

# Valid PL-300 Mock Test, Pass PL-300 Test

P.S. Free 2026 Microsoft PL-300 dumps are available on Google Drive shared by Prep4sureExam: [https://drive.google.com/open?id=1DeIMDI7gUTm\\_A0EZ-2f0ap1mriDxxUr](https://drive.google.com/open?id=1DeIMDI7gUTm_A0EZ-2f0ap1mriDxxUr)

Many students often start to study as the exam is approaching. Time is very valuable to these students, and for them, one extra hour of study may mean 3 points more on the test score. If you are one of these students, then PL-300 exam tests are your best choice. Because students often purchase materials from the Internet, there is a problem that they need transport time, especially for those students who live in remote areas. When the materials arrive, they may just have a little time to read them before the exam. However, with PL-300 Exam Questions, you will never encounter such problems, because our materials are distributed to customers through emails. After you have successfully paid, you can immediately receive PL-300 test guide from our customer service staff, and then you can start learning immediately.

Microsoft PL-300 Certification Exam, also known as the Microsoft Power BI Data Analyst Certification Exam, is designed to test the skills and knowledge of individuals who use Microsoft Power BI to analyze data and create visualizations. PL-300 Exam is intended for data analysts and business intelligence professionals who work with data to gain insights and make informed decisions.

## Microsoft - PL-300 - Authoritative Valid Microsoft Power BI Data Analyst Mock Test

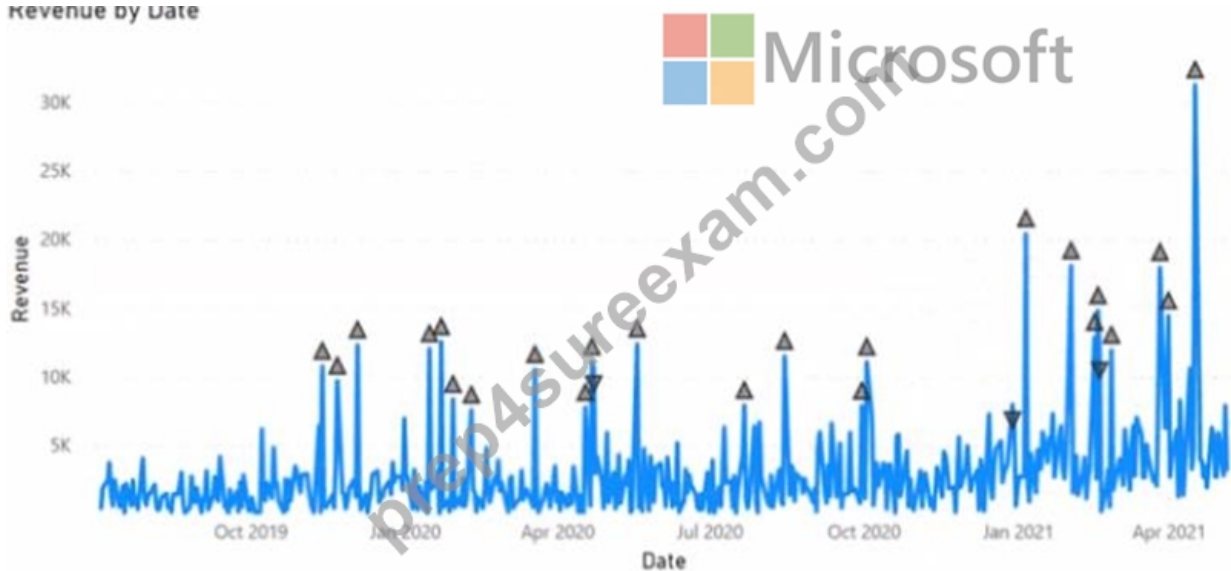

With a high quality, we can guarantee that our PL-300 practice quiz will be your best choice. There are three different versions about our products, including the PDF version, the software version and the online version. The three versions are all good with same questions and answers; you can try to use the version of our PL-300 Guide materials that is suitable for you. Our PL-300 exam questions have many advantages, I am going to introduce you the main advantages of our PL-300 study materials, I believe it will be very beneficial for you and you will not regret to use our PL-300 learning guide.

## Microsoft Power BI Data Analyst Sample Questions (Q480-Q485):

### NEW QUESTION # 480

You have a Power BI visual that uses indicators to show values that are out of range as shown in the following exhibit.

Revenue by Date

Answer:

Explanation:

ANSWER AREA

The visual type is [answer choice] chart.

The visual indicators that show values out of range are created by using [answer choice].

### NEW QUESTION # 481

You have a table that contains a column named Phone. The following is a sample of the data in the Phone column.

You need to add a new column that contains the data in the format of nnn-xxx-xxxx.

How should you complete the Query Editor formula? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
= Table.AddColumn("#Previous Step", "Custom", each Text.
```

(Text.	<input type="text"/>	([Phone], 12), " ", "-")
--------	----------------------	--------------------------

At
End
Middle
Range

<input type="text"/>
Insert
Remove
Replace
ReplaceRange

Answer:

Explanation:

= Table.AddColumn("#Previous Step", "Custom", each Text.

([Phone], 12), " ", "-")

### NEW QUESTION # 482

You have five sales regions. Each region is assigned a single salesperson.

You have an imported dataset that has a dynamic row-level security (RLS) role named Sales. The Sales role filters sales transaction data by salesperson.

Salespeople must see only the data from their region.

You publish the dataset to powerbi.com, set RLS role membership, and distribute the dataset and related reports to the salespeople.

A salesperson reports that she believes she should see more data.

You need to verify what data the salesperson currently sees.

What should you do?

- A. Instruct the salesperson to open the report in Microsoft Power BI Desktop.
- **B. Use the Test as role option to view data as the salesperson's user account.**
- C. Use the Test as role option to view data as the Sales role.
- D. Filter the data in the reports to match the intended logic in the filter on the sales transaction table.

**Answer: B**

Explanation:

Explanation

Validate the roles within Power BI Desktop

\* After you've created your roles, test the results of the roles within Power BI Desktop. From the Modeling tab, select View as.

A picture containing application Description automatically generated The View as roles window appears, where you see the roles you've created. Graphical user interface, text, application Description automatically generated

## View as roles

\* Select a role you created, and then select OK to apply that role. The report renders the data relevant for that role.

\* You can also select Other user and supply a given user. Graphical user interface, application Description automatically generated

\* Select OK. The report renders based on what that user can see.

**NEW QUESTION # 483**

You have the Power BI data model shown in the following exhibit.

The screenshot displays a Power BI data model with two tables: Sales and Countries. The Sales table is filtered by a DAX expression: `[Country] = 'USA'`, `[Email] = userprincipalname()`, `[Manager] = 'CFO'`, `False()`, and `True()`. The Countries table has columns Country, Email, and Manager. The answer area shows fields for Human Resources and Country, each with a DAX Expression input field.

**Answer:**

**Explanation:**

The screenshot shows the Power BI interface with the table filter and answer area. The table filter DAX expressions are: `[Country] = 'USA'`, `[Email] = userprincipalname()`, `[Manager] = 'CFO'`, `False()`, and `True()`. The answer area shows the Country field with the DAX expression `True()`.

**NEW QUESTION # 484**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is the same in each question in this series.

You have a Microsoft SQL Server database that contains the following tables.

Table name	Column name	Data type
Order	Order_ID	Integer
	Order_date	Integer
	Order_amount	Currency
	Customer_ID	Integer
	Order_ship_date	Integer
	Store_ID	Integer
Customer	Customer_ID	Integer
	First_name	Varchar(100)
	Last_name	Varchar(100)
	Customer_photo	Binary
Date	Date_ID	Integer
	Date_name	Datetime
	Month	Integer
	Week	Integer
	Year	Integer
Monthly_returns	Month_ID	Integer
	Total_returns	Float
	Store_ID	Varchar(100)
Store	Store_ID	Integer
	Name	Varchar(100)
	City	Varchar(100)
	Sales_target	Float

The following columns contain date information:

- Date[Month] in the mmyyyy format
- Date[Date\_ID] in the ddmmyyyy format
- Date[Date\_name] in the mm/dd/yyyy format
- Monthly\_returns[Month\_ID] in the mmyyyy format

The Order table contains more than one million rows.

The Store table has a relationship to the Monthly\_returns table on the Store\_ID column. This is the only relationship between the tables.

You plan to use Power BI Desktop to create an analytics solution for the data.

You need to create a relationship between the Order table and the Store table on the Store\_ID column.

What should you do before you create the relationship?

- A. In the Store table query, use the Table.TransformRows function.
- B. In the Order table query, use the Table.TransformColumnTypes function.
- C. In the Order table query, use the Table.TransformRows function.
- D. In the Store table query, use the Table.TransformColumnTypes function.

**Answer: D**

**NEW QUESTION # 485**

.....

We provide well-curated question answers for PL-300 at Prep4sureExam. We take 100% responsibility for validity of PL-300 questions dumps. If you are using our PL-300 Exam Dumps for PL-300, you will be able to pass the any PL-300 exam with high marks.
