As you know, getting a Cloud-Digital-Leader certificate is helpful to your career development. At the same time, investing money on improving yourself is sensible. We sincerely hope that you can choose our Cloud-Digital-Leader study guide. As the best Cloud-Digital-Leader study questions in the world, you won't regret to have them!

Google Cloud Digital Leader Sample Questions (Q27-Q32):

NEW QUESTION # 27
An organization's public cloud provider failed to meet their SLA of 99.99% availability.
What is the potential impact on the organization?

- A. All data stored in their database could be unexpectedly lost.
- B. Unexpected downtime could risk the loss of customers.
- C. The organization risks using up their error budget.
- D. Renegotiation of the SLA to put less emphasis on uptime could be necessary.

Answer: B

NEW QUESTION # 28
Your organization is developing an application that will manage payments and online bank accounts located around the world. The most critical requirement for your database is that each transaction is handled consistently. Your organization anticipates almost unlimited growth in the amount of data stored.
Which Google Cloud product should your organization choose?

- A. Cloud SQL
- B. Firestore
- C. Cloud Storage
- D. Cloud Spanner

Answer: D

Explanation:
Features of Cloud Spanner

NEW QUESTION # 29
What is a benefit of the OpEx model for cloud security?

- A. Organizations do not need to make upfront capital investments in cloud security.
- B. Organizations can deploy custom security hardware.
- C. Organizations do not need to configure any security settings for cloud resources.
- D. The cloud provider guarantees security.

Answer: A

Explanation:
The correct answer is B. Organizations do not need to make upfront capital investments in cloud security
. Here's why:
* Context of the Question: The question asks about the benefits of the operational expenditure (OpEx) model for cloud security.
* Google Cloud Product Relevance:
* The OpEx model involves paying for cloud resources and services on a pay-as-you-go basis, avoiding the need for large upfront capital expenditures (CapEx) for security hardware or software.
* In the cloud, security services (such as firewalls, encryption, and monitoring tools) are provided as managed services, which organizations can subscribe to and pay for based on usage. This model allows for more flexibility and scalability in managing security

needs and costs.
* Why Not Other Options:
* A. Organizations can deploy custom security hardware: In the cloud, most security needs are met through managed services rather than deploying custom hardware.
* C. Organizations do not need to configure any security settings for cloud resources: This is incorrect, as organizations are responsible for configuring security settings for their applications and data.
* D. The cloud provider guarantees security: The cloud provider guarantees the security of the infrastructure, but the customer is responsible for securing their applications, data, and access controls.
Google Cloud Digital Leader References:
* Refer to Google Cloud's shared responsibility model documentation for more information on OpEx benefits for cloud security.

NEW QUESTION # 30

You have contracted a partner to conduct some medical trials. This is a limited, 2-month contract. At the end of each day, you are expecting about 10 Gbs of dat a. The data is highly sensitive. What networking option would you employ?

- **A. Setup Cloud VPN and create an IPsec VPN tunnel with your partner.**
- B. Create a public IP for a VM and share that with your partners so that they can access it over the internet and share the data.
- C. Setup Dedicated Interconnect with your partner.
- D. As the name indicates, set up Partner Interconnect with your partner company.

Answer: A

Explanation:
"Cloud VPN securely extends your peer network to Google's network through an IPsec VPN tunnel. Traffic is encrypted and travels between the two networks over the public internet. Cloud VPN is useful for low-volume data connections. For additional connection options, see the Hybrid Connectivity product page."

NEW QUESTION # 31

Your organization needs to process large amounts of data from an online application that operates continuously. You do not want to be required to provision infrastructure or create server clusters. What should your organization choose?

- **A. Dataflow**
- B. Google Kubernetes Engine with Cloud Bigtable
- C. Dataproc
- D. Compute Engine with BigQuery

Answer: A

Explanation:
Explanation
You do not want to be required to provision infrastructure or create server clusters. Because Unified stream and batch data processing that's serverless, fast, and cost-effective.
