NEW QUESTION # 63
John Smith developed a Genesys Cloud CX web application that is currently being used successfully by thousands of agents in North America at Global Software Company Recently, Global Software Company decided to deploy the solution for its agents in Europe However, agents are not able to log in.
What is likely to be the cause?

- A. The Client ID has expired.
- B. The web app does not have an OAuth client created for that region.
- C. The OAuth client does not have the required scope.
- D. There is no client Secret associated to the OAuth client.

If a WebSocket gets closed due to any issue, the events sent by Genesys Cloud CX are automatically queued and sent once the WebSocket is open again.

- A. True
- B. False

Answer: B

Explanation:
In Genesys Cloud CX, if a WebSocket connection is closed due to any issue, events are not automatically queued and sent once the WebSocket is reopened. Instead, the client is responsible for detecting the disconnection and re-establishing the connection.
