Which statement about FortiGate behavior relating to this session is correct?

- A. FortiGate redirected the client to the captive portal to authenticate, so that a correct policy match could be made.
- B. FortiGate applied only IPS inspection to this session.
- C. FortiGate forwarded this session without any inspection.
- D. FortiGate is performing a security profile inspection using the CPU.

Answer: A

Explanation:

The key here is the state=redir_local...authflag, which tells that this session is being locally redirected (i.e. captive portal) waiting for the user to authenticate before it will match the "real" policy.
