100% Pass Quiz 2026 APMG-International Efficient ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam Valid Mock Test

For APMG-International aspirants wishing to clear the APMG-International test and become a ISO/IEC 27001 (2022) Foundation Exam certification holder, VCETorrent APMG-International ISO-IEC-27001-Foundation practice material is an excellent resource. By preparing with VCETorrent actual APMG-International ISO-IEC-27001-Foundation Exam Questions, you can take get success on first attempt and take an important step toward accelerating your career. Download updated ISO-IEC-27001-Foundation exam questions today and start preparation.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Auditors who audit each area of operation
- B. Management responsible for each area of operation
- C. Top management of the organization
- D. ISO/IEC 27001 practitioners within the organization

Answer: C

Explanation:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

NEW QUESTION # 18

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Maintain contact with legal authorities
- B. Regular review of contractual compliance
- C. Regular review of compliance
- D. Return assets to their legal owners

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls

(Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

NEW QUESTION # 19

Which statement about the conduct of audits is true?

- A. One of the focus areas for a surveillance audit is the output from internal audits and management reviews
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- D. Third party audits are conducted by a customer of the organization

Answer: A

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

NEW QUESTION # 20

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Effectiveness
- B. Importance
- C. Suitability
- D. Adequacy

Answer: B

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 21

Which information is required to be included in the Statement of Applicability?

- A. The justification for including each information security control
- B. The scope and boundaries of the ISMS
- C. The criteria against which risk will be evaluated
- D. The risk assessment approach of the organization

Answer: A

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 22

.....

Before and after our clients purchase our ISO-IEC-27001-Foundation quiz prep we provide the considerate online customer service. The clients can ask the price, version and content of our ISO-IEC-27001-Foundation exam practice guide before the purchase. They can consult how to use our software, the functions of our ISO-IEC-27001-Foundation Quiz prep, the problems occur during in the process of using our ISO-IEC-27001-Foundation study materials and the refund issue. Our online customer service personnel will reply their questions about the ISO-IEC-27001-Foundation exam practice guide and solve their problems patiently and passionately.
