

Free PDF Quiz 2026 SAP C_ADBTP_2601: Marvelous Free Administrating SAP Business Technology Platform(C_ADBTP_2601) Pdf Guide

Real4Prep online digital Administrating SAP Business Technology Platform(C_ADBTP_2601) (C_ADBTP_2601) exam questions are the best way to prepare. Using our Administrating SAP Business Technology Platform(C_ADBTP_2601) (C_ADBTP_2601) exam dumps, you will not have to worry about whatever topics you need to master. To practice for a SAP C_ADBTP_2601 certification exam in the software (free test), you should perform a self-assessment. The SAP C_ADBTP_2601 Practice Test software keeps track of each previous attempt and highlights the improvements with each attempt. The Administrating SAP Business Technology Platform(C_ADBTP_2601) (C_ADBTP_2601) mock exam setup can be configured to a particular style or arrive at unique questions.

SAP C_ADBTP_2601 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: SAP BTP Account and Subaccount Management	11-20	- Manage entitlements, quotas, and runtime environments - Create and configure global accounts and subaccounts - Implement directory and environment management
Topic 2: DevOps	11-20	- Manage the application lifecycle using SAP BTP services - Configure and operate CI/CD pipelines for SAP BTP applications - Implement monitoring and alerting for applications and services
Topic 3: SAP Discovery Center and Service Marketplace	<10	- Navigate and utilize SAP Discovery Center for project guidance - Find and provision services from the SAP BTP Service Marketplace
Topic 4: Connectivity	11-20	- Manage SAP BTP networking and tunneling services - Set up and manage connectivity between SAP BTP and on-premise systems - Configure and troubleshoot Cloud Connector and Destination configurations
Topic 5: SAP Business Application Studio / Visual Studio Code	<10	- Configure and use development environments in SAP Business Application Studio - Integrate Visual Studio Code with SAP BTP for local development
Topic 6: Security	11-20	- Manage platform-level security settings and policies - Configure and maintain identity and access management (IAM) for SAP BTP - Implement audit logging and security monitoring
Topic 7: SAP BTP Services	11-20	- Provision and manage SAP BTP platform services - Monitor service health and usage - Integrate services with other SAP and third-party systems

2026 Free C_ADBTP_2601 Pdf Guide | Excellent Adminstrating SAP Business Technology Platform(C_ADBTP_2601) 100% Free Test Cram Review

Based on the credibility in this industry, our C_ADBTP_2601 study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. The system of C_ADBTP_2601 test guide will keep track of your learning progress in the whole course. Therefore, you can have 100% confidence in our C_ADBTP_2601 exam guide. According to our overall evaluation and research, seldom do we have cases that customers fail the C_ADBTP_2601 Exam after using our study materials. But to relieve your doubts about failure in the test, we guarantee you a full refund from our company by virtue of the related proof of your report card. Of course you can freely change another C_ADBTP_2601 exam guide to prepare for the next exam. Generally speaking, our company takes account of every client's difficulties with fitting solutions.

SAP Adminstrating SAP Business Technology Platform(C_ADBTP_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Select Subaccounts and Directories

Search All ▼

Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.

> **Availability by Region and Data Center**

> **Entitlement Sources**

[Add 1 Service Plan](#) [Cancel](#)

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credential-store	proxy	Assigned (1 unit)	☐	×
Destination Service	destination	lite	Assigned (1 unit)	☐	×
Feature Flags Service	feature-flags-dashboard	dashboard (Application)	Assigned (1 unit)	☐	×
	feature-flags	standard	Assigned (1 unit)	☐	×
		lite	Assigned (1 unit)	☐	×
HTML5 Application Repository Service	html5-apps-repo	app-host	Assigned (1 unit)	☐	×
		app-runtime	Assigned (1 unit)	☐	×
Print Service	print	receiver	Assigned (1 unit)	☐	×
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	☐	×
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	☒	×
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	☐	×
		global-offerings-audit	Assigned (1 unit)	☐	×
		subaccount-audit	Assigned (1 unit)	☐	×
		subaccount-admin	Assigned (1 unit)	☐	×
		container	Assigned (1 unit)	☐	×

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

NEW QUESTION # 11

SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

Create Subaccount

Display Name*

Region*

Subdomain*

Description

Parent*

> **Advanced**

Cockpit supports multi-level directories in your account structure.
You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under Parent.

Create **Cancel**

Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

Name	Type	Environment	Provider	Region	Changed On
BT Admin Certification					
Americas					
Partner					
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2026, 3:25:3...

Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops####-am-pa-prod
 Then set:
 Source Subaccount: AM PA Dev Test
 Enable the production setting:
 Used in Production: Yes
 Then click Create.

Create Subaccount

Display Name *
AM PA Prod

Description
Partner Production

Region *
US West (WA)

Subdomain *
btpops####-am-pa-prod

Parent *
Partner

Advanced

☒ Used for production

☐ Enable beta features

Add labels to this subaccount

Name: Values:

Enter label name

+

Create Cancel

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certification	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Partner	Directory				March 26, 2026, 3:30:3...
AM PA Dev Test	Multi-Environment	Microsoft Azure	US West (WA)		March 26, 2026, 3:35:3...
AM PA Prod	Multi-Environment	Microsoft Azure	US West (WA)		March 26, 2026, 3:39:3...

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

2. Wrong subdomain format

Use exactly:

bt pops#####-am-pa-dev-test

bt pops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

NEW QUESTION # 12

SIMULATION

Enable a Cloud Foundry Environment

Task 2: Enable and Configure a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, enable the Cloud Foundry environment in the cf-eu10-004 landscape.

Set the instance name to cf-eu-hcm-dev and the org name to bt pops#####-eu-hcm-dev.

In the EU HCM Dev subaccount, create a space with the name activity-recording.

In the EU HCM Dev subaccount, create a space quota with the name half-org-quot a. Halve the available org quota for memory, routes, service, and instance memory for an unlimited number of app instances. Assign the space quota to activity-recording.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed specifically in EU HCM Dev. SAP documents that Cloud Foundry is enabled at subaccount level, and the system creates a Cloud Foundry org linked to that subaccount.

Part 1 - Enable the Cloud Foundry environment

Step 1 - Open the subaccount overview

In EU HCM Dev, go to Overview.

Explanation:

SAP Help describes the cockpit flow for enabling Cloud Foundry from the subaccount Overview page.

What to verify

You should see a Cloud Foundry section on the overview page.

Step 2 - Start enabling Cloud Foundry

In the Cloud Foundry section, click Enable Cloud Foundry.

Explanation:

This starts creation of the Cloud Foundry organization for the subaccount. SAP notes that when you enable Cloud Foundry in a subaccount, the system automatically creates a Cloud Foundry org for it.

Step 3 - Enter the required Cloud Foundry values

In the enablement dialog, enter:

Landscape: cf-eu10-004

Instance Name: cf-eu-hcm-dev

Org Name: btpops####-eu-hcm-dev

Then confirm by clicking Create or Enable.

Explanation:

The task gives you the exact landscape and naming values to use. SAP documentation shows that enabling Cloud Foundry in the cockpit requires naming the Cloud Foundry instance and org.

What to verify

After the process completes, the subaccount should show Cloud Foundry as enabled, with the org created for EU HCM Dev.

Enable Cloud Foundry

1
Basic Info

Enter basic info for your environment instance.

Environment: *
Cloud Foundry Runtime

Plan: *
standard

Landscape: *
cf-eu10-005

Instance Name: ⓘ
cf-eu-hcm-dev

Org Name: * ⓘ
btpops -eu-hcm-dev

Cloud Foundry API endpoints may differ between subaccounts in the same region.
The API endpoint for this subaccount is shown in the Cloud Foundry environment instance details.

Cloud Foundry Environment

Information not available for you. You must be an org member. Go to KBA

API Endpoint: <https://api.cf.eu10-005.saps.eu-central-1.amazonaws.com>

Org Name: btpops1001-eu-hcm-dev

Org ID: v1602a0d1b-07ba-400a-99a5-7a2757a395

Org Memory Limit: 1,024MB

Manage environment instance

Disable Cloud Foundry

Registries (0)	Applications	Service Instances
No spaces defined in this subaccount		

Part 2 - Create the space

Step 4 - Open Spaces

In EU HCM Dev, after Cloud Foundry is enabled, open:

Cloud Foundry

Spaces

Explanation:

SAP Help shows that spaces are created from the Spaces area after Cloud Foundry is enabled in the subaccount.

Step 5 - Create the space

Click Create Space.

Enter:

Space Name: activity-recording

Confirm by clicking Create.

Explanation:

This creates the required Cloud Foundry space inside the org for EU HCM Dev. SAP's cockpit documentation and setup guides show this as the standard next step after enabling the environment.

What to verify

You should now see:

activity-recording

in the list of Cloud Foundry spaces.

Part 3 - Create the space quota

Step 6 - Open Cloud Foundry Space Quotas

In EU HCM Dev, open:

Cloud Foundry

Space Quotas

Explanation:

SAP Help states that, in the Cloud Foundry environment, the quotas allocated to a subaccount can be further distributed by creating space quota plans, and these are managed from the Cloud Foundry Space Quotas area.

Step 7 - Create a new space quota

Click Create Space Quota or New Space Quota.

Enter the quota name:

half-org-quota

Explanation:

This creates a quota plan that you will assign to the required space. SAP Help describes creating space quota plans in the subaccount and then assigning them to spaces.

Step 8 - Set quota values to half of the org quota

In the quota form, set the values to half of the available org quota for:

Memory
Routes
Services
Instance Memory
For App Instances, set:
Unlimited
Then save the quota.

Create Space Quota

i You are allowed to add a value above the org quota, but the org quota is the consumable limit you can reach.
To assign the "Unlimited" value, use -1.

Name: * half-org-quota

Space Memory (MB): * 512
Org Quota: 1024 MB (1GB)

Routes: * 5
Org Quota: 10

Service Instances: * 250
Org Quota: 500

Memory per Instance (MB): * 8192
Org Quota: 16384 MB (16GB)

App Instances: * -1
Org Quota: Unlimited

Allow Paid Services: OFF

SAP

Create Cancel

Explanation:

The simulation asks you to halve the available org quota for those four dimensions. SAP Help confirms that space quotas are used to limit resource consumption inside the org by defining values such as memory, routes, and service instances, and that these plans can then be assigned to spaces.

How to calculate "half"

Use the current org quota values shown in the Cloud Foundry quota screens and divide each by 2 before entering it.

Examples:

If org memory = 2 GB, enter 1 GB

If routes = 20, enter 10

If services = 200, enter 100

If instance memory = 2 GB, enter 1 GB

What to verify

The new quota plan should exist as:

half-org-quota

with the reduced values saved.

BTP Admin Certification 3974 / EU HCM Dev

Subaccount: EU HCM Dev - Space Quotas

Space Quotas Quota Assignments

Space Quotas (1)

half-org-quota
Not assigned

Space Memory: 512MB
Routes: 5
Service Instances: 250

Paid Services: Not Allowed
App Instances: Unlimited
Memory per Instance: 8GB

Part 4 - Assign the quota to the space

Step 9 - Assign the quota to activity-recording

Open the newly created quota:

half-org-quota

Choose Assign Spaces or Assign to Spaces

Select:

activity-recording

Save the assignment

Explanation:

SAP Help states that after creating a space quota, you assign it to one or more spaces from the space quota management flow.

What to verify

The quota half-org-quota should now be assigned to:

activity-recording

Subaccount: EU HCM Dev - Space Quotas

Space Quotas Quota Assignments

Quota Assignments (1)

☒ Space Quota

Name: *

half-org-quota

Save Cancel

Subaccount: EU HCM Dev - Space Quotas

Quota Assignments (2)

Space	Space Quota	Actions
activity-recording	half-org-quota	

Final expected result

Inside EU HCM Dev:

Cloud Foundry is enabled

landscape is cf-eu10-004

instance name is cf-eu-hcm-dev

org name is btpops####-eu-hcm-dev

space activity-recording exists

space quota half-org-quota exists

memory, routes, services, and instance memory are each set to half of the available org quota app instances are unlimited quota half-org-quota is assigned to activity-recording Common mistakes to avoid Enabling Cloud Foundry in the wrong subaccount; it must be EU HCM Dev.

Using the wrong landscape; the task explicitly requires cf-eu10-004.

Typing the wrong org name; use exactly btpops####-eu-hcm-dev.

Forgetting to create the space before assigning the quota.

Entering full org quota instead of half.

Limiting app instances to a number instead of leaving them unlimited.

Creating the quota but not assigning it to activity-recording.

NEW QUESTION # 13

SIMULATION

Enable Service Subscriptions

Task 2: Entitle and Subscribe a Service in a Subaccount

In your AM PA Prod subaccount, entitle the standard (Application) service plan for SAP Build Work Zone, standard edition.

In the AM PA Prod subaccount, establish a trust to the agvlamkzw.accounts.ondemand.com identity provider.

In your AM PA Prod subaccount, create a service subscription for SAP Build Work Zone, standard edition with the standard service plan.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Part A - Entitle the Service Plan in AM PA Prod

Step 1 - Open the AM PA Prod Subaccount

What to do

In the SAP BTP Cockpit, go to Directories.

Open the Partner directory.

Select the subaccount AM PA Prod.

Explanation:

This opens the exact subaccount where the entitlement and subscription must be created.

What to verify

You should now be on the AM PA Prod subaccount page.

Step 2 - Open Entitlements in the Subaccount

What to do

In AM PA Prod, open Entitlements.

Explanation:

SAP documents that subaccount entitlements are configured in the subaccount's entitlement area, where you add service plans and quotas available to that subaccount.

What to verify

You should see the Entitlements screen for AM PA Prod.

Step 3 - Add the Required Service Plan

What to do

Click Configure Entitlements or Add Service Plans.

Search for:

SAP Build Work Zone, standard edition

Select the service.

Choose the plan:

standard (Application)

Add the service plan.

Save the entitlement changes.

Explanation:

The task requires the standard (Application) plan specifically. SAP's entitlement flow requires you to add the service plan to the subaccount before you can subscribe to the application.

What to verify

Under Entitlements, you should now see:

SAP Build Work Zone, standard edition

plan: standard (Application)

Part B - Establish Trust to the Identity Provider

Step 4 - Open Trust Configuration

What to do

In the AM PA Prod subaccount, go to:

Security

Trust Configuration

Explanation:

SAP Help states that trust to a custom identity provider is established from the cockpit in Security > Trust Configuration.

What to verify

You should be on the Trust Configuration page of AM PA Prod.

Step 5 - Start the Trust Setup

What to do

Click Establish Trust or New Trust Configuration.

Explanation:

This opens the wizard or form to add a trusted identity provider for the subaccount. SAP documents this as the standard cockpit flow for custom identity provider trust.

Step 6 - Enter the Identity Provider

What to do

In the trust configuration, use the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard and confirm the trust setup.

Save the configuration.

Explanation:

The simulation explicitly requires trust to that identity provider domain. For SAP Build Work Zone, standard edition, SAP also notes that the subaccount must trust an identity provider before subscription use cases for business users are completed.

What to verify

On the Trust Configuration page, the identity provider

agvlamkzw.accounts.ondemand.com should appear as trusted.

Configure Tenant

1 Choose Tenant — 2 **Configure Main Information** — 3 Configure Identity Provider and Parameters — 4 Review

2. Configure Main Information

Part C - Create the Service Subscription
 Step 7 - Open the Subscription Area
 What to do

In AM PA Prod, go to:

Services

Instances and Subscriptions

Explanation:

SAP Help for SAP Build subscriptions points to the subaccount subscription flow after the entitlement is available. In current cockpit usage, subscriptions are created from the subaccount's services are a.

What to verify

You should see the Instances and Subscriptions page.

Step 8 - Create the Subscription

What to do

Click Create.

Choose Subscription if a type selection appears.

Search for:

SAP Build Work Zone, standard edition

Select the plan:

standard

Then confirm the creation.

New Instance or Subscription

New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * **i**

Can't find what you're looking for?

SAP Build Work Zone, standard edition

Plan: *

standard

Create

Cancel

Explanation:

SAP's getting-started guidance for SAP Build Work Zone, standard edition says that once the subaccount has the required entitlement, you can subscribe to the application from the subaccount.

What to verify

You should now see a subscription entry for:

SAP Build Work Zone, standard edition

plan: standard

Step 9 - Confirm the Subscription Is Active

What to do

Check the status of the new subscription in Instances and Subscriptions.

Explanation:

The subscription should be visible and active in the subaccount after creation.

What to verify

You should see:

SAP Build Work Zone, standard edition

subscription created successfully

SAP's guidance for subscription-based applications consistently uses this subaccount subscription flow after entitlement is present.

Final Expected Result for Task 2

Inside AM PA Prod:

the entitlement SAP Build Work Zone, standard edition is assigned

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, standard edition

the subscription uses the standard service plan

Common Mistakes to Avoid

1. Doing the entitlement in the wrong place

This task must be done in:

AM PA Prod subaccount

Not only in:

Partner directory

Directory entitlement and subaccount entitlement are different scopes in the cockpit.

2. Choosing the wrong service or wrong plan

Use exactly:

SAP Build Work Zone, standard edition

standard (Application) for entitlement

standard for the subscription selection screen

SAP's service subscription flow starts only after the correct entitlement exists.

3. Skipping trust configuration

The simulation explicitly requires trust to:

agvlamkzw.accounts.ondemand.com

Trust is configured in Security > Trust Configuration.

4. Looking for subscription creation before entitlement

The entitlement must be added first, otherwise the service may not appear in the subscription creation flow.

Quick Validation Checklist

Confirm all of the following in AM PA Prod:

Entitlements contains SAP Build Work Zone, standard edition

the plan is standard (Application)

Trust Configuration shows agvlamkzw.accounts.ondemand.com

Instances and Subscriptions shows SAP Build Work Zone, standard edition the subscription is created successfully

NEW QUESTION # 14

.....

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. C_ADBTP_2601 practice materials are an effective tool to help you reflect your abilities. With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method C_ADBTP_2601 Real Questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning.
