

Dumps JN0-650 PDF, JN0-650 Reliable Test Braindumps

Pass Juniper JN0-650 Exam | Latest JN0-650 Dumps & Practice Exams - Cert007

1. You are configuring BGP within your network and are deploying route reflectors. Which two statements are true? (Choose two.)
- A. The cluster ID is configured on the clients.
 - B. The cluster ID is configured on the route reflectors.
 - C. Routes received by a client are advertised to clients and non-clients.
 - D. Routes received by a route reflector from a client are advertised to all IBGP peers.
- Answer: BD**

2. Click the Exhibit button.

Which well-known community needs to be used to restrict 10.0.0.0/8 from being advertised to AS 2?

- A. no-publish
 - B. no-advertise
 - C. no-export-subconfed
 - D. no-export
- Answer: D**

3. Referring to the exhibit

2026 Latest Test4Engine JN0-650 PDF Dumps and JN0-650 Exam Engine Free Share: https://drive.google.com/open?id=174EDXdvlkXXsmslXDl5Li49wB_bNVzoQ

Try our best to get the related JN0-650 certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many JN0-650 preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves. We would like to help you out with the JN0-650 Training Materials compiled by our company. There are so many strong points of our JN0-650 training materials, you will be bound to pass the JN0-650 exam with high scores.

Before making a final purchase decision, customers of Test4Engine can download a free demo to test the validity of the Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) exam questions we offer. If the JN0-650 certification test's topics change after you have purchased our JN0-650 Dumps, we will provide you with free updates for up to 365 days. We guarantee the authenticity of our test questions and pledge to help you prepare for Juniper JN0-650 exam quickly and cost-effectively.

JN0-650 Reliable Test Braindumps & JN0-650 Test Sample Questions

Our purchasing process is designed by the most professional experts, that's the reason why we can secure your privacy while purchasing our JN0-650 test guide. As the employment situation becoming more and more rigorous, it's necessary for people to acquire more JN0-650 skills and knowledge when they are looking for a job. Enterprises and institutions often raise high

acquisition for massive candidates, and aim to get the best quality talents. Thus a high-quality JN0-650 Certification will be an outstanding advantage, especially for the employees, which may double your salary, get you a promotion. So choose us, choose a brighter future.

Juniper Enterprise Routing and Switching, Professional (JNCIP-ENT) Sample Questions (Q48-Q53):

NEW QUESTION # 48

You are adding a new QFX Series switch to an EVPN-VXLAN IP fabric.
In this scenario, which two statements are correct? (Choose two.)

- A. The loopback interface must be advertised using the BGP protocol.
- **B. The family evpn signaling address family is configured under the BGP protocol.**
- C. The family vpls signaling address family is configured under the BGP protocol.
- **D. The encapsulation vxlan setting is configured under the protocols evpn hierarchy.**

Answer: B,D

Explanation:

When integrating a QFX Series switch into an EVPN-VXLAN IP fabric, specific BGP and EVPN hierarchy configurations are required to establish the control and data planes:

* EVPN Encapsulation (Option A): In Junos OS, the encapsulation vxlan statement must be explicitly configured under the protocols evpn hierarchy. This defines that the EVPN control plane will use VXLAN as the data plane encapsulation method rather than MPLS.

* BGP Address Family (Option C): EVPN uses Multiprotocol BGP (MP-BGP) to distribute reachability information. For the control plane to function, you must enable the EVPN signaling address family under the BGP protocol using the command `set protocols bgp group <name> family evpn signaling`.

* Incorrect Options: Option B is incorrect because family vpls is used for traditional VPLS signaled by BGP, not for EVPN-VXLAN. Option D is incorrect because while the loopback interface must be reachable, it is typically advertised via an IGP (like OSPF or IS-IS) to provide the underlay connectivity that BGP then rides upon; BGP itself does not "advertise" the loopback to establish the initial peerings.

NEW QUESTION # 49

Referring to Spanning Tree Protocol, what is the function of Root Protection?

- A. It sets a maximum BPDU threshold on the root bridge.
- B. It designates which ports are allowed to communicate with the root bridge.
- **C. It places a port into blocking state if a superior BPDU is received on that port.**
- D. It identifies the true root bridge in a spanning tree domain.

Answer: C

NEW QUESTION # 50

Which two statements correctly describe how EX Series switches use captive portal for Layer 2 authentication? (Choose two.)

- **A. The captive portal is used as a fallback mechanism for clients that fail 802.1X or MAC RADIUS authentication.**
- **B. The captive portal authentication allowlist works for devices that do not have HTTP capabilities.**
- C. The captive portal is configured on Layer 3 interfaces and does not participate in Layer 2 authentication on EX Series switches.
- D. The captive portal is the default Layer 2 authentication method that is applied before other methods such as 802.1X or MAC RADIUS.

Answer: A,B

Explanation:

In Junos OS 24.4, Captive Portal is used as a web-based authentication method for Layer 2 network access control, often in environments where 802.1X is not feasible for all users.

* Fallback Mechanism (Option D): On EX Series switches, Juniper supports a flexible authentication order. By default, the switch attempts authentication in the order of 802.1X, then MAC RADIUS, and finally Captive Portal. If a client fails both 802.1X and

MAC RADIUS, the switch can fall back to Captive Portal to redirect the user to a login page.

* MAC Allowlist (Option B):Captive Portal relies on intercepting HTTP/HTTPS traffic to redirect users.

However, "headless" devices like printers or cameras lack web browsers and cannot interact with the portal. To accommodate these, Junos allows administrators to configure an authentication allowlist (or whitelist), which identifies these devices by their MAC addresses and permits them to bypass the portal entirely.

* Precedence (Option A):This is incorrect because Captive Portal is generally the last method in the default sequence, not the first.

* Layer 2 Participation (Option C):While Captive Portal requires a Layer 3 interface (RVI/IRB) for the redirection process, it is explicitly used to control Layer 2 access on EX Series switches.

NEW QUESTION # 51

In a Junos device, which statement is correct for configuring a Level 1 IS-IS router?

- A. set protocols isis interface ge-0/0/0.0 level 1
- B. set protocols isis level 1 disable
- C. set protocols isis level 2 wide-metrics-only
- D. set protocols isis level 1 wide-metrics-only

Answer: A

NEW QUESTION # 52

Which statement is true regarding multifield classification?

- A. It is applied through class of service.
- B. It is applied with stateless firewall filters.
- C. It is applied through stateful firewall rules.
- D. It is applied with routing policy.

Answer: B

NEW QUESTION # 53

.....

It is similar to the JN0-650 desktop-based software, with all the elements of the desktop practice exam. This mock exam can be accessed from any browser and does not require installation. The Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) questions in the mock test are the same as those in the real exam. And candidates will be able to take the web-based Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) practice test immediately through any operating system and browsers.

JN0-650 Reliable Test Braindumps: https://www.test4engine.com/JN0-650_exam-latest-braindumps.html

Juniper Dumps JN0-650 PDF It carries all subjects related question answers and with best possible instructions, Our JN0-650 pdf vce contains all the necessary knowledge which you will need in exam preparation to guarantee you JN0-650 pass test, Juniper Dumps JN0-650 PDF Simplilearn is one of the world's leading certification training providers, So it is naturally that you need some demo for our Juniper JN0-650 pass4sure dumps.

Known intrusive activity, Block Specific Content, JN0-650 It carries all subjects related question answers and with best possible instructions, Our JN0-650 PDF VCE contains all the necessary knowledge which you will need in exam preparation to guarantee you JN0-650 pass test.

Latest Enterprise Routing and Switching, Professional (JNCIP-ENT) exam pdf, JN0-650 practice exam

Simplilearn is one of the world's leading certification training providers, So it is naturally that you need some demo for our Juniper JN0-650 pass4sure dumps.

And to guarantee you get the Juniper JN0-650 test guide, it takes e-mail as the delivery manner which makes you able to get relevant documents within ten minutes.
