

Nutanix NCP-CN Exam Questions [2026] Right Preparation Material

P.S. Free 2026 Nutanix NCP-CN dumps are available on Google Drive shared by Prep4sureGuide: <https://drive.google.com/open?id=1oRgZXceXBatZy5SqKXFIHCpqg8WqQVQc>

What is more difficult is not only passing the Nutanix NCP-CN Certification Exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the Nutanix Certified Professional - Cloud Native v6.10 certification. If you are going through the same tough challenge, do not worry because Nutanix is here to assist you.

The accuracy rate of Prep4sureGuide NCP-CN exam certification training materials is high with wide coverage. It not only can improve your cultural knowledge, but also improve your operation level. It not only makes you become IT elite, but also make you have a well-paid job that others admire. Before buying our NCP-CN Certification Training materials, you can download NCP-CN free demo and answers on probation on Prep4sureGuide website.

Free PDF 2026 Nutanix NCP-CN: Newest Exam Nutanix Certified Professional - Cloud Native v6.10 Prep

Are you an exam jittering? Are you like a cat on hot bricks before your driving test? Do you have put a test anxiety disorder? If your answer is yes, we think that it is high time for you to use our NCP-CN Exam Question. Our study materials have confidence to help you pass exam successfully and get related certification that you long for, and we can guarantee that if you don't pass the exam, we will give you full refund.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q68-Q73):

NEW QUESTION # 68

A company recently deployed NKP. A Platform Engineer was asked to attach the existing Amazon EKS. A workspace and project were created accordingly, and resource requirements were met. What does the engineer need to do first to prepare the EKS

clusters?

- A. Configure HAProxy to get connected to EKS clusters.
- B. Configure a ConfigMap according to EKS configuration.
- C. Deploy cert-manager in the EKS clusters.
- **D. Create a service account with cluster-admin permissions.**

Answer: D

Explanation:

Attaching an existing Amazon EKS cluster to NKP for fleet management involves integrating the cluster into NKP's management plane, which requires specific preparatory steps. The NKPA course outlines that the first step is to create a service account with cluster-admin permissions in the EKS cluster. This service account is used by NKP to authenticate and manage the cluster, enabling operations like monitoring, scaling, and application deployment.

The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide explains: "To attach an external Kubernetes cluster, such as Amazon EKS, to NKP, a service account with cluster-admin role bindings must be created to allow NKP to interact with the cluster's API server." The service account is configured with a token that NKP uses to authenticate requests. The NKPA course provides detailed steps, including creating the service account, assigning the cluster-admin ClusterRole, and generating a token for NKP integration. This step is critical to ensure NKP has the necessary permissions to manage the EKS cluster.

Incorrect Options:

- * A. Configure a ConfigMap according to EKS configuration: While ConfigMaps may be used for specific configurations, they are not the first step for attaching an EKS cluster. The NKPA course prioritizes service account creation.
- * C. Configure HAProxy to get connected to EKS clusters: HAProxy is a load balancer, not required for attaching EKS clusters to NKP. EKS uses AWS-native load balancers, and NKP connects via the Kubernetes API.
- * D. Deploy cert-manager in the EKS clusters: Cert-manager is used for certificate management, not a prerequisite for attaching EKS clusters. The NKPA course does not list it as a required step.

NEW QUESTION # 69

A Kubernetes administrator needs to deploy a new Kubernetes cluster into a new workspace. This cluster requires a predictive analytics solution that detects current and future anomalies. Which option does the administrator need to deploy after the cluster is ready?

- A. NKP AI Navigator
- B. NCM Intelligent Ops
- **C. NKP Insights**
- D. Nutanix Pulse

Answer: C

NEW QUESTION # 70

A Kubernetes administrator needs to deploy a new NKP deployment for a DR Datacenter. Cluster information:

AOS 6.10

Hypervisor is AHV

Six NX-8170-G9 Nodes Which command should the administrator use to invoke the prompt-based CLI deployment method?

- A. `nkp create cluster nutanix`
- B. `nkp create nodepool nutanix`
- **C. `nkp create cluster ahv`**
- D. `nkp install kommander`

Answer: C

NEW QUESTION # 71

A Platform Engineer would like to install some NKP applications, but with a few modifications to the default configuration specs of some of the components. Additionally, Velero itself can be disabled, as the company already utilizes a different backup utility for Kubernetes.

Which procedure would the engineer utilize to accomplish these goals when deploying the applications?

- A. Execute `nkp config kommander`.
Disable Velero in the resulting output file and set the custom specs for the components to be modified.
Deploy the NKP applications using the `nkp install kommander` command, specifying the output file.
- B. Execute `nkp config kommander --init` to an output file.
Disable Velero in the output file and set the custom specs for the components to be modified.
Deploy the applications using the `helm install` command, specifying the output file.
- C. Execute `nkp install kommander --init` to an output file.
Set the custom specs for the components to be modified in the output file.
Deploy the NKP applications using the `nkp install kommander` command, specifying the output file.
Once the NKP applications install has completed, execute `kubectl delete hr -n kommander velero`.
- **D. Execute `nkp install kommander --init` to an output file.**
Disable Velero in the output file and set the custom specs for the components to be modified.
Deploy the NKP applications using the `nkp install kommander` command, specifying the output file.

Answer: D

Explanation:

The NKPA 6.10 documentation confirms that the proper method to customize application deployment (including disabling Velero) is by generating a configuration file using the `nkp install kommander --init` command. The file can then be modified to set custom specs and disable Velero, and finally deployed using the `nkp install kommander` command.

Exact extract:

"Generate a custom configuration file using `--init`, modify it for your specific environment (including disabling Velero), and deploy with the same `nkp install kommander` command." Reference:

Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Customizing Kommander Installation" NCP-CN 6.10 Study Guide - "Deploying and Customizing NKP Applications"

NEW QUESTION # 72

When deploying NKP using the Nutanix provisioning method (CAPX), what are the supported OS platforms?

- **A. Rocky Linux and Ubuntu**
- B. CentOS and Ubuntu
- C. Flatcar, Rocky Linux, and Ubuntu
- D. CentOS and Rocky Linux

Answer: A

NEW QUESTION # 73

.....

Are you still worrying about the high difficulty to pass Nutanix certification NCP-CN exam? Are you still sleeplessly endeavoring to review the book in order to pass Nutanix NCP-CN Exam Certification? Do you want to pass Nutanix NCP-CN exam certification faster? Be quick to select our Prep4sureGuide! Having it can quickly fulfill your dreams.

Fresh NCP-CN Dumps: <https://www.prep4sureguide.com/NCP-CN-prep4sure-exam-guide.html>

Our services before, during and after the clients use our NCP-CN certification material are considerate, In addition to the Nutanix NCP-CN PDF questions, we offer desktop NCP-CN practice exam software and web-based NCP-CN practice test to help applicants prepare successfully for the actual Nutanix Certified Professional - Cloud Native v6.10 exam, Moreover, we have a NCP-CN practice test software for a NCP-CN exam prep that allows you to go through real feel of an exam.

In this article, Using Facebook author Patrice-Anne Rutledge shows you seven great NCP-CN ways to develop your Facebook fan base, This state suggests to the browser that it shouldn't preload the resource until the user activates the controls.
