D-PDD-DY-23최신 시험 예상문제모음 & D-PDD-DY-23최신탕덤프

EMC D-PDD-DY-23 덤프구매전 한국어 온라인상담서비스부터 구매후 덤프 무료 업데이트버전제공 , EMC D-PDD-DY-23시험불합격시 덤프비용 전액환불 혹은 다른 과목으로 교환 등 저희는 구매전부터 구매후까지 철저한 서비스를 제공해드립니다. EMC D-PDD-DY-23 덤프는 인기덤프인데 지금까지 덤프를 구매한후 환불신청하신 분은 아직 없었습니다.

최신 Dell Data Protection D-PDD-DY-23 무료샘플문제 (Q61-Q66):

질문 # 61

What is a characteristic of Dell Cloud Tier?

- A. The VTL vault cannot be stored in cloud tier storage
- **B. Managed through a single namespace**
- C. NFS, HTTPS, and CIFS are supported for data movement
- D. Scales to the maximum capacity of the active tier

정답: B

질문 # 62

An administrator is scaling Cloud Tier for a DD9400 by adding a second cloud unit.

What is the required amount of metadata storage (TB)?

- A. 0
- **B. 1**
- C. 2
- D. 3

정답: B

질문 # 63

Task

Use the simulator to schedule PowerProtect DD space reclamation to occur every Monday at 4:00 AM without impacting system resources for more than 25%.

When you have finished, continue to the next question.

정답:

설명:

See the solution in the explanation below.

Explanation:

To schedule space reclamation on a PowerProtect DD system as specified, here's the general procedure to follow in the DD System Manager:

- * Log into DD System Manager: Access the management interface for your PowerProtect DD system.
- * Navigate to Data Management: In the sidebar, look for an option labeled Data Management or similar (may vary slightly depending on the exact DD OS version).
- * Select Space Reclamation: Within Data Management, find and select Space Reclamation settings.
- * Set Schedule:
- * Click on Schedule and choose to add a new schedule if not already present.
- * Set the Day to Monday.
- * Set the Time to 4:00 AM.
- * Configure Resource Limit:
- * Look for an option to limit the resource usage for the reclamation task.
- * Set the Maximum System Resource Usage (or a similarly named option) to 25% to avoid impacting the system performance excessively.
- * Save the Schedule: Confirm and save your settings.
- * Verify the Schedule: Check that the schedule appears correctly in the list, indicating it will run every Monday at 4:00 AM with the specified resource usage limit.

After completing these steps, the PowerProtect DD system should reclaim space as scheduled without exceeding 25% resource usage, minimizing its impact on other system operations.

질문 # 64

What are valid states for the DD VTL process?

- A. Stopped, Disabled, Running, and Starting
- B. Disabled, Jammed, Starting, and Timed out
- C. Running, Starting, Stopping, and Stuck

정답: C

질문 # 65

A systems administrator wants to change encryption.

Which user role is needed to log in, and what command must be run to enable the security policy?

- A. sysadmin user and run authentication policy set security-officer enabled
- B. security officer user and run authorization policy set security-officer enabled
- C. security officer user and run authentication policy set security-officer enabled
- D. sysadmin user and run authorization policy set security-officer enabled

정답: B

질문 # 66
