People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the certification exam and get some certificate. The 350-601 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our 350-601 Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

## Cisco CCIE Data Center

From the name, one can argue that CCIE Data Center is the expert-level version of the above-mentioned CCNP Data Center certificate, and rightly so. This is an advanced-level certification that confirms your expert mastery of planning, designing, implementing, and managing complex data center infrastructure in modern IT environments. Here, the exam candidates play a crucial role in harnessing advanced domain knowledge and emerging technologies to satisfy the business goals. To earn such a designation, you will have to nail 350-601 Exam alongside the lab CCIE Data Center v3.0 test.

## New Release 350-601 Questions - Cisco 350-601 Exam Dumps

In today's world, the Implementing Cisco Data Center Core Technologies (350-601 DCCOR) (350-601) certification exam has become increasingly popular, providing professionals with the opportunity to upskill and stay competitive in the tech industry. At VCE4Dumps, we understand the importance of obtaining the Cisco 350-601 Certification in the Cisco sector, where technological advancements constantly evolving.

The Cisco 350-601 exam is made up of 90-110 questions, and the candidate has 120 minutes to complete it. 350-601 exam assesses the candidate's ability to implement and manage data center technologies, including network virtualization, storage networking, automation, and security. 350-601 exam also tests the candidate's knowledge of Cisco data center solutions, such as Cisco UCS, Cisco ACI, and Cisco Nexus.

Cisco 350-601 DCCOR exam is designed for IT professionals who are interested in obtaining the Cisco Certified Specialist - Data Center Core certification. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification validates the candidate's knowledge and skills in implementing data center technologies, including network, compute, storage, and security. Passing 350-601 Exam is a requirement for obtaining the certification and can help IT professionals advance their careers in data center technology.

### Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q115-Q120):

#### NEW QUESTION # 115

An engineer must configure OSPF in the data center. The external routes have already been redistributed OSPF. The network must meet these criteria:

- \* The data centre servers must reach services in the cloud and the services behind the redistributed routes.
- \* The exit point toward the internet should be propagated only when there is a dynamically learned default route from the upstream router.

Which feature is required?

- A. Default-information originate always
- B. Stubby area
- C. Default-information originate
- D. Totally stubby area

**Answer: A**

#### NEW QUESTION # 116

An engineer must implement a Cisco UCS system at a customer site. One of the requirements is to implement SAN boot. The storage system maps the source WWPN to a unique LUN.

Which method does Cisco recommend to configure the SAN boot?

- A. Create a SAN boot policy in which every initiator is mapped to a different target LUN.
- B. Define the vHBAs as bootable and leave the boot target definition empty.
- C. Define the vHBAs as bootable and leave the default values on the boot target definition.
- D. Create a SAN boot policy in which every initiator is mapped to the same target LUN.

**Answer: D**

Explanation:

We recommend that you use a SAN boot policy, because it offers the most service profile mobility within the system.

If you boot from the SAN, when you move a service profile from one server to another, the new server boots from exactly the same operating system image. Therefore, the new server appears to be exactly the same server to the network.

#### NEW QUESTION # 117

An engineer is implementing OTV on a transport that supports multicast. The solution needs to meet the following requirements:

- Establish adjacency to the remote peer by using multicast.
- Enable OTV advertisements for VLAN 100 to the other site.

Which two commands should be configured to meet these requirements? (Choose two.)

- A. **otv control-group 232.1.1.1**
- B. otv data-group 232.2.2.0/28
- C. otv use-adjacency-server 172.27.255.94
- D. **otv extend-vlan 100**
- E. otv site-vlan 100

**Answer: A,D**

Explanation:

The otv data-group command is used to pass the data multicast traffic if there's any. While otv control-group is used to form an adjacency with other TEPs. otv extend <vlan> command is used to enable OTV advertisements for this vlan.

### NEW QUESTION # 118

An engineer must configure HSRP protocol on two Cisco Nexus 9000 Series Switches running a virtual port channel. In addition, the HSRP implementation must meet these requirements:

It must allow more than 500 groups.

switch 1 must act as the primary switch.

Both switches must use a user-defined hardware address.

Drag and drop the commands from the right to complete a configuration of the HSRP on the left. The commands are used more than once. Not all commands are used.

**Answer:**

Explanation:

### NEW QUESTION # 119

Which protocol does Cisco Hyperflex use to share data among nodes in a VMware vSphere environment?

- A. CIFS
- B. **NFS**
- C. FCoE
- D. SMB

**Answer: B**

Explanation:

Cisco HyperFlex uses the Network File System (NFS) protocol for sharing data among nodes in a VMware vSphere environment. NFS is a distributed file system protocol that allows a user on a client computer to access files over a network in a manner similar to how local storage is accessed. This protocol is commonly used in virtualized environments for ease of data sharing and management.

References: The use of NFS in Cisco HyperFlex environments is documented in Cisco's official installation guides and design documents
