Salesforce Certified Platform Administrator II Sample Questions (Q217-Q222):

NEW QUESTION # 217

DreamHouse Realty (DR) wants to ensure that its data is protected. There have been several recent attempts to phish employees. What should DR do to help ensure that the user that is logged in is the right user when the running user is trying to view reports and dashboards?

- A. Require a Username, Password, and Security Token when logging in.
- B. Set up an authentication provider for reports and dashboards.
- C. Require MFA when users need to view and export dashboards and reports.
- **D. Require a high assurance session when exporting or printing reports and dashboards.**

Answer: D

Explanation:

To help ensure that users who are viewing reports and dashboards are who they say they are, DR should require a high assurance session when exporting or printing reports and dashboards. A high assurance session requires users to verify their identity using multi-factor authentication before accessing sensitive data or functionality in Salesforce. References:

NEW QUESTION # 218

Users at AW Computing are receiving a duplicate message when they enter contacts with common first and last names. Management wants to improve the user experience but also keep the data Integrity of contacts. What should an administrator implement for this issue?

- A. Update the matching method on the rule from fuzzy to exact for First Name and Last Name.
- B. Change the duplicate rule to report Instead of alert so the message is avoided.
- **C. Include the Email field to the existing matching rule for a more exact match.**

- D. Add a secondary matching rule to the duplicate rule to match on the associated customer.

Answer: C

Explanation:

A matching rule is a rule that defines how records are compared for duplication based on certain fields or fuzzy logic. By including more fields or changing the matching method, you can make the matching rule more or less strict and reduce false positives or negatives. In this case, including the email field to the existing matching rule for contacts can help avoid duplicate messages for common names by checking if the email addresses are also identical. References: https://help.salesforce.com/s/articleView?id=sf.matching_rules_create.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.matching_rules_considerations.htm&type=5

NEW QUESTION # 219

At Ursa Major Solar, there is a custom object called Galaxy. The sales director wants users to only see certain field market. What Lightning will satisfy this requirement?

- A. Highlights Panel Component
- B. Path Component
- **C. Fields component**
- D. Record Detail Component

Answer: C

Explanation:

The Fields component is a Lightning component that allows administrators to display fields from a record on a Lightning page based on certain conditions or criteria. For example, administrators can use filter logic to show or hide fields based on field values or user profiles. In this case, the administrator can use the Fields component to display fields that only apply to condos based on the value of a field that indicates the type of property. References: https://help.salesforce.com/s/articleView?id=sf.lightning_app_builder_fields.htm&type=5

NEW QUESTION # 220

An administrator has been tasked with sending an email notification to all project team members when project status is changed to Allocated. Project teams contain users from different departments and different roles. How should an administrator ensure the proper users will receive the email?

- A. Use sharing rules to automatically share with the individual users in the project team.
- **B. Create public groups for each project team and send the email alert to the project group.**
- C. Move the project users to the same role and send the email alert to everyone in the role.
- D. Configure a queue for the project team and have members view the queue's list view.

Answer: B

Explanation:

Public groups let you share records with a set of users defined by criteria such as role, profile, or individual users. You can use public groups as recipients for email alerts in workflow rules or process builder.
