## 2026 Online NetSec-Pro Bootcamps | High-quality 100% Free NetSec-Pro Exam Cost

Through the Palo Alto Networks Certification NetSec-Pro Exam method has a lot of kinds, spend a lot of time and energy to review the Palo Alto Networks certification NetSec-Pro exam related professional knowledge is a kind of method, through a small amount of time and money VCEPrep choose to use the pertinence training and exercises is also a kind of method.

## Palo Alto Networks Network Security Professional Sample Questions (Q48-Q53):

### NEW QUESTION # 48

Which AI-powered solution provides unified management and operations for NGFWs and Prisma Access?

- A. Panorama

- B. Autonomous Digital Experience Manager (ADEM)
- **C. Strata Cloud Manager (SCM)**
- D. Prisma Access Browser

**Answer: C**

Explanation:

Strata Cloud Manager (SCM) offers a cloud-based unified management plane for both NGFWs and Prisma Access, enabling consistent policy enforcement, simplified management, and AI-driven operational insights.

"Strata Cloud Manager provides a single interface for unified management of NGFWs and Prisma Access, leveraging AI to optimize security operations and streamline workflows." (Source: Strata Cloud Manager Overview) Unlike Panorama, which is an on-premises management solution, SCM delivers cloud-based, AI-driven capabilities for centralized oversight.

#### NEW QUESTION # 49

Which two tools can be used to configure Cloud NGFWs for AWS? (Choose two.)

- **A. Panorama**
- B. Cortex XSIAM
- **C. Cloud service provider's management console**
- D. Prisma Cloud management console

**Answer: A,C**

Explanation:

Cloud NGFW for AWS can be configured using Panorama for centralized management, as well as the AWS management console for native integration and configuration.

You can configure Cloud NGFW for AWS using Panorama for centralized security management, or directly through the AWS management console to deploy and manage security services for your AWS resources.

#### NEW QUESTION # 50

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Add all regions that contain private IP addresses to the source address.
- B. Add a Dynamic Application Group to the Security policy.
- C. Set the service to be application-default.
- **D. Create a Security policy for the negated region with destination address "any".**

**Answer: D**

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

"When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops." (Source: Prisma Access Policy Best Practices) This ensures explicit inclusivity for the excluded region, maintaining reliable connectivity.

#### NEW QUESTION # 51

Which zone is available for use in Prisma Access?

- **A. Interzone**
- B. Clientless VPN
- C. DMZ
- D. Intrazone

**Answer: A**

Explanation:

In Prisma Access, the interzone security policy rule is available and plays a crucial role in controlling traffic between zones.

"You can configure an interzone rule to control traffic that flows between different zones in Prisma Access, enabling granular security policy enforcement." (Source: Prisma Access Security Policies) This ensures comprehensive control of traffic crossing security boundaries in the cloud-delivered architecture.

#### NEW QUESTION # 52

A network administrator obtains Palo Alto Networks Advanced Threat Prevention and Advanced DNS Security subscriptions for edge NGFWs and is setting up security profiles. Which step should be included in the initial configuration of the Advanced DNS Security service?

- A. Create overrides for all company owned FQDNs.
- **B. Configure DNS Security signature policy settings to sinkhole malicious DNS queries.**
- C. Enable Advanced Threat Prevention with default settings and only focus on high-risk traffic.
- D. Create a decryption policy rule to decrypt DNS-over-TLS / port 853 traffic.

**Answer: B**

Explanation:

Advanced DNS Security uses a signature policy to sinkhole malicious DNS queries and prevent them from resolving. The DNS Security service integrates with Anti-Spyware profiles, and you must configure signature policy settings to sinkhole malicious queries. This proactively stops traffic to known malicious domains.

Sinkholing ensures that DNS queries to malicious FQDNs are redirected to a safe IP, preventing compromise.

#### NEW QUESTION # 53

.....

There are various individuals who have never shown up for the Palo Alto Networks Network Security Professional certification test as of now. They know close to nothing about the Palo Alto Networks Network Security Professional exam model and how to attempt the requests. Palo Alto Networks NetSec-Pro Dumps give an unequivocal thought of the last preliminary of the year model and how a promising rookie ought to attempt the solicitation paper to score well.
