Salesforce Certified Marketing Cloud Email Specialist Sample Questions (Q30-Q35):

NEW QUESTION # 30

A marketer has started using Datorama Reports to enhance their email performance and engagement monitoring, which feature should improve Datorama Dashboard usability?

- A. Sender Profile
- B. Campaigns
- C. Tabs

Answer: C

Explanation:

In Datorama Reports for Salesforce Marketing Cloud, using Tabs can significantly improve dashboard usability. Tabs help organize data and reports into manageable sections, making it easier for users to navigate through different metrics and insights without overwhelming them with too much information on a single page.

Reference: Salesforce Marketing Cloud Documentation on Datorama Reports

NEW QUESTION # 31

Northern Trail Outfitters (NTO) has subscribers opt-in to its marketing program via email or SMS.

What should NTO configure for its welcome series in Journey Builder to honor the opt-in communication method?

- A. Create one Entry Source for each messaging channel.
- B. Ensure preferred channel is available in subscriber data.
- C. Send both email and SMS to ensure subscribers get NTO's messages.

Answer: A

Explanation:

To honor the opt-in communication method for subscribers in NTO's welcome series, it is recommended to create one Entry Source for each messaging channel in Journey Builder. This approach ensures that subscribers receive communications via their preferred channel, whether it be email or SMS. By configuring separate entry sources, the welcome series can deliver messages that align with the opt-in preferences of each subscriber, enhancing the personalization and effectiveness of the communication.

NEW QUESTION # 32

Northern Trail Outfitters wants to organize its assets so images can be easily searched by tags in Content Builder. However, most images have multiple tags that could be applied, which makes it more difficult to filter to a manageable number of results.

How should the number of tags selected for an asset be minimized while still providing the necessary granularity?

- A. Make the Customer Key more descriptive.
- B. Use nested tags to create hierarchies.
- C. Leverage Einstein for content tagging.

Answer: B

Explanation:

Using nested tags to create hierarchies allows for a more organized and structured tagging system. This approach reduces the number of tags per asset by grouping related tags under broader categories, making it easier to filter and search for specific content. This method maintains the necessary granularity while improving manageability. Salesforce Marketing Cloud documentation on Content Builder provides guidance on setting up and using nested tags effectively.

NEW QUESTION # 33

A marketer is asked to create a sendable data extension from various tables including orders, subscribers, and product line items. The resulting data extension will be used as an entry source for a journey. Which tool should help create this table?

- **A. Data Designer**
- B. Audience Studio
- C. Automation Studio

Answer: A

Explanation:

To create a sendable data extension from various tables including orders, subscribers, and product line items, the marketer should use Data Designer. Data Designer allows users to define and related data within Marketing Cloud, facilitating the creation of complex data relationships and data extensions used in journeys and campaigns.

NEW QUESTION # 34

The data team at Northern Trail Outfitters wants to send a daily report of all subscribers emailed in the last 24 hours to their Enhanced FTP Export folder. The file should contain unique email addresses.

At a minimum, which activities should be configured in Automation Studio to meet their requirements?

- **A. SQL Query, Data Extract, File Transfer**
- B. Filter, Data Extract, File Transfer
- C. SQL Query, Filter, Data Extract

Answer: A

Explanation:

To meet the requirement of sending a daily report of all subscribers emailed in the last 24 hours to the Enhanced FTP Export folder, the following activities should be configured in Automation Studio:

* SQL Query: To select the unique email addresses of subscribers emailed in the last 24 hours.

* Data Extract: To extract the data into a file format suitable for transfer.

* File Transfer: To move the extracted file to the Enhanced FTP Export folder.

This combination ensures that the data is queried, extracted, and then transferred as needed. Reference:
