With the assistance of our Adobe AD0-E117 Study Guide you will be more distinctive than your fellow workers.

## Adobe Experience Manager Architect Master Sample Questions (Q79-Q84):

### NEW QUESTION # 79

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

- \* The client currently has a dozen static templates that they want to move to editable templates.
- \* The existing pages use the parsys paragraph system for storing components.
- \* Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
- \* The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

- A. 1. Use the same page components for editable templates  
2. Use a new template type for each static template
- B. 1. Use a new page component for editable templates based on the core components page component

- 2. Convert page properties to policies
- C. 1. Use a new page component for editable templates based on the core components page component  
2. Migrate page properties to respective components dialogues
- D. 1. Use the same page components for editable templates  
2. Create a new editable template based on each of the existing page components

**Answer: C**

Explanation:

Use a new page component for editable templates based on the core components page component and migrate page properties to respective components dialogues<sup>2</sup>. According to Adobe Experience Manager documentation<sup>1</sup>, static templates are not considered a best practice and editable templates should be used instead. AEM Modernization tools can help migrate from static to editable templates. Editable templates use core components as their base components<sup>2</sup> and page properties can be migrated to component dialogues using content policies<sup>2</sup>.

#### NEW QUESTION # 80

An enterprise client is on-boarding an AEM Desktop application to provide authors with the ability to load the AEM repository virtually on the file system. The desktop application is unable to connect to the AEM Author, which has SSL enabled. The intermediate certificate is installed on Apache.

How should an Architect resolve this issue?

- A. Install the certificate chain to the keystore of the AEM ssl-service user
- B. Install the Root certificate to the AEM truststore
- C. Install the certificate chain to the keystore of the AEM authentication service user
- D. Install the certificate chain to the AEM truststore

**Answer: B**

#### NEW QUESTION # 81

A large digital agency has 10 TB of assets in their DAM where renditions for each Asset must be created without affecting performance for the authors. Which capability should the Architect recommend to meet the requirements?

- A. Reduce the number of AEM Asset versions
- B. Use AEM Asset Offloading
- C. Update dispatcher configuration to cache Assets
- D. Create AEM multi-threaded workflow

**Answer: B**

Explanation:

"AEM Asset Offloading allows for delegating asset processing tasks such as rendition generation to a separate AEM instance or service. This reduces the load on the author servers and improves performance for authors".

#### NEW QUESTION # 82

A client designs a new experience for one of their brand sites with the following parameters:

- \* The new experience should behave like a desktop application
- \* There is a lot of dynamic content in the app
- \* SEO and initial page load are a top concern for the client
- \* The client's marketing team needs to be able to author the content with a WYSIWYG editor Which approach should the Architect use to meet these requirements?

- A. Use the traditional server side components on the website
- B. Create a set of API-driven components
- C. Use the SPA Editor SDK with Server Side Rendering
- D. Use AEM as a headless CMS

**Answer: B**

### NEW QUESTION # 83

A company is implementing a new e-commerce site that is expected to get seasonal and flash-sale induced traffic peaks from all over the world. It is projected that a minute of downtime could cause excessive lost revenue. The company management wants to keep resource utilization to optimal levels without experiencing degradation to avoid introducing bugs in the system.

The Architect needs to choose between AEM 6.5 and AEM as Cloud Service.

What are the two most critical non-functional requirements the Architect must consider? (Choose two.)

- A. Maintainability
- B. Availability
- C. Scalability
- D. Usability
- E. Reliability

**Answer: B,C**

Explanation:

According to Adobe Experience Manager documentation<sup>3</sup>, AEM as Cloud Service provides scalable and resilient architecture that can handle traffic peaks and ensure high availability. AEM 6.5 requires manual scaling and backup strategies to achieve the same level of performance and reliability.

### NEW QUESTION # 84

.....

There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the AD0-E117 exam questions for all customers. More importantly, we believe once you finally gain the AD0-E117 certification with our AD0-E117 exam questions and you will find enormous benefits: more enjoyment of life and better relationships and less stress and a better quality of life overall.
