完成的156-587下載 & 保證CheckPoint 156-587考試成功 & 高質量的最新156-587題庫資訊

為了讓你可以確認156-587考古題的品質, 以及你是不是適合這個考古題, KaoGuTi的156-587考古題的兩種版本都提供免費的部分下載。我們將一部分的156-587試題免費提供給你, 你可以在KaoGuTi的網站上搜索下載。體驗過之後再購買, 這樣可以避免你因為不知道資料的品質而盲目購買以後覺得後悔這樣的事情。

CheckPoint 156-587 考試大綱:

主題	簡介
主題 1	Introduction to Advanced Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and covers the foundational concepts of advanced troubleshooting techniques. It introduces candidates to various methodologies and approaches used to identify and resolve complex issues in network environments.
主題 2	Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively.
主題 3	Advanced Management Server Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and focuses on troubleshooting management servers. It emphasizes understanding server architecture and diagnosing problems related to server performance and connectivity.
主題 4	Advanced Client-to-Site VPN Troubleshooting: This section of the exam measures the skills of CheckPoint System Administrators and focuses on troubleshooting client-to-site VPN issues.

- Advanced Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and covers troubleshooting site-to-site VPN connections.

最新的 CCTE 156-587 免費考試真題 (Q81-Q86):

問題 #81

What are the three main component of Identity Awareness?

- A. User, Active Directory and Access Role
- **B. Identity Source, Identity Server (PDP) and Identity Enforcement (PEP)**
- C. Client, SMS and Secure Gateway
- D. Identity Awareness Blade on Security Gateway, User Database on Security Management Server and Active Directory

答案: B

問題 #82

SmartEvent utilizes the Log Server, Correlation Unit and SmartEvent Server to aggregate logs and identify security events. The three main processes that govern these SmartEvent components are:

- A. eventiasv, eventiarp, eventiacu
- B. cpcu, cplog, cpse
- **C. cpsemd, cpsead, and DBSync**
- D. fwd, secu, sesrv

答案: C

問題 #83

Which of the following commands can be used to see the list of processes monitored by the Watch Dog process?

- A. ps -ef| grep watchd
- **B. cpwd_admin list**
- C. fw ctl get str watchdog
- D. cpstat fw -f watchdog

答案: B

解題說明:

To see the list of processes monitored by the WatchDog process (CPWD), you use the cpwd_admin list command.

* Option A (cpstat fw -f watchdog): Shows firewall status and statistics for the "fw" context, not necessarily the list of monitored processes.

* Option B (fw ctl get str watchdog): Not a valid parameter for retrieving the list of monitored processes; "fw ctl" deals with kernel parameters.

* Option C (cpwd_admin list): Correct command that lists all processes monitored by CPWD, their status, and how many times they have been restarted.

* Option D (ps -ef| grep watchd): This will list any running process that matches the string "watchd" but will not specifically detail which processes are being monitored by CPWD.

Therefore, the best answer is cpwd_admin list.

Check Point Troubleshooting References

* sk97638: Explains Check Point WatchDog (CPWD) usage and the cpwd_admin utility.

* R81.20 CLI Reference Guide: Describes common troubleshooting commands including cpwd_admin list.

* Check Point Gaia Administration Guide: Provides instructions for monitoring system processes and verifying CPWD.

問題 #84

The management configuration stored in the Postgres database is partitioned into several relational database domains. What is the purpose of the Global Domain?

- A. This domain is used as the global database to track the changes made by multiple administrators on the same objects prior to publishing.
- **B. This domain is used as the global database for MDSM and contains global objects and policies.**
- C. This domain is used as the global database to back up the objects referencing the corresponding object attributes from the System Domain.
- D. Global Domains is used by the IPS software blade to map the IDs to the corresponding countries according to the IpToCountry.csv file.

答案： B

解題說明：

The Global Domain is one of the relational database domains in the Postgres database that stores the management configuration. The purpose of the Global Domain is to serve as the global database for Multi- Domain Security Management (MDSM) and contain the global objects and policies that are shared across all domains. The Global Domain also stores the global settings, such as the administrator roles, the LDAP servers, the IPS profiles, and the SmartEvent views. The Global Domain can be managed by the Global Domain Administrator or the Super User Administrator using the SmartConsole. The Global Domain can be backed up and restored using the mds_backup and mds_restore commands.

問題 #85

If SmartLog is not active or failed to parse results from server, what commands can be run to re- enable the service?

- A. smartloginit and smartlogstop
- **B. smartlogrestart and smartlogstart**
- C. smartlogstart and smartlogstop
- D. smartlogstart and smartlogsetup

答案： B

問題 #86

.....

KaoGuTi就是一個能使CheckPoint 156-587認證考試的通過率提高的一個網站。KaoGuTi的資深IT專家在不斷研究出各種成功通過CheckPoint 156-587認證考試的方案，他們的研究成果可以100%保證一次性通過CheckPoint 156-587 認證考試。。KaoGuTi提供的培訓工具是很有效的，有很多已經通過了一些IT認證考試的人就是用了KaoGuTi提供的練習題和答案，其中也有通過CheckPoint 156-587認證考試，他們也是利用的KaoGuTi提供的便利。選擇KaoGuTi就選擇了成功。
