Passing the Salesforce Advanced-Administrator Exam requires a thorough understanding of the Salesforce platform and its advanced features. Candidates should have experience in configuring and managing Salesforce applications, customizing Salesforce functionality, and implementing automation processes. They should also have knowledge of advanced security and access controls, data management, and analytics.

### Salesforce Certified Advanced Administrator Sample Questions (Q119-Q124):

#### NEW QUESTION # 119

An administrator has unchecked the "Enable content pack creation" checkbox after users had created content packs. What is the impact of this change?

- A. Users can modify the description and title of existing packs
- B. Users can continue to edit the contents of existing packs
- C. The Clone & Customize button will continue to be available
- D. All existing content packs will be deleted

**Answer: A**

#### NEW QUESTION # 120

Which Objects in Salesforce does Data.com allow you to cleanse? (Select 3)

- A. Cases
- B. Accounts
- C. Contacts
- D. Leads

**Answer: B,C,D**

#### NEW QUESTION # 121

Northern Trail Outfitters (NTO) has a private sharing model for records containing a customer's credit information. These records should be visible to a sales rep's manager but hidden from their colleagues.

How should an administrator adjust NTO's sharing model to ensure the correct amount of confidentiality?

- A. Grant access using hierarchies via the sharing settings.
- B. Add View All access for the object via the manager's profile.
- C. Create sharing rules for each manager based on the record owner.
- D. Use validation rules targeting the logged-in user.

**Answer: A**

Explanation:

Explanation

To ensure that sales reps' managers can view records containing customer's credit information but their colleagues cannot, NTO should grant access using hierarchies via the sharing settings. This option allows users above another user in the role hierarchy to have access to records owned by or shared with users below them in the hierarchy. References:

## NEW QUESTION # 122

An administrator would like to know if any other administrators or delegated administrators are using the Log In As a User feature. Where the administrators should be using the Log in As a User feature.

- A. Setup Audit Trail
- B. **Grant Account Login Access**
- C. Connected App Usage
- D. Login History

**Answer: B**

## NEW QUESTION # 123

Cloud Kicks uses a Review junction object to track product reviews by account. The Review object has a Master-Detail relationship to Account and a Master-Detail relationship to a customer Product object. A user accidentally deleted the Account, Product, and related Review records.

How should the deleted Review records be restored?

- A. Restore the Review junction object record from the Recycle Bin.
- B. Restore either the Account or Product master records from the Recycle Bin.
- C. The Review object records are permanently deleted without the ability to restore.
- D. **Restore both the Account and Product master records from the Recycle Bin.**

**Answer: D**

Explanation:

Explanation

To restore the deleted Review records, you need to restore both the Account and Product master records from the Recycle Bin. A master-detail relationship is a type of relationship that links two objects together and enforces a parent-child relationship between them. A master-detail relationship affects the security and deletion of the child records. If you delete a master record, all of its detail and subdetail records are deleted as well and moved to the Recycle Bin. To restore a detail or subdetail record, you must first restore its parent record.
