If you also want to pass the test on your first sitting, use our Cisco 100-160 updated dumps.

## Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q325-Q330):

### NEW QUESTION # 325

Which of the following threat intelligence techniques involves monitoring network traffic and analyzing abnormal patterns or behaviors?

- A. Anomaly-based Detection
- B. Signature-based Detection
- C. Indicators of Compromise (IoCs)
- D. Reputation-based Detection

**Answer: A**

Explanation:

Anomaly-based detection involves monitoring network traffic and comparing it against baseline or normal behavior. It looks for any abnormal patterns or behaviors that could indicate potential threats.

#### NEW QUESTION # 326

Which of the following best describes risks in the context of cybersecurity?

- A. The extent to which vulnerabilities can be exploited
- B. The process of identifying and assessing potential threats to an organization's security
- C. The likelihood of a cybersecurity incident occurring
- D. Potential losses or negative impacts associated with cybersecurity threats and vulnerabilities

**Answer: D**

Explanation:

Risks in the context of cybersecurity refer to potential losses or negative impacts that can be caused by cybersecurity threats and vulnerabilities. These risks encompass various aspects such as financial losses, reputational damage, operational disruptions, or compromise of sensitive data. Understanding and managing risks is crucial in developing effective cybersecurity strategies to protect an organization's assets and ensure business continuity.

#### NEW QUESTION # 327

During the incident handling process, what is the main purpose of conducting a post-incident analysis?

- A. Assessing the overall effectiveness of the incident response plan
- B. Restoring all affected systems to their pre-incident state
- C. Identifying the individuals responsible for the incident
- D. Providing management with a summary of the incident

**Answer: A**

Explanation:

Conducting a post-incident analysis serves the purpose of assessing the overall effectiveness of the incident response plan. It helps identify any weaknesses or areas for improvement in the plan. While identifying responsible individuals, restoring affected systems, and providing management summaries are important aspects, the primary focus of a post-incident analysis is to evaluate and enhance future incident response efforts.

#### NEW QUESTION # 328

What is an Advanced Persistent Threat (APT)?

- A. A cyberattack that compromises multiple devices simultaneously.
- B. A sophisticated and targeted attack that aims to gain unauthorized access and maintain persistence over a long period.
- C. A type of malware that spreads rapidly through a network.
- D. A vulnerability in network communication protocols.

**Answer: B**

Explanation:

Advanced Persistent Threats (APTs) are stealthy and prolonged attacks targeted at specific organizations or entities. APTs typically employ sophisticated techniques, including social engineering and zero-day exploits. The primary objectives of APTs are to gain unauthorized access, maintain persistence within the target network or system, and conduct reconnaissance or exfiltrate sensitive data without being detected for an extended period of time.

#### NEW QUESTION # 329

Which of the following best describes the concept of automation in cybersecurity testing?

- A. Performing physical tests on network infrastructure
- B. Conducting manual security tests

- C. Implementing security controls to prevent attacks
- D. Using software and tools to automatically conduct security tests

**Answer: D**

Explanation:

Automation in cybersecurity testing involves using software and tools to automatically conduct security tests. This approach helps to increase efficiency and accuracy by automating repetitive tasks, such as vulnerability scanning, penetration testing, and log analysis. It allows for the identification of security issues and vulnerabilities in a timely manner.

## NEW QUESTION # 330
