All our team of experts and service staff are waiting for your mail on the 300-610 exam questions all the time. As long as you encounter obstacles in the learning process on our 300-610 training guide, send us an email and we will solve it for you at the first time. Please believe that 300-610 Learning Materials will be your strongest backing from the time you buy our 300-610 practice braindumps to the day you pass the exam.

Cisco 300-610 Certification Exam is a challenging and rewarding certification that is highly respected in the IT industry. Passing 300-610 exam demonstrates a high level of expertise in designing, deploying, and maintaining data center infrastructure using Cisco technologies. Designing Cisco Data Center Infrastructure certification is recommended for IT professionals who are looking to advance their careers in data center infrastructure design and management.

Official Training for Cisco 300-610 Exam

Considering the above amount of topics the candidates should learn for the Cisco 300-610 exam, success is only possible if they have a hold over dependable and updated study resources. It is recommended to begin with official training since whatever options the vendor offers are trustworthy.

Therefore, applying for the Designing Cisco Data Center Infrastructure (DCID) v7.0 course is the easiest and sure-shot way to master the tested concepts. This is a self-paced training program accessible for 180 days from the date of enrollment. It can be found on the Cisco Learning Network Store and costs \$1,500. A video training version is also available.

The best audience for these classes includes system engineers, network engineers, data center engineers, server administrators, and others. Before taking-up training, they should make sure they are well-versed in data center networking, storage and virtualization, alongside the Cisco UCS.

Pass the Cisco 300-610 Certification Exam with Flying Hues

Our online test engine and the windows software of the 300-610 guide materials can evaluate your exercises of the virtual exam and practice exam intelligently. Our calculation system of the 300-610 study engine is designed subtly. Our evaluation process is absolutely correct. We are strictly in accordance with the detailed grading rules of the real exam. And our pass rate of the 300-610 Exam Questions are high as 98% to 100%, it is unique in the market.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q13-Q18):

NEW QUESTION # 13

What must be configured in Cisco Intersight when Enum is selected as the data type in a workflow input?

- A. Widget type
- B. Regex
- C. Object Selector
- D. Secure

Answer: A

NEW QUESTION # 14

A data center with high network-traffic demands is facing challenges related to link throughput, with recent reports of significant traffic congestion and performance degradation. To ensure optimal network performance and user experience, a network engineer implemented PFC and enabled jumbo frames on all network devices in the data center. However, the senior network architect requested further improvements to completely resolve the issue. The solution must follow IEEE 802.1 AX and IEEE 802.3ad principles. Which action must the network engineer take to accomplish the goal?

- A. Implement vPC link aggregation to increase overall bandwidth capacity and provide redundancy.
- B. Implement DCBXP with the ETS protocol to provide granular traffic management and bandwidth allocation.
- C. Implement upgraded 10GbE or 40GbE network links to increase bandwidth capacity.
- D. Implement HQoS to classify and prioritize traffic based on its criticality and bandwidth application requirements.

Answer: A

Explanation:

IEEE 802.1AX and 802.3ad define Link Aggregation and LACP. By configuring a vPC pair on Nexus switches and bundling member links into a LACP-based EtherChannel, you both double (or more) the logical bandwidth and gain seamless hitless failover-resolving congestion and enhancing resilience per the IEEE specs.

NEW QUESTION # 15

A network engineer is designing a Cisco Hyperflex infrastructure. The infrastructure will be connected to an external SAN fiber channel array and must support Microsoft clustering.

Which storage connectivity method must be used to meet these requirements?

- A. server message block
- B. Fibre Channel over Ethernet
- C. Internet Small Computer Systems Interface
- D. raw device mapping

Answer: B

Explanation:

Reference:

[b_HyperFlex_Systems_Network_and_External_Storage_Management_Guide_3_0_chapter_010.html](#)

NEW QUESTION # 16

A Cisco engineer is developing a custom application that can run natively in Cisco NX-OS on Nexus 9000 and Nexus 3000 platforms. For the NX-SDK application to run, the engineer enables the NX-SDK feature on the device.

Then the NX-SDK is imported into the application via an `import nx_sdk_py` statement. The engineer creates custom CLI commands and defines custom CLI command syntax within the `sdkThread` function. When CLI commands originate from an NX-SDK application, what class is this?

- A. `nx_sdk_pyValid-to_int`
- B. `pyCmdhandler`
- C. `postCliCb`
- D. `cliCmdPrintConsole`

Answer: A

NEW QUESTION # 17

A customer is implementing a business continuity solution for the current data centers. The new location must mitigate the impact of a disaster in any existing data centers by providing an acceptable level of service. The solution must support

- * fully segregated Layer 2 and 3 fault domains
- * low or no human intervention for service restoration
- * medium to high RPO/RTO for a subset of applications
- * asynchronous storage replication for application data

Which disaster recovery solution must the customer select to meet these requirements?

- A. partially equipped infrastructure facility for on-demand activation
- B. identical infrastructure facility ready to provide service
- C. cold infrastructure facility with basic infrastructure
- D. mirrored inactive infrastructure facility with fully stretched resources

Answer: B

NEW QUESTION # 18

.....

Our passing rate is very high to reach 99% and our 300-610 exam torrent also boost high hit rate. Our 300-610 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our 300-610 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Our product convey you more important information with less amount of the questions and answers. Thus we can be sure that our 300-610 guide torrent are of high quality and can help you pass the exam with high probability.
