

# Pass Guaranteed 2026 Databricks Databricks-Certified-Professional-Data-Engineer: Pass-Sure Databricks Certified Professional Data Engineer Exam Test Study Guide

DOWNLOAD the newest ExamsLabs Databricks-Certified-Professional-Data-Engineer PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ONtgrg4F6cwX9ErWr4KVxsmpPQiWJoyx>

If you are remain an optimistic mind all the time when you are preparing for the Databricks-Certified-Professional-Data-Engineer exam, we deeply believe that it will be very easy for you to successfully pass the Databricks-Certified-Professional-Data-Engineer exam, and get the related Databricks-Certified-Professional-Data-Engineer certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. As is known to us, where there is a will, there is a way. We believe you will get wonderful results with the help of our Databricks-Certified-Professional-Data-Engineer Exam Questions as we have been professional in this field.

Databricks Certified Professional Data Engineer exam is designed to test a candidate's knowledge and skills in building, designing, and managing data pipelines on the Databricks platform. Databricks-Certified-Professional-Data-Engineer Exam covers a range of topics, including data processing, data storage, data warehousing, data modeling, and data architecture. Candidates are expected to have a deep understanding of these topics and be able to apply them in real-world scenarios.

## Smoothly Prepare By Using The Databricks Databricks-Certified-Professional-Data-Engineer Practice Test

If you are looking to advance in the fast-paced and technological world, ExamsLabs is here to help you achieve this aim. ExamsLabs provides you with the excellent Databricks Databricks-Certified-Professional-Data-Engineer practice exam, which will make your dream come true of passing the Databricks Certified Professional Data Engineer Exam certification exam on the first attempt.

## Databricks Certified Professional Data Engineer Exam Sample Questions (Q166-Q171):

### NEW QUESTION # 166

You are asked to debug a databricks job that is taking too long to run on Sunday's, what are the steps you are going to take to identify the step that is taking longer to run?

- A. Under Workflow UI and jobs select job you want to monitor and select the run, notebook activity can be viewed.
- B. Once a job is launched, you cannot access the job's notebook activity.
- C. A notebook activity of job run is only visible when using all-purpose cluster.
- D. Enable debug mode in the Jobs to see the output activity of a job, output should be available to view.

- E. Use the compute's spark UI to monitor the job activity.

**Answer: A**

Explanation:

Explanation

The answer is, Under Workflow UI and jobs select job you want to monitor and select the run, notebook activity can be viewed. You have the ability to view current active runs or completed runs, once you click the run you can see the A picture containing graphical user interface Description automatically generated

Workflow > Jobs > run\_process\_all >

run\_process\_all

Runs

Active runs

Start time	Run ID	Launched	Duration	Status	Actions
Aug 15 2022, 1:09 AM EDT	17020	Manually	1m 6s	Running	

Completed runs (past 60 days)

Latest successful run (refreshes automatically)

Start time	Run ID	Launched	Duration	Status	Actions
Aug 15 2022, 1:03 AM EDT	14596	Manually	4m 19s	Succeeded	

**databricks**

Click on the run to view the notebook output

Graphical user interface, text, application, email Description automatically generated

Workflows > Jobs > run\_process\_all > Run 17020 > accounting >

**accounting run**      Original (latest) · Succeeded

## Output

```
from time import sleep

dbutils.widgets.text("param1", "default")
param1 = dbutils.widgets.get("param1")
sleep(20)
dbutils.notebook.exit(f"param1 passed as {param1}")
```

Notebook exited: param1 passed as default

Command took 20.41 seconds

## NEW QUESTION # 167

An analytics team wants to run a short-term experiment in Databricks SQL on the customer transactions Delta table (about 20 billion records) created by the data engineering team. Which strategy should the data engineering team use to ensure minimal downtime and no impact on the ongoing ETL processes?

- A. Create a new table for the analytics team using a CTAS statement.
- B. Deep clone the table for the analytics team
- C. Give the analytics team direct access to the production table.
- D. Shallow clone the table for the analytics team

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Exact extract: "A shallow clone creates a copy of the metadata that references the source data files; it is fast and inexpensive." Exact extract: "A deep clone copies the data." Exact extract: "Clones provide a point-in-time snapshot for experimentation without impacting the source."

**NEW QUESTION # 168**

Two junior data engineers are authoring separate parts of a single data pipeline notebook. They are working on separate Git branches so they can pair program on the same notebook simultaneously. A senior data engineer experienced in Databricks suggests there is a better alternative for this type of collaboration.

Which of the following supports the senior data engineer's claim?

- A. Databricks Notebooks support commenting and notification comments
- B. Databricks Notebooks support the creation of interactive data visualizations
- **C. Databricks Notebooks support real-time co-authoring on a single notebook**
- D. Databricks Notebooks support automatic change-tracking and versioning
- E. Databricks Notebooks support the use of multiple languages in the same notebook

**Answer: C****NEW QUESTION # 169**

A data architect has designed a system in which two Structured Streaming jobs will concurrently write to a single bronze Delta table. Each job is subscribing to a different topic from an Apache Kafka source, but they will write data with the same schema. To keep the directory structure simple, a data engineer has decided to nest a checkpoint directory to be shared by both streams.

The proposed directory structure is displayed below:

Which statement describes whether this checkpoint directory structure is valid for the given scenario and why?

- A. No; only one stream can write to a Delta Lake table.
- B. Yes; Delta Lake supports infinite concurrent writers.
- **C. No; each of the streams needs to have its own checkpoint directory.**
- D. Yes; both of the streams can share a single checkpoint directory.
- E. No; Delta Lake manages streaming checkpoints in the transaction log.

**Answer: C**

Explanation:

This is the correct answer because checkpointing is a critical feature of Structured Streaming that provides fault tolerance and recovery in case of failures. Checkpointing stores the current state and progress of a streaming query in a reliable storage system, such as DBFS or S3. Each streaming query must have its own checkpoint directory that is unique and exclusive to that query. If two streaming queries share the same checkpoint directory, they will interfere with each other and cause unexpected errors or data loss.

Verified References: [Databricks Certified Data Engineer Professional], under "Structured Streaming" section; Databricks Documentation, under "Checkpointing" section.

**NEW QUESTION # 170**

You were asked to setup a new all-purpose cluster, but the cluster is unable to start which of the following steps do you need to take to identify the root cause of the issue and the reason why the cluster was unable to start?

- A. Storage account
- **B. Check the cluster event logs**  
(Correct)
- C. Data plane
- D. Check the cluster driver logs
- E. Workspace logs

**Answer: B**

Explanation:

Explanation

Cluster event logs are very useful, to identify issues pertaining to cluster availability. Cluster may not start due to resource limitations or issues with the cloud providers.

Some of the common issues include a subnet for compute VM reaching its limits or exceeding the subscription or cloud account CPU quota limit.

Here is an example where the cluster did not start due to subscription reaching the quota limit on a certain type of cpu cores for a VM type.

Graphical user interface, text, application, email Description automatically generated

Click on event logs

Graphical user interface, text, application, email Description automatically generated

Click on the message to see the detailed error message on why the cluster did not start.

## NEW QUESTION # 171

To keep constantly update can be walk in front, which is also our ExamsLabs's idea. Therefore, we regularly check Databricks-Certified-Professional-Data-Engineer exam to find whether has update or not. Once the update comes out, we will inform our customers who are using our products so that they can have a latest understanding of Databricks-Certified-Professional-Data-Engineer Exam. All the update service is free during one year after you purchased our Databricks-Certified-Professional-Data-Engineer exam software.
