## Specifications of Desktop Microsoft DP-600 Practice Exam Software

DP-600 pdf dumps carry real Implementing Analytics Solutions Using Microsoft Fabric (DP-600) exam questions which are printable. It means candidates can take printed actual questions to any place. Furthermore, the Implementing Analytics Solutions Using Microsoft Fabric (DP-600) PDF dumps format is also portable. Therefore, you can access this valid Microsoft DP-600 questions PDF document on tablets, smartphones, and laptops.

## Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q30-Q35):

### NEW QUESTION # 30

You have a Fabric tenant that contains a workspace named Workspace1 and a user named User1. Workspace1 contains a warehouse named DW1.

You share DW1 with User1 and assign User1 the default permissions for DW1.

What can User1 do?

- A. Read data from the tables in DW1.
- **B. Build reports by using the default dataset.**
- C. Read the underlying Parquet files from OneLake.
- D. Connect to DW1 via the TDS (Tabular Data Stream) endpoint.

**Answer: B**

### NEW QUESTION # 31

You have a Fabric tenant that contains a lakehouse named Lakehouse1. Lakehouse1 contains a table named Nyctaxi\_raw. Nyctaxi\_raw contains the following columns.

You create a Fabric notebook and attach it to lakehouse1.

You need to use PySpark code to transform the data. The solution must meet the following requirements:

- \* Add a column named pickupDate that will contain only the date portion of pickupDateTime.
- \* Filter the DataFrame to include only rows where fareAmount is a positive number that is less than 100.

How should you complete the code? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

- \* Add the pickupDate column: `.withColumn("pickupDate", df["pickupDateTime"].cast("date"))`
- \* Filter the DataFrame: `.filter("fareAmount > 0 AND fareAmount < 100")`

In PySpark, you can add a new column to a DataFrame using the `.withColumn` method, where the first argument is the new column name and the second argument is the expression to generate the content of the new column. Here, we use the `.cast("date")` function to extract only the date part from a timestamp. To filter the DataFrame, you use the `.filter` method with a condition that selects rows where fareAmount is greater than 0 and less than 100, thus ensuring only positive values less than 100 are included.

### NEW QUESTION # 32

You have a Fabric tenant that contains a data warehouse.

You need to load rows into a large Type 2 slowly changing dimension (SCD). The solution must minimize resource usage. Which T-SQL statement should you use?

- A. TRUNCATE TABLE and INSERT
- B. CREATE TABLE AS SELECT
- C. MERGE
- D. UPDATE AND INSERT

**Answer: C**

Explanation:

Merge allow you to do :

- Insert new records for changes.
- Update existing records to mark them as historical.
- Maintain the history of changes efficiently.

### NEW QUESTION # 33

You need to create a DAX measure to calculate the average overall satisfaction score.

How should you complete the DAX code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

- \* The measure should use the AVERAGE function to calculate the average value.
- \* It should reference the Response Value column from the 'Survey' table.
- \* The 'Number of months' should be used to define the period for the average calculation.

To calculate the average overall satisfaction score using DAX, you would need to use the AVERAGE function on the response values related to satisfaction questions. The DATESINPERIOD function will help in calculating the rolling average over the last 12 months.

### NEW QUESTION # 34

You need to ensure that Contoso can use version control to meet the data analytics requirements and the general requirements.

What should you do?

- A. Modify the settings of the Research workspaces to use a GitHub repository.
- B. Store all the semantic models and reports in Microsoft OneDrive.
- C. Modify the settings of the Research division workspaces to use an Azure Repos repository.
- D. Store all the semantic models and reports in Data Lake Gen2 storage.

**Answer: A**

## NEW QUESTION # 35

.....

We can confidently say that Our DP-600 training quiz will help you. First of all, our company is constantly improving our products according to the needs of users. If you really want a learning product to help you, our DP-600 study materials are definitely your best choice, you can't find a product more perfect than it. Second, our DP-600 learning questions have really helped a lot of people. Looking at the experiences of these seniors, I believe that you will definitely be more determined to pass the DP-600 exam.

**Exam DP-600 Question:** <https://www.validvce.com/DP-600-exam-collection.html>

It is worthy for you to buy our DP-600 exam preparation not only because it can help you pass the exam successfully but also because it saves your time and energy, ValidVCE provides up-to-date actual Microsoft DP-600 questions and answers which will help you to pass your exam in first attempt, Our strong IT team can provide you the DP-600 exam software which is absolutely make you satisfied; what you do is only to download our free demo of DP-600 t have a try, and you can rest assured t purchase it.
