## CIPM Prüfung Torrent

Die Konkurrenz in der IT-Branche im 21. Jahrhundert ist sehr hart. Natürlich ist die IAPP CIPM Zertifizierungsprüfung zu einer sehr beliebten Prüfung im IT-Bereich geworden. Immer mehr Menschen beteiligen sich an der CIPM Prüfung. Die Prüfung zu bestehen, ist auch der Traum der ambitionierten IT-Fachleuten.

Die Zertifizierung zum Certified Information Privacy Manager (CIPM) der International Association of Privacy Professionals (IAPP) ist eine der bekanntesten und angesehensten Zertifizierungen im Bereich Datenschutz. Diese Prüfung richtet sich an Datenschutzexperten, die für die Verwaltung von Datenschutzprogrammen, -richtlinien und -verfahren in einer Organisation verantwortlich sind. Die CIPM-Zertifizierung zeigt das Wissen und Verständnis des Datenschutzexperten für Datenschutzgesetze und -vorschriften sowie dessen Fähigkeit, Datenschutzprogramme effektiv umzusetzen und zu verwalten.

## IAPP Certified Information Privacy Manager (CIPM) CIPM Prüfungsfragen mit Lösungen (Q87-Q92):

### 87. Frage

As a Data Protection Officer, one of your roles entails monitoring changes in laws and regulations and updating policies accordingly. How would you most effectively execute this responsibility?

- A. Consult an external lawyer.
- B. Attend workshops and interact with other professionals.
- C. Regularly engage regulators.
- D. **Subscribe to email list-serves that report on regulatory changes.**

**Antwort: D**

Begründung:

As a Data Protection Officer (DPO), one of the most effective ways to execute your responsibility of monitoring changes in laws and regulations and updating policies accordingly is to subscribe to email list-serves that report on regulatory changes. Email list-serves are online mailing lists that allow subscribers to receive regular updates on topics or issues of interest via email<sup>7</sup> By subscribing to email list-serves that report on regulatory changes, you can stay informed of the latest developments and trends in the regulatory environment that affect your organization and its data protection practices. You can also access relevant information and resources from reliable sources, such as regulatory agencies, law firms, industry associations, or experts<sup>8</sup> This can help you to identify and analyze the impact of regulatory changes on your organization and its data processing activities, and to update your policies and procedures accordingly to ensure compliance<sup>8</sup> Some examples of email list-serves that report on regulatory changes are:

The ICO Newsletter: This is a monthly newsletter from the UK Information Commissioner's Office (ICO) that provides updates on data protection news, guidance, events, consultations, and enforcement actions<sup>9</sup> The Privacy Advisor: This is a monthly newsletter from the International Association of Privacy Professionals (IAPP) that covers global privacy news, analysis, and insights<sup>10</sup> The Privacy & Data Security Law Journal: This is a monthly journal from LexisNexis that provides articles and case notes on privacy and data security law issues from around the world<sup>11</sup> The Data Protection Report: This is a blog from Norton Rose Fulbright that provides updates and commentary on data protection and cybersecurity developments across various jurisdictions<sup>12</sup>

7: What is a listserv?; 8: 5 Practical Ways to Keep Up with Regulatory Changes; 9: ICO Newsletter; 10: The Privacy Advisor; 11: Privacy & Data Security Law Journal; 12: Data Protection Report

### 88. Frage

How do privacy audits differ from privacy assessments?

- A. They are based on standards.
- B. They are conducted by external parties.
- C. **They are evidence-based.**
- D. They are non-binding.

**Antwort: C**

Begründung:

Privacy audits differ from privacy assessments in that they are evidence-based, meaning that they rely on objective and verifiable data to evaluate the compliance and effectiveness of the privacy program. Privacy assessments, on the other hand, are based on standards, meaning that they use a set of criteria or best practices to measure the performance and maturity of the privacy program. Privacy audits are usually conducted by external parties, while privacy assessments can be done internally or externally. Reference: CIPM Body of Knowledge, Domain III: Privacy Program Operational Life Cycle, Section A: Assess, Subsection 1: Privacy

Assessments and Audits.

### 89. Frage

In privacy protection, what is a "covered entity"?

- A. A privacy office or team fully responsible for protecting personal information.
- B. Hidden gaps in privacy protection that may go unnoticed without expert analysis.
- C. Personal data collected by a privacy organization.
- **D. An organization subject to the privacy provisions of HIPAA.**

**Antwort: D**

Begründung:

Explanation

A covered entity is an organization that is subject to the privacy provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996. HIPAA regulates how covered entities use and disclose protected health information (PHI) of individuals. Covered entities include health plans, health care clearinghouses, and health care providers that transmit health information electronically. References: [HIPAA for Professionals], [What is a Covered Entity?]

### 90. Frage

Which of the following controls does the PCI DSS framework NOT require?

- **A. Implement strong asset control protocols.**
- B. Maintain a vulnerability management program.
- C. Maintain an information security policy.
- D. Implement strong access control measures.

**Antwort: A**

Begründung:

The PCI DSS framework does not require implementing strong asset control protocols. Asset control protocols are policies and procedures that govern how an organization manages its physical and digital assets, such as inventory, equipment, software, data, etc. Asset control protocols may include aspects such as identification, classification, valuation, tracking, maintenance, disposal, etc. Asset control protocols are important for ensuring the security and integrity of an organization's assets, but they are not part of the PCI DSS framework.

### 91. Frage

SCENARIO

Please use the following to answer the next QUESTION:

Martin Briseño is the director of human resources at the Canyon City location of the U.S. hotel chain Pacific Suites. In 1998, Briseño decided to change the hotel's on-the-job mentoring model to a standardized training program for employees who were progressing from line positions into supervisory positions. He developed a curriculum comprising a series of lessons, scenarios, and assessments, which was delivered in-person to small groups. Interest in the training increased, leading Briseño to work with corporate HR specialists and software engineers to offer the program in an online format. The online program saved the cost of a trainer and allowed participants to work through the material at their own pace.

Upon hearing about the success of Briseño's program, Pacific Suites corporate Vice President Maryanne Silva-Hayes expanded the training and offered it company-wide. Employees who completed the program received certification as a Pacific Suites Hospitality Supervisor. By 2001, the program had grown to provide industry-wide training. Personnel at hotels across the country could sign up and pay to take the course online.

As the program became increasingly profitable, Pacific Suites developed an offshoot business, Pacific Hospitality Training (PHT). The sole focus of PHT was developing and marketing a variety of online courses and course progressions providing a number of professional certifications in the hospitality industry.

By setting up a user account with PHT, course participants could access an information library, sign up for courses, and take end-of-course certification tests. When a user opened a new account, all information was saved by default, including the user's name, date of birth, contact information, credit card information, employer, and job title. The registration page offered an opt-out choice that users could click to not have their credit card numbers saved. Once a user name and password were established, users could return

to check their course status, review and reprint their certifications, and sign up and pay for new courses. Between 2002 and 2008, PHT issued more than 700,000 professional certifications.

PHT's profits declined in 2009 and 2010, the victim of industry downsizing and increased competition from e-learning providers. By 2011, Pacific Suites was out of the online certification business and PHT was dissolved. The training program's systems and records remained in Pacific Suites' digital archives, unaccessed and unused. Briseño and Silva-Hayes moved on to work for other companies, and there was no plan for handling the archived data after the program ended. After PHT was dissolved, Pacific Suites executives turned their attention to crucial day-to-day operations. They planned to deal with the PHT materials once resources allowed.

In 2012, the Pacific Suites computer network was hacked. Malware installed on the online reservation system exposed the credit card information of hundreds of hotel guests. While targeting the financial data on the reservation site, hackers also discovered the archived training course data and registration accounts of Pacific Hospitality Training's customers. The result of the hack was the exfiltration of the credit card numbers of recent hotel guests and the exfiltration of the PHT database with all its contents.

A Pacific Suites systems analyst discovered the information security breach in a routine scan of activity reports. Pacific Suites quickly notified credit card companies and recent hotel guests of the breach, attempting to prevent serious harm. Technical security engineers faced a challenge in dealing with the PHT data.

PHT course administrators and the IT engineers did not have a system for tracking, cataloging, and storing information. Pacific Suites has procedures in place for data access and storage, but those procedures were not implemented when PHT was formed. When the PHT database was acquired by Pacific Suites, it had no owner or oversight. By the time technical security engineers determined what private information was compromised, at least 8,000 credit card holders were potential victims of fraudulent activity.

How was Pacific Suites responsible for protecting the sensitive information of its offshoot, PHT?

- A. As the parent company, it should have ensured its existing data access and storage procedures were integrated into PHT's system
- B. As the parent company, it should have transferred personnel to oversee the secure handling of PHT's data.
- C. As the parent company, it should have replaced PHT's electronic files with hard-copy documents stored securely on site.
- D. As the parent company, it should have performed an assessment of PHT's infrastructure and confirmed complete separation of the two networks.

**Antwort: A**
