### Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q46-Q51):

#### NEW QUESTION # 46

Your company has numerous locations throughout the world. Each of these locations has multiple office managers that field questions from employees through an email alias. Some questions have not been answered by an office manager How can you create a system to assign conversations to different receptionists using Workspace?

- A. Create Google Tasks and assign them to receptionists to address unanswered questions.
- B. Contract with a third-party solution, such as ServiceNow.
- C. Create a Google Groups Collaborative Inbox.
- D. Use App Script to design a ticketing system that marks conversation ownership.

**Answer: C**

#### NEW QUESTION # 47

Your company is using Google Workspace Enterprise Standard. They have 200 meeting rooms defined for the main building and used daily by the 12,000 employees. Users are complaining they have difficulties finding a room available when searching within Google Calendar, even if several rooms are available (no one attending meetings in these rooms at that time). You have been asked to find a solution while minimizing the operational effort and avoiding any new expenses due to budget constraints. What should you do?

- A. Set the option "Allow calendar-based room release" for all targeted rooms.
- B. Upgrade to Google Workspace Enterprise Plus edition to benefit from additional features for automated machine learning (ML) based resources management.
- C. Create a Google App Script that will inspect each room calendar for the next 12 hours, check attendees status, and send the room administrator an alert email for releasing the room if all attendees have declined but the room has not.
- D. Implement a third-party solution that will detect presence in the room and release it if nobody appears after a few minutes.

**Answer: A**

#### NEW QUESTION # 48

Your organization is about to expand by acquiring two companies, both of which are using Google Workspace. The CISO has mandated that strict 'No external content sharing' policies must be in place and followed. How should you securely configure sharing policies to satisfy both the CISO's mandate while allowing external sharing with the newly acquired companies?

- A. Let users share files between the two companies by using the 'Trusted Domains' feature. Create an allowlist of the trusted domains, and choose sharing settings for the users.
- B. Create a Drive DLP policy that will allow sharing to only domains on an allowlist.
- C. Use shared drives to store the content, and share only individual files externally.
- D. Allow external sharing of Drive content for the IT group only.

**Answer: A**

Explanation:

Access Admin Console: Log in to the Google Admin console.

Navigate to Sharing Settings: Go to Apps > Google Workspace > Drive and Docs > Sharing settings.

Set Up Trusted Domains: Enable the Trusted Domains feature and add the domains of the newly acquired companies to the allowlist.

Adjust Sharing Settings: Configure the sharing settings to restrict external sharing but allow sharing with the trusted domains. This ensures compliance with the CISO's mandate while enabling collaboration with the newly acquired companies.

Communicate Changes: Inform all users about the new sharing policies and the specific domains they are allowed to share content with.

Monitor Compliance: Regularly monitor sharing activities to ensure compliance with the new policies and make adjustments as necessary.

#### NEW QUESTION # 49

A user has reported that they did not receive an email from one of their normal correspondents. What information do you need to collect from the user to investigate the cause of the issue?

- A. The type of device the individual is using, including the OS version, browser, and browser version.
- B. The sender's IP address, mail client, and mail platform.
- **C. The email address of the sender and the subject and date/time of the missing message.**
- D. The sender's domain so you can review their SPF and DKIM configuration.

**Answer: C**

#### NEW QUESTION # 50

When reloading Gmail in Chrome, the web browser returns a 500 Error. As part of the troubleshooting process, Google support asks you to gather logs. How can this be accomplished?

- A. Chrome > Window Context Menu > More Tools > Task Manager > Screen Capture List of Running Processes
- **B. Chrome > Window Context Menu > More Tools > Developer Tools > Network Tab > Reload the page to replicate the error > "Export HAR"**
- C. chrome://net-export > Start Logging to Disk > Confirm validity with <https://netlog-viewer.appspot.com>
- D. Admin.google.com > Reporting > Reports > Apps Reports > Gmail

**Answer: B**

Explanation:

Open Developer Tools:

In Chrome, click the three dots menu (More).

Select "More Tools" > "Developer Tools".

Replicate the Error:

Go to the "Network" tab in Developer Tools.

Reload the Gmail page to replicate the 500 error.

Export HAR:

After the error is replicated, right-click on the network log.

Select "Save all as HAR with content".

Save the HAR file, which contains detailed logs of the network activity.

This file can then be provided to Google support for further analysis.
