We emphasize on customers satisfaction, which benefits both exam candidates and our company equally. By developing and nurturing superior customers value, our company has been getting and growing more and more customers. To satisfy the goals of exam candidates, we created the high quality and high accuracy CISSP real materials for you. By experts who diligently work to improve our practice materials over ten years, all content are precise and useful and we make necessary alternations at intervals.

The ISC Foundation Exam

The ISC credential is divided into four levels: Professional Certified Security Analyst (PCSA), Associate Certified Security Analyst (ACSA), Certified Information Systems Security Professional (CISSP), and Master Certified Information Systems Security Professional (MCISSP). The Professional level normally requires six exams to achieve, while associate requires six exams to achieve. The Associate exam is an objective test that candidates can prepare by **CISSP Dumps** and can take online or skype, while professional exam candidates only have access to one option. Candidates are able to earn up to 12 continuing education units through their participation in the ISSA ISC2 Security Forum of Interest Community of Interest (COI) and 16 continuing education units through their participation in the IT Security Resources Community of Interest (CIOI).

Total Number of Questions in the ISC CISSP Exam

The number of questions is 100-150.

ISC CISSP Certification Exam is considered one of the most challenging certifications in the field of information security. CISSP exam is designed to test the candidate's knowledge and skills in various domains of information security, and the passing score is determined by a rigorous evaluation process. CISSP exam consists of 250 multiple-choice questions that must be completed within six hours. CISSP exam is computer-based and is administered at Pearson VUE Testing Centers worldwide.

As long as you click into the link of our CISSP Learning Engine, you will find that our CISSP practice quiz are convenient and perfect!

ISC Certified Information Systems Security Professional (CISSP) Sample

Questions (Q881-Q886):

NEW QUESTION # 881

At what Orange Book evaluation levels are design specification and verification first required?

- A. C2 and above.
- B. B2 and above.
- C. C1 and above.
- **D. B1 and above.**

Answer: D

Explanation:

Level B1 is the first to require design specification and verification and this would also be a requirement for all higher levels.

The following answers are incorrect:

C1 and above. Is incorrect because design specification and verification is not a requirement until level B1. C1 is a lower level.

C2 and above. Is incorrect because design specification and verification is not a requirement until level B1. C2 is a lower level.

B2 and above. Is incorrect because design specification and verification is a requirement of level B1. B2 is a higher level so would not address level B1.

NEW QUESTION # 882

Which of the following is the BEST method to prevent malware from being introduced into a production environment?

- A. Do not permit programs, patches, or updates from the Internet
- B. Purchase software from a limited list of retailers
- C. Verify the hash key or certificate key of all updates
- **D. Test all new software in a segregated environment**

Answer: D

Explanation:

Section: Software Development Security

NEW QUESTION # 883

Which of the following does the Clark-Wilson model NOT involve?

- A. Well-formed transactions
- **B. Confidentiality items**
- C. Transformational procedures
- D. Constrained data items

Answer: B

Explanation:

The correct answer is Confidentiality items. The other answers are parts of the Clark- Wilson model.

NEW QUESTION # 884

When network management is outsourced to third parties, which of the following is the MOST effective method of protecting critical data assets?

- A. Provide links to security policies
- **B. Employ strong access controls**
- C. Log all activities associated with sensitive systems
- D. Confirm that confidentiality agreements are signed

Answer: B

NEW QUESTION # 885

Which of the following reviews system and event logs to detect attacks on the host and determine if the attack was successful?

- A. bastion-based IDS
- **B. host-based IDS**
- C. server-based IDS
- D. firewall-based IDS

Answer: B

Explanation:

A host-based IDS can review the system and event logs in order to detect an attack on the host and to determine if the attack was successful.
