However, with the help of DumpsQuestion CRT-450 Dumps PDF, you can do this job easily and nicely.

Salesforce Certified Platform Developer I Sample Questions (Q129-Q134):

NEW QUESTION # 129

A company decides to implement a new process where every time an Opportunity is created, a follow up Task should be created and assigned to the Opportunity Owner.

What is the most efficient way for a developer to implement this?

- A. Apex trigger on Task
- B. Auto-launched flow on Task
- C. Record-triggered flow on Opportunity
- D. Task actions

Answer: A

NEW QUESTION # 130

Which three data types can a SOQL query return? Choose 3 answers

- A. Long

- B. Integer
- C. List
- D. sObject

Answer: B,C,D

NEW QUESTION # 131

A company has been adding data to Salesforce and has not done a good job of limiting the creation of duplicate Lead records. The developer is considering writing an Apex process to identify duplicates and merge the records together.

Which two statements are valid considerations when using merged? Choose 2 answers

- A. The merge method allows up to three records, including the master and two additional records with the same sObject type, to be merged into the master record.
- B. Merge is supported with accounts, contacts, cases, and leads.
- C. The field values on the master record are overwritten by the records being merged.
- D. External ID fields can be used with the merge method.

Answer: A,B

NEW QUESTION # 132

In terms of the MVC paradigm, what are two advantages of implementing the view layer of a Salesforce application using Lightning Web Component-based development over Visualforce?

Choose 2 answers

- A. Log capturing via the Debug Logs Setup page
- B. Rich component ecosystem
- C. Self-contained and reusable units of an application
- D. Built-in standard and custom set controllers

Answer: B,C

Explanation:

Advantages of Lightning Web Components (LWC):

A: Rich component ecosystem:

LWCs have a modern, rich component library designed for modular and reusable development.

D: Self-contained and reusable units:

LWCs are designed to be modular, reusable, and self-contained, reducing duplication and enhancing maintainability.

Why Not Other Options?

B: Log capturing via Debug Logs Setup page: This is unrelated to LWC and is a debugging feature.

C: Built-in standard and custom set controllers: Relevant to Visualforce, not LWCs.

References: LWC Documentation: <https://developer.salesforce.com/docs/component-library/documentation/en/lwc>

NEW QUESTION # 133

A custom picklist field, Food_Preference__c, exist on a custom object. The picklist contains the following options:

'Vegan','Kosher','No Preference'. The developer must ensure a value is populated every time a record is created or updated. What is the most efficient way to ensure a value is selected every time a record is saved?

- A. Mark the field as Required on the field definition.
- B. Mark the field as Required on the object's page layout.
- C. Set "Use the first value in the list as the default value" as True.
- D. Set a validation rule to enforce a value is selected.

Answer: A

Explanation:

Marking the field as Required on the field definition ensures that the field cannot be left blank or null when a record is created or updated, regardless of the page layout or the API. This is the most efficient way to enforce a value for the picklist field, as it does not require any additional configuration or code. Setting the first value as the default value does not prevent the user from changing or
