## Valid Salesforce Salesforce-Data-Cloud Dumps Demo, Salesforce-Data-Cloud Complete Exam Dumps

Our Prep4sures Salesforce-Data-Cloud exam certification training material is the collection of experience and innovation results of highly certified IT professionals in IT industry. We guarantee that after you buy Prep4sures Salesforce-Data-Cloud certification exam training materials, we will provide free renewal service for one year. If Salesforce-Data-Cloud Exam Certification training materials have any quality problem or you fail Salesforce-Data-Cloud exam certification, we will give a full refund unconditionally.

## Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q106-Q111):

### NEW QUESTION # 106

A customer has requested that their personal data be deleted. Which action should be performed to accommodate this request in Data Cloud?

- A. Use Consent API to request deletion of the customer's information
- B. Utilize the Data Rights Subject Request tool to request deletion of the customer's information
- C. Use Ingestion API to request deletion of the customer's information
- D. Manually delete customer and related records using the Profile Explorer

**Answer: A**

Explanation:

This action should be performed to accommodate the request to delete personal data in Data Cloud. The Consent API allows you to set a consent flag for an individual that prevents further processing of their data and deletes their records from source data streams. References: [https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_consent\\_api.htm&type=](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_consent_api.htm&type=)

#### **NEW QUESTION # 107**

A consultant needs to update a field in CRM as soon as a record gets updated in the DMO. Which feature should the consultant use?

- **A. Data actions**
- B. Rapid segments
- C. Data share target
- D. Streaming data transform

**Answer: A**

Explanation:

When a record in the Data Model Object (DMO) is updated, Data Actions can be used to immediately trigger updates in an external system like Salesforce CRM.

Data Actions allow for real-time or near-real-time updates to external systems.

When a record in the DMO is updated, a Data Action can push updates to CRM fields.

This ensures that CRM always reflects the latest Data Cloud updates without manual intervention.

Why Not A?

Data Share Targets are used for sharing data externally (e.g., Snowflake) but do not update CRM fields directly.

Why Not C?

Rapid Segments are used for fast audience segmentation, not for updating CRM fields.

Why Not D?

Streaming Data Transforms are used for real-time data processing, but they do not update CRM fields directly.

#### **NEW QUESTION # 108**

Which data stream category should be assigned to use the data for time-based operations in segmentation and calculated insights?

- A. Sales Order
- B. Individual
- **C. Transaction**
- D. Engagement

**Answer: C**

Explanation:

The transaction data stream category should be assigned to use the data for time-based operations in segmentation and calculated insights. This category indicates that the data stream contains events that occur at a specific point in time and have a duration.

References:

[https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_data\\_stream\\_category.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_data_stream_category.htm&type=5)

#### **NEW QUESTION # 109**

An organization is looking to use Data Cloud to unify data across 5 Salesforce orgs, 2 Marketing Cloud accounts, 6 Amazon S3 Buckets, and 4 Personalization datasets. As far as connection limits are concerned, which platform is going to present a challenge?

- A. Personalization
- B. Salesforce CRM

- C. Amazon S3 Bucket
- D. Marketing Cloud

**Answer: D**

Explanation:

This platform is going to present a challenge in terms of connection limits for Data Cloud. Data Cloud supports up to 3 Marketing Cloud connections per org, which means that only 3 Marketing Cloud accounts can be connected as data sources or activation targets. The other platforms have higher or no limits for connections. Reference: [https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_limits.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_limits.htm&type=5)

#### NEW QUESTION # 110

Which of the following cannot be used in Segmentation? (Choose 2)

- A. Text Measures
- B. Date Time Measures
- C. Numeric Measures
- D. Aggregate Functions

**Answer: A,B**

Explanation:

Text Measures and Date Time Measures cannot be used in Segmentation. Segmentation is the process of creating filtered audience segments based on calculated insights. Calculated insights are metrics that define and calculate multidimensional measures on your data. Only Numeric Measures can be used as calculated insights, because they can be aggregated using functions such as SUM, AVG, MIN, MAX, or COUNT. Text Measures and Date Time Measures are not types of measures, but types of dimensions. Dimensions are fields that can be used to group or filter data, but not to perform calculations. Reference: Measures and Dimensions

#### NEW QUESTION # 111

.....

Salesforce-Data-Cloud exam dumps provided by Prep4sures are tested through practice, and are the most correct and the newest practical Salesforce-Data-Cloud test dumps. Our Prep4sures can provide accurate Salesforce-Data-Cloud certification training questions based on extensive research and the experience of real world to make you pass Salesforce-Data-Cloud Certification Exam in a short time.
