The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

In the Application Layer metamodel, what is the relationship type from an application service to a data object?

- A. Composition
- **B. Access**
- C. Realization
- D. Aggregation

Answer: B

NEW QUESTION # 23

Consider the following diagram:

Which of the following correctly describes this diagram?

- A. The business role Specialist is an aggregation of the two business roles Travel Insurance Claim Analyst and Home Insurance Product Specialist.
- **B. The two business roles Travel Insurance Claim Analyst and Home Insurance Product Specialist are specializations of the business role Specialist**
- C. The business role Specialist approves all claims handled by the two business roles Travel Insurance Claim Analyst and Home Insurance Product Specialist
- D. The two business roles Travel Insurance Claim Analyst and Home Insurance Product Specialist together realize the business role Specialist.

Answer: B

Explanation:

Based on the ArchiMate 3 documents or objectives, the diagram uses a specialization relationship to indicate that the two business roles Travel Insurance Claim Analyst and Home Insurance Product Specialist are more specific versions of the business role Specialist. A specialization relationship is a type of structural relationship that indicates that an object is a specialization of another object. The notation for a specialization relationship is a solid line with an empty triangle at the end that points to the more general element.

NEW QUESTION # 24

Which statement describes how the Capability element is used?

- A. To represent what an enterprise has decided to do.
- **B. To represent the ability that an active structure element possesses**
- C. To represent the relative worth, utility, or importance of a core element.
- D. To represent an asset owned by an organization

Answer: B

Explanation:

According to the ArchiMate 3.2 Specification¹, a capability represents an ability that an active structure element, such as an

organization, person, or system, possesses. Capabilities are typically aimed at achieving some goal or delivering value by realizing an outcome¹. Therefore, the correct answer is D. To represent the ability that an active structure element possesses.

NEW QUESTION # 25

In the Implementation & Migration elements metamodel, which is the only element that models behavior?

- A. Work Package
- B. Plateau
- C. Gap
- D. Deliverable

Answer: A

NEW QUESTION # 26

What is specified by an architecture viewpoint?

- A. An architecture description
- B. A model kind
- C. An Enterprise Architecture model
- D. An architecture view on an Enterprise Architecture

Answer: D

Explanation:

According to the ISO/IEC 42010 standard¹, an architecture viewpoint is a specification of the conventions for constructing and using a view. A view is a representation of a whole system from the perspective of a related set of concerns. An architecture view on an Enterprise Architecture is a representation of a part or whole of an Enterprise Architecture from the perspective of one or more stakeholders and their concerns.

The ArchiMate language provides a flexible approach in which architects and other stakeholders can use their own views on the Enterprise Architecture. In this approach, architecture views are specified by architecture viewpoints. Architecture viewpoints define abstractions on the set of models representing the Enterprise Architecture, each aimed at a particular type of stakeholder and addressing a particular set of concerns².

NEW QUESTION # 27

.....
