ASIS-PSP certification is ideal for security professionals who are responsible for managing physical security programs for organizations. Individuals seeking this certification are required to understand the various components of physical security, including access control, security alarm systems, security lighting, perimeter security, security force management, security investigations, and emergency and crisis management. Physical Security Professional Exam certification process includes a rigorous examination that tests the candidate's knowledge and application of these concepts.

ASIS-PSP (Physical Security Professional) Exam is a certification exam offered by the American Society for Industrial Security (ASIS). It is designed to test the knowledge and skills of individuals who are involved in physical security management. ASIS-PSP Exam covers a wide range of topics, including risk assessment, security design, security operations, and emergency management.

ASIS Physical Security Professional Exam Sample Questions (Q178-Q183):

NEW QUESTION # 178

A system of discussion groups in which individual articles are distributed throughout the world is called:

- A. Telnet
- **B. Usenet**
- C. Web net
- D. Widespread net

Answer: B

NEW QUESTION # 179

What refers to the number of employees over which any individual can exercise direct supervision effectively?

- **A. Span of control**
- B. Corporate period
- C. None of the above
- D. Delegate control

Answer: A

Explanation:

Span of control refers to the number of subordinates or direct reports that a manager or supervisor can effectively oversee. A narrower span (fewer direct reports) typically allows for closer supervision, while a wider span may require more autonomy among subordinates.

In security management, span of control helps determine appropriate team structures and resource allocation, especially in large-scale operations.

NEW QUESTION # 180

The degree to which a manager or supervisor is able to delegate responsibility rather than trying to do everything personally is a good measure of managerial ability.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 181

In lens selection, the most important factor in determining the relative magnification of an object is the:

- **A. Focal length**
- B. Lens format
- C. Image format
- D. Image device

Answer: A

Explanation:

Focal length is the primary factor in determining the magnification and field of view in a camera lens. A longer focal length results in a narrower field of view and greater magnification of distant objects.

Conversely, a shorter focal length gives a wider field of view with less magnification.

A (Image device) and B/C (Lens or image format) influence compatibility and image quality, but do not directly affect magnification.

NEW QUESTION # 182

_____ builds on confusion when two or more people take advantage of their positions and the confusion to steal.

- A. Conspiracy
- B. Proliferation
- C. Accountability
- D. Invoicing

Answer: A

Explanation:

Conspiracy in the context of theft or fraud refers to two or more individuals collaborating-often using confusion or chaos in the environment-to execute or conceal a theft. This is especially common in employee- customer collusion or multi-person theft scenarios.

Accountability (B) reduces confusion.

Invoicing (C) is a documentation process.

Proliferation (D) means rapid increase, not relevant here.
