NEW QUESTION # 24

How can admins review the performance of the Object Detection Model?

- A. Through Detected Objects
- B. By enabling Custom Object Detection
- C. By creating a Custom Object
- D. Through Einstein Bots

Answer: A

Explanation:

https://help.salesforce.com/s/articleView?id=sf.industries_einstein_object_detection_review_detected_objects.htm&type=5 Admins can review the performance of the Object Detection Model through Detected Objects, which are records that store the results of the object detection process. Detected Objects contain information such as the confidence score, the number of detections, and the bounding box coordinates for each object in an image. Admins can use reports and dashboards to analyze the Detected Objects data and evaluate the accuracy and performance of the Object Detection Model. NEW QUESTION # 28

A Consultant must migrate Communications Cloud Data from one customized Salesforce Org to another Salesforce Org.

What are two key considerations before migration and preparing the target instance to receive or import Communications Cloud data?

- A. Run data validation in parallel to the ongoing migration.
- B. Test migration data in a production environment.
- C. All required data points and fields from the source org are captured in the target org.
- D. Requires matching metadata to be established in the new target org.

Answer: C,D

Explanation:

Before migrating Communications Cloud data to a new org, Salesforce documentation stresses two critical readiness steps:

A . Ensuring all required fields and data points exist in the target org Communications Cloud relies on a complex data model (EPC, Order Mgmt, Pricing, Attributes, EPC Projects, Fulfillment records). The target org must have all necessary fields and object configurations before importing data.

D . Metadata must match before migration

Migration cannot succeed unless product specs, attributes, price lists, technical product models, decomposition mappings, and orchestration metadata exist in the target org.

Metadata alignment is the #1 prerequisite for moving Communications Cloud data.

Incorrect options:

B: Running validation during migration is risky and not recommended.

C: Testing in production is strictly prohibited.
