We aim to provide the best service for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, and our 1z0-1080-25 study guide and compiling processes will be of the highest quality. We play an active role in making every country and community in which we selling our 1z0-1080-25 Practice Test a better place to live and work. That is to say, if you have any problem after 1z0-1080-25 exam materials purchasing, you can contact our after sale service staffs anywhere at any time on our 1z0-1080-25 study guide. And our staffs are only waiting for you online.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 2	<ul style="list-style-type: none">• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 3	<ul style="list-style-type: none">• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.

Topic 4	<ul style="list-style-type: none"> Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 5	<ul style="list-style-type: none"> Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 6	<ul style="list-style-type: none"> Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 7	<ul style="list-style-type: none"> Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 8	<ul style="list-style-type: none"> Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 9	<ul style="list-style-type: none"> Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 10	<ul style="list-style-type: none"> Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 11	<ul style="list-style-type: none"> Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 12	<ul style="list-style-type: none"> Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 13	<ul style="list-style-type: none"> Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 14	<ul style="list-style-type: none"> Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 15	<ul style="list-style-type: none"> Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 16	<ul style="list-style-type: none"> Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.

Get Reliable Valid 1z0-1080-25 Exam Prep and Pass Exam in First Attempt

In order to better meet users' needs, our 1z0-1080-25 study materials have set up a complete set of service system, so that users can enjoy our professional one-stop service. We not only in the pre-sale for users provide free demo, when buy the user can choose in we provide in the three versions, at the same time, our 1z0-1080-25 Study Materials also provides 24-hour after-sales service, even if you are failing the exam, don't pass the exam, the user may also demand a full refund with purchase vouchers, make the best use of the test data, not for the user to increase the economic burden.

Oracle Planning 2025 Implementation Professional Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which two components are included in Salary Grade assumptions?

- A. Salary Basis
- B. Salary Rate
- C. Merit Rate
- D. Partial Payment Factor

Answer: B,C

NEW QUESTION # 63

Which two statements describe tasks that need to be completed so that planners can use a Machine Learning (ML) model in Planning?

- A. Administrators create an action menu to run the Groovy rule generated from the ML model definition, and then assign the action menu to a form.
- B. Administrators import the ML model into a Planning application and define how the input variables and the target variable map to dimension members or cell values in the Planning application.
- C. Administrators build a task list to set up the ML model definition, and then run the Groovy rule to generate future data.
- D. Administrators build a navigation flow to set up the ML model definition, and then set up a data map to map historical data to future data and push the actual data to the cube.

Answer: A,B

NEW QUESTION # 64

Which three required setup options must you select when creating a Module-based Planning application?

- A. Period Frequency
- B. Custom Dimensions
- C. Main Currency
- D. Rolling Forecast
- E. Application Type

Answer: B,D,E

NEW QUESTION # 65

Which statement describes Strategic Modeling?

- A. It is used to model the flow of data by defining strategic rules for sharing data between modules.
- B. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities.
- C. It is used to strategically manage and analyze finances at any business level with built-in dashboards.
- D. It is used to develop driver-based strategic plans and generate core financial statements.

Answer: B

Explanation:

Strategic Modeling in Oracle Planning 2024 is a module designed to enable rapid modeling and evaluation of financial scenarios, such as mergers, acquisitions, or long-term strategic plans. It provides a flexible framework for simulating "what-if" scenarios and includes out-of-the-box treasury capabilities, such as cash flow forecasting, debt scheduling, and interest rate calculations, which are critical for strategic financial planning.

* A. It is used to model the flow of data by defining strategic rules for sharing data between modules:

Incorrect. This describes data integration (e.g., via data maps), not Strategic Modeling, which focuses on scenario analysis.

* B. It is used to develop driver-based strategic plans and generate core financial statements: Incorrect.

While it supports driver-based planning, generating core financial statements is more aligned with the Financials module, not Strategic Modeling's primary focus.

* C. It is used to strategically manage and analyze finances at any business level with built-in dashboards:

Incorrect. This is too broad and aligns more with the overall Planning application, not specifically Strategic Modeling.

* D. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities: Correct. This matches the module's purpose of rapid scenario modeling and its treasury-related features.

The Oracle documentation highlights Strategic Modeling's role in scenario analysis and its treasury tools, making D the accurate description.

NEW QUESTION # 66

Which three are Navigation Flow customization categories?

- A. User
- B. Group
- C. Global
- D. Role
- E. Artifact

Answer: B,C,D

Explanation:

In Oracle Planning 2024, Navigation Flows can be customized to tailor the user interface and experience based on specific categories. The three customization categories supported are Role, Group, and Global:

* A. Role: Navigation Flows can be customized for specific user roles (e.g., Planner, Administrator), allowing different layouts or access to cards based on job functions.

* C. Group: Customization can be applied to user groups, enabling administrators to assign tailored navigation flows to predefined sets of users based on their team or department.

* E. Global: Global customization applies to all users across the application, serving as the default navigation flow unless overridden by Role or Group settings.

* B. User: This is incorrect because Oracle Planning does not support navigation flow customization at the individual user level- customizations are broader, targeting roles or groups.

* D. Artifact: This is incorrect because "Artifact" refers to application components (e.g., forms, rules) managed in migration, not a category for navigation flow customization.

The Oracle documentation confirms that Role, Group, and Global are the three levels at which navigation flows can be customized, providing flexibility in how users interact with the Planning application.
