ANVE Exam Material - ANVE Valid Exam Online

Our Axis learning materials contain latest test questions, valid answers and professional explanations, which ensure you hold ANVE actual test with great confidence. And we will provide you with the most comprehensive service when you prepare ANVE Practice Exam with our valid dumps collection.

Axis ANVE Certification program is an important credential for professionals who wish to demonstrate their expertise in the field of

network video surveillance. The program covers a wide range of topics related to network video technology and is recognized globally. Axis Network Video Exam certification is ideal for professionals who work in the areas of sales, installation, or maintenance of network video surveillance systems, as well as security consultants and system integrators.

Axis Network Video Exam Sample Questions (Q181-Q186):

NEW QUESTION # 181

Match the product series with right product. Drag each gray box from the left column to the matching image box in the right column.

Answer:

Explanation:

Explanation:

Reference: <http://www.axis.com/products/video/camera/index.htm> (see the cameras series at the bottom of the page)

NEW QUESTION # 182

Which of the following conditions has to be met to use multicast streaming?

- A. The client has to run AXIS Camera Management or AXIS Camera Station
- B. The video device needs to run on firmware version 5.20 or higher
- C. The client has to support streaming over RTSP
- **D. The network infrastructure has to support multicast**

Answer: D

NEW QUESTION # 183

When choosing a camera for extreme low temperature environments, how would Arctic Temperature Control ensure camera longevity?

- A. The product is protected against extreme temperatures
- B. The product is always kept cold
- C. The product can handle low ambient temperatures
- **D. The product performs a stepped start-up at low ambient temperature**

Answer: D

Explanation:

Arctic Temperature Control is a feature designed to ensure the longevity and reliable performance of network cameras in extremely low-temperature environments. This feature allows the camera to perform a stepped start-up at low ambient temperatures, gradually warming up the camera to avoid potential damage caused by sudden exposure to extreme cold. This controlled start-up process helps protect the camera's internal components and ensures consistent performance. Therefore, option D is correct. For more detailed information, refer to Axis Communications' product documentation on Arctic Temperature Control technology.

NEW QUESTION # 184

When choosing a camera for extreme low temperature environments, how would Arctic Temperature Control ensure camera longevity?

- A. The product is protected against extreme temperatures
- B. The product is always kept cold
- C. The product can handle low ambient temperatures
- **D. The product performs a stepped start-up at low ambient temperature**

Answer: D

NEW QUESTION # 185

Which cameras have IR LED illumination built-in? (select two)

- A. AXISQ3615-VE
- B. AXISQ1951-E
- C. AXISM1135-E
- D. **AXIS M3057-PLVE MkII**
- E. AXIS P1378-LE

Answer: D

Explanation:

AXIS M3057-PLVE MkII and AXIS P1378-LE both have built-in IR LED illumination. This feature is crucial for enhancing visibility in low-light conditions or complete darkness, making them suitable for various surveillance applications. The built-in IR LEDs ensure that these cameras can provide clear images even in challenging lighting environments. References: AXIS M3057-PLVE MkII, AXIS P1378-LE
