## **PECB NIS-2-Directive-Lead-Implementer New Soft Simulations | NIS-2-Directive-Lead-Implementer Study Center**

After you pass the test NIS-2-Directive-Lead-Implementer certification, your working abilities will be recognized by the society and you will find a good job. If you master our NIS-2-Directive-Lead-Implementer quiz torrent and pass the exam it proves that you have excellent working abilities and can be suitable for a good job. You will earn a high salary in a short time. Besides, you will get a quick promotion in a short period because you have excellent working abilities and can do the job well. You will be respected by your colleagues, your boss, your relatives, your friends and the society. All in all, buying our NIS-2-Directive-Lead-Implementer Test Prep can not only help you pass the exam but also help realize your dream about your career and your future. So don't be hesitated to buy our NIS-2-Directive-Lead-Implementer exam materials and take action immediately.

## PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Scenario 6: Solicure is a leading pharmaceutical company dedicated to manufacturing and distributing essential medications. Thriving in an industry characterized by strict regulations and demanding quality benchmarks, Solicure has taken proactive steps to adhere to the requirements of the NIS 2 Directive. This proactive approach strengthens digital resilience and ensures the continued excellence of product offerings.

Last year, a cyberattack disrupted Solicure's research and development operations, raising concerns about the potential compromise of sensitive information regarding drug formulation. Solicure initiated an immediate investigation led by its cybersecurity team, gathering technical data to understand the attackers' methods, assess the damage, and swiftly identify the source of the breach. In addition, the company implemented measures to isolate compromised systems and remove the attackers from its network. Lastly, acknowledging the necessity for long-term security improvement, Solicure implemented a comprehensive set of security measures to comply with NIS 2 Directive requirements, covering aspects such as cybersecurity risk management, supply chain security, incident handling, crisis management, and cybersecurity crisis response planning, among others.

In line with its crisis management strategy, Solicure's chief information security officer, Sarah, led the initiative to develop a comprehensive exercise plan to enhance cyber resilience. This plan was designed to be adaptable and inclusive, ensuring that organizational decision-makers possessed the essential knowledge and skills required for effective cybersecurity threat mitigation. Additionally, to enhance the efficacy of its crisis management planning, Solicure adopted an approach that prioritized the structuring of crisis response.

A key aspect of Solicure's cybersecurity risk management approach centered on the security of its human resources. Given the sensitive nature of its pharmaceutical products, the company placed utmost importance on the employees' backgrounds. As a result, Solicure implemented a rigorous evaluation process for new employees, including criminal history reviews, prior role investigations, reference check, and pre-employment drug tests.

To comply with NIS 2 requirements, Solicure integrated a business continuity strategy into its operations. As a leading provider of life-saving medicines and critical healthcare products, Solicure faced high stakes, with potential production and distribution interruptions carrying life-threatening consequences for patients. After extensive research and consultation with business management experts, the company decided to utilize a secondary location to reinforce the critical operations at the primary site. Along with its business continuity management strategy, Solicure developed a set of procedures to recover and protect its IT infrastructure in the event of a disaster and ensure the continued availability of its medications.

Does Solicure effectively handle cyber crises, including all necessary steps? Refer to scenario 6.

- A. Yes, Solicure effectively follows all necessary steps
- B. No, Solicure primarily focuses on investigation and overlooks other crucial steps in handling a cyber crisis
- C. No, Solicure does not communicate with stakeholders during a cyber crisis, focusing only on technical measures

**Answer: A**

### NEW QUESTION # 48

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest

standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, which of the following approaches was used by SafePost to analyze market forces and opportunities?

- A. SWOT analysis
- B. Porter's Five Forces analysis
- C. PEST analysis

**Answer: C**

#### **NEW QUESTION # 49**

What is the role of the Commission within the Union Civil Protection Mechanism regarding cybersecurity situational awareness?

- A. Coordinate international cybersecurity collaborations
- B. Provide analytical reports on diverse areas
- C. Develop cybersecurity policies for Member States

**Answer: B**

#### **NEW QUESTION # 50**

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on scenario 2, are the cooperative evaluations of security risks carried out in alignment with Article 22 of the NIS 2 Directive?

- A. No, cooperative evaluations should be done by the Cooperation Group, Commission, and ENISA
- B. No, cooperative evaluations should be done by direct suppliers and service providers
- C. Yes, cooperative evaluations are carried out in accordance with Article 22

**Answer: C**

#### **NEW QUESTION # 51**

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes

that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on scenario 2, in order to avoid creating additional processes that do not fit with the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. Is this in accordance with best practices?

- A. No, organizations should create other processes in addition to the existing processes to ensure full compliance with the NIS 2 Directive
- B. No, organizations should disregard existing processes completely and create new ones to ensure full compliance with the NIS 2 Directive
- C. Yes, organizations should incorporate the NIS 2 Directive into their existing processes

**Answer: C**
