Perhaps you still have doubts about our H13-624\_V5.5 study tool. You can contact other buyers to confirm. Our company always regards quality as the most important things. The pursuit of quantity is meaningless. Our company positively accepts annual official quality inspection. All of our H13-624\_V5.5 real exam dumps have passed the official inspection every year. Our study materials are completely reliable and responsible for all customers. The development process of our study materials is strict. We will never carry out the H13-624\_V5.5 Real Exam dumps that are under researching. All H13-624\_V5.5 study tool that can be sold to customers are mature products. We are not chasing for enormous economic benefits. As for a company, we are willing to assume more social responsibility.

## Huawei H13-624\_V5.5 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Storage System O&amp;M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&amp;M tools.</li> </ul>

## Pass Guaranteed Quiz Newest Huawei - Test H13-624\_V5.5 Practice

This is similar to the H13-624\_V5.5 desktop format but this is browser-based. It requires an active internet connection to run and is compatible with all browsers such as Google Chrome, Mozilla Firefox, Opera, MS Edge, Safari, Internet Explorer, and others. The Huawei H13-624\_V5.5 Mock Exam helps you self-evaluate your Huawei H13-624\_V5.5 exam preparation and mistakes. This way you improve consistently and attempt the H13-624\_V5.5 certification exam in an optimal way for excellent results in the exam.

### Huawei HCIP-Storage V5.5 Sample Questions (Q33-Q38):

#### NEW QUESTION # 33

In Huawei all-flash storage, the SmartDedupe and SmartCompression features reduce redundant data space consumption and improve the transmission and storage efficiency of a storage system. Which of the following statements about the features is false?

- A. During inline deduplication, the system divides data into blocks and then calculates fingerprints for the blocks.
- B. Backup storage supports deduplication and compression of file systems.
- C. Post-process compression means that data is first written to storage media and then read for compression.
- D. During similarity-based deduplication in the background, the system does not divide data into blocks and can directly calculate similar fingerprints.**

**Answer: D**

Explanation:

SmartDedupe and SmartCompression are data reduction technologies in Huawei all-flash storage systems, such as OceanStor Dorado. The \*HCIP-Storage V5.5 Training Material (Module 2: Flash Storage Technologies)\* provides details:

- Option A: True. The material states: "Post-process compression involves writing data to storage media first, then reading it back for compression during idle periods."
- Option B: True. The material confirms: "Inline deduplication divides data into blocks and calculates fingerprints to identify duplicates before writing."
- Option C: False. The material clarifies: "Similarity-based deduplication, whether inline or background, requires dividing data into blocks to calculate fingerprints for similarity detection. Direct calculation without block division is not supported." This makes the statement incorrect.
- Option D: True. The material notes: "Backup storage supports deduplication and compression for file systems to optimize space

usage." Thus, option C is false.

#### NEW QUESTION # 34

The Huawei SmartCache feature is to form a smart cache pool of SSD disks, and divide the smart cache pool into multiple partitions.

District, different businesses cannot share districts to ensure business independence

- A. True
- B. False

**Answer: B**

#### NEW QUESTION # 35

Single-choice Huawei oceanstor 9000, the client processing the write request will fragment the data according to the protection level specified by the file. The data piece is written to the power-saving memory on the corresponding node, and the check data piece is calculated by each node and written to each node.

Power-saving memory, after all nodes write into power-saving memory successfully, this write operation is successful.

- A. True
- B. wrong

**Answer: B**

#### NEW QUESTION # 36

The InfoTier feature stores files in different classifications according to the difference of file attributes. Which options are not the basic list that constitutes a classification?

Bit()

- A. Node pool
- B. Disk domain
- C. Disk Group
- D. Storage pool

**Answer: B,D**

#### NEW QUESTION # 37

In the feature of Huawei Oceanstor 9000InfoReplicator. Pair is a data replication relationship, which describes data replication. The source and destination of the, the following statement about the state transition of the Pair is incorrect (multiple choice)

- A. When the InfoReplicator configuration is destroyed, the status of the Pair becomes "Invalid"
- B. In the case of Pair failure, its status includes recovery, invalidation, synchronization, split
- C. When the abnormal link recovers and the recovery strategy is manual, the status of the Pair will be migrated to "synchronizing"

**Answer: A,B,C**

#### NEW QUESTION # 38

.....

Do you want to obtain your certificate as quickly as possible? If you do, just choose us. You can get your downloading link within

ten minutes after your payment for H13-624\_V5.5 training materials, and you can start your learning as quickly as possible. In addition, H13-624\_V5.5 training materials of us are high quality, and you just need to spend 48 to 72 hours on practicing, and you can pass the exam successfully. If you have any questions about the H13-624\_V5.5 Exam Dumps, just contact us, we will give you reply as soon as possible.
