SAP C_S4CPB_2508 Test Study Guide - C_S4CPB_2508 Relevant Answers

If you want to through the SAP C_S4CPB_2508 certification exam to make a stronger position in today's competitive IT industry, then you need the strong expertise knowledge and the accumulated efforts. And pass the SAP C_S4CPB_2508 exam is not easy. Perhaps through SAP C_S4CPB_2508 exam you can promote yourself to the IT industry. But it is not necessary to spend a lot of time and effort to learn the expertise. You can choose VCE4Plus's SAP C_S4CPB_2508 Exam Training materials. This is training product that specifically made for IT exam. With it you can pass the difficult SAP C_S4CPB_2508 exam effortlessly.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q49-Q54):

NEW QUESTION # 49
What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?
Note: There are 2 correct answers to this question

- A. Configuration activities
- B. Scoping
- C. Fiscal year variant
- D. Group currency

Answer: C,D

Explanation:
Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the configuration for areas not equipped with preconfiguration content. References = SAP Central Business Configuration - Overview, page 6; Configuring with SAP Central Business Configuration

NEW QUESTION # 50
In which of the following systems do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Implementation
- B. SAP Central Business Configuration
- C. SAP Cloud ALM for Operations
- D. SAP Cloud ALM for Service

Answer: B

NEW QUESTION # 51
In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Modify building blocks.
- B. Create new scope items.
- C. Change approval thresholds.
- D. Add new sales organizations.
- E. Add blocking reasons for billing.

Answer: C,D,E

Explanation:
In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:
* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.
* Change approval thresholds: Modifying approval thresholds is an essential configuration activity that adjusts the approval limits for various transactions, ensuring that the approval process aligns with the company's internal control and governance policies. This can involve setting different thresholds for purchase orders, expense approvals, and other financial transactions.
* Add blocking reasons for billing: This configuration activity allows the company to define specific reasons for blocking billing documents, ensuring that billing does not proceed under certain conditions until the issues are resolved. This is critical for maintaining accurate and compliant billing processes.
These activities are part of the detailed configuration work that tailors the SAP S/4HANA Cloud system to the specific operational needs of the business, ensuring that the software supports the company's unique processes and policies.

NEW QUESTION # 52

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. Integration and API List
- B. SAP Cloud ALM Requirements app
- C. SAP Business Accelerator Hub
- D. Integration Solution Advisory Methodology

Answer: D

Explanation:

The Integration Solution Advisory Methodology (ISA-M) is a framework that helps customers and partners to define their integration strategy, design the integration architecture, and document the integration solution.
ISA-M covers the entire integration lifecycle, from planning and scoping to testing and deployment. ISA-M is based on best practices and recommendations from SAP and industry experts. ISA-M supports different integration scenarios, such as cloud-to-cloud, cloud-to-on-premise, and hybrid integration. ISA-M also provides tools and templates to facilitate the integration process, such as the Integration Assessment Questionnaire, the Integration Architecture Document, and the Integration Test Plan. References = SAP S
/4HANA Cloud, Public Edition - All Learning Journeys > Implementing SAP S/4HANA Cloud Public Edition > Unit 2: Integration Strategy and Architecture > Topic 2.1: Introduction to Integration Solution Advisory Methodology (ISA-M)

NEW QUESTION # 53

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note:
There are 2 correct answers to this question.

- A. Use the Test system to demonstrate SAP Best Practice processes.
- B. Conduct the Fit-to-Standard analysis to gather configuration values.
- C. Define the organizational structure and chart of accounts.
- D. Conduct the Digital Discovery Assessment to identify extension requirements.

Answer: A,B

Explanation:

Based on the SAP Activate methodology, the Explore phase is where consultants configure business processes based on the information gathered in the Fit-to-Standard workshops. The Fit-to-Standard analysis is conducted in a series of workshops and allows for validation of predefined scenarios agreed upon and to make room for enhancements or additional configuration required.
To prepare for this workshop, it is recommended that teams get familiar with the SAP Best Practices content, including the process flows, test scripts with sample data, and other documentation available in SAP Best Practices Explorer. Consultants should also use the Test system to demonstrate SAP Best Practice processes and enable business users to run the end-to-end processes and identify any gaps. The other two activities, conducting the Digital Discovery Assessment and defining the organizational structure and chart of accounts, are part of the Prepare phase, not the Explore phase. References = SAP Activate - Explore Phase: Use Fit-to-Standard to confirm business process fit and identify gaps in your SAP S/4HANA Cloud Implementation, SAP Explore Phase Activities: Define Target BP and Architecture, SAP Activate Elements and Phases, Explaining the Explore Phase

NEW QUESTION # 54

......
