question patterns pointing towards various learners. Our company keeps pace with contemporary talent development and makes every learners fit in the needs of the society. Based on advanced technological capabilities, our SSM Study Materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied SSM exam guides to them. Our SSM exam prepare is definitely better choice to help you go through the test.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q80-Q85):

NEW QUESTION # 80
What is one way the Scrum Master/Team Coach can support the Inspect and Adapt?

- A. Host a brainstorm
- B. Supply templates
- C. Provide team data
- D. Create an agenda

Answer: C

Explanation:
In SAFe, the Inspect and Adapt (I&A) event provides the Agile Release Train (ART) with a structured opportunity to reflect, measure progress, and identify systemic improvements. The Scrum Master/Team Coach (SM/TC) plays a critical role in supporting this event by ensuring that each team's contribution is backed by meaningful, accurate data.
Providing team data-such as iteration metrics, team velocity, predictability, and performance against objectives-enables evidence-based discussions during the quantitative and qualitative measurement portion of the I&A. This transparency helps identify trends, validate outcomes, and support root cause analysis during the problem-solving workshop.
From SAFe guidance:
"Teams prepare quantitative and qualitative data for the Inspect and Adapt to provide objective insights into their performance and enable continuous improvement discussions." Thus, the correct answer is C. Provide team data, as it directly supports the empirical foundation of the I&A event.

NEW QUESTION # 81
What is the name of the event where all team members determine how much of the team's backlog they can commit to delivering during an upcoming iteration?

- A. solution planning
- B. iteration planning
- C. solution demo
- D. backlog refinement

Answer: B

NEW QUESTION # 82
What is an example of an anti-pattern a Scrum Master might face?

- A. A product owner representing the 'Voice of the Customer'
- B. Teams coordinate with other teams
- C. Teams that keep stories small to support team iteration
- D. Developers do not work collaboratively on stories

Answer: D

NEW QUESTION # 83
What is one organizing attribute that teams share with the other teams on their ART?

- A. Facilitation techniques amongst all meetings
- B. Synchronization to a common cadence
- C. Prioritization across all backlogs
- D. Simultaneous release in one pipeline

Answer: B

Explanation:
In the Scaled Agile Framework (SAFe), Agile Teams work together as part of an Agile Release Train (ART). One of the defining features that unites all teams within an ART is synchronization to a common cadence. This means all teams follow the same iteration schedule-planning, executing, reviewing, and retrospecting in harmony.
The common cadence provides a steady rhythm that simplifies coordination and dependency management across multiple teams. It ensures alignment by creating predictable, synchronized events such as PI Planning, System Demos, and Inspect & Adapt workshops. This synchronization allows cross-team integration and transparency, enabling teams to deliver coherent system-level increments and support scaled agility.
From SAFe guidance:
"Teams on the Agile Release Train (ART) align to a common cadence and synchronize their iterations, which facilitates system-level integration and provides regular opportunities for assessment and adaptation." Therefore, the correct answer is D. Synchronization to a common cadence, as it represents the key organizing attribute shared by all teams on an ART.

NEW QUESTION # 84
Where does a team document new practices they want to incorporate into the their collective skill set?

- A. Team Iteration Backlog
- B. PI Planning meeting post-meeting notes
- C. Inspect and Adapt workshop notes
- D. Improvement Roadmap

Answer: C

NEW QUESTION # 85
