signavio Process Collaboration Hub? Note: There are 2 correct answers to this question.

- A. Add relevant attributes directly through the comment function.
- B. Optimization can be achieved much faster.
- C. Edit and publish processes immediately.
- D. Include all employees in process performances and reviews.

正解: B、D

解説:

The comment function within the SAP Signavio Process Collaboration Hub offers several benefits, primarily aimed at enhancing collaboration and optimization. Firstly, it allows for the inclusion of all employees in process performance reviews and discussions, thereby fostering a culture of continuous improvement and engagement across the organization. Secondly, optimization processes can be significantly accelerated as feedback and suggestions are gathered and acted upon swiftly. This function does not, however, directly enable users to edit and publish processes (which is more aligned with the administrative rights within the tool) or to add relevant attributes directly through the comment function, as attributes are typically managed within the process modeling environment.
