

Positive DevOps-Foundation Feedback, Certification DevOps-Foundation Exam Cost

P.S. Free & New DevOps-Foundation dumps are available on Google Drive shared by PracticeVCE:
<https://drive.google.com/open?id=1y1alhufabOnJ5laY1kA-WfKp5YPOIEjk>

Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our DevOps-Foundation study materials and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our DevOps-Foundation Study Materials, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our DevOps-Foundation study materials you will feel that our DevOps-Foundation study materials' name matches with the reality.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 2	<ul style="list-style-type: none"> Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 3	<ul style="list-style-type: none"> Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.

Topic 4	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 5	<ul style="list-style-type: none"> • Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

Certification DevOps-Foundation Exam Cost - DevOps-Foundation Official Study Guide

It is known to us that the error correction is very important for these people who are preparing for the DevOps-Foundation exam in the review stage. If you want to correct your mistakes when you are preparing for the DevOps-Foundation exam, the study materials from our company will be the best choice for you. Because our DevOps-Foundation reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the DevOps-Foundation exam prep from our company, you will pass your exam in a relaxed state.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following is NOT a dimension of transformational leadership?

- A. Vision
- B. Personal recognition
- C. Intellectual stimulation
- **D. Coercive communication**

Answer: D

Explanation:

Coercive communication(using force or threat) isnota transformational leadership dimension.

Transformational leaders:

- * Inspire vision
- * Recognize contributions
- * Stimulate new ideas (intellectual stimulation)
- * Foster intrinsic motivation

Extract-style reference:

"Transformational leadership builds trust, motivates by vision, provides intellectual stimulation, and recognizes individuals-not by coercion, but by inspiration."

-Transformational Leadership(James Burns), PeopleCert DevOps Foundation v3.6

NEW QUESTION # 13

An organization is using ChatOps to improve communication and collaboration.

How can this organization transfer incident-related data from its chat client to its IT service management tool?

- A. None of the above
- B. Manually cut and paste the data
- **C. Use an Application Programming Interface (API)**
- D. It doesn't need to as ChatOps is only used for minor incidents

Answer: C

Explanation:

ChatOps is the integration of chat platforms with tools and workflows, allowing teams to manage operations and incidents directly through chat.

* Using an API (Application Programming Interface) is the correct, scalable way to transfer incident-related data automatically from chat clients to ITSM (IT Service Management) tools, preserving traceability and reducing manual errors.

Why not manual cut/paste?

Manual processes are error-prone and slow; DevOps aims for automation and integration.

Extract-style reference:

"APIs enable seamless transfer of information between ChatOps platforms and ITSM tools, supporting automation, accuracy, and auditability in incident management."

-DevOps Handbook; ChatOps: Managing Operations and Collaboration in the Cloud, Jason Hand PeopleCert DevOps Foundation v3.6: Promotes APIs for integration, automation, and collaboration.

NEW QUESTION # 14

An organization is architecting a DevOps toolchain that includes products from both open source and proprietary software providers.

Which of the following is necessary for applications within the toolchain to connect efficiently and effectively?

- A. Open source applications
- B. Containers
- C. Microservices
- **D. Application Programming Interfaces**

Answer: D

Explanation:

A DevOps toolchain is an integrated set of tools that supports the entire software delivery lifecycle—planning, coding, building, testing, releasing, deploying, operating, and monitoring. Regardless of whether tools are open source or proprietary, their ability to work together depends on Application Programming Interfaces (APIs).

APIs define how different software components communicate and exchange data. In a DevOps context, APIs enable:

- * Automation by allowing tools to trigger actions in other tools
- * Data flow between systems (e.g., CI pipelines updating ticketing systems)
- * Integration across heterogeneous environments

A (open source applications) is about licensing, not integration. B (containers) package and run applications consistently but do not inherently integrate tools. D (microservices) is an architectural style for applications, not the integration mechanism between delivery tools.

Therefore, C—APIs—are essential for efficient, effective toolchain integration.

NEW QUESTION # 15

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Hiring new people to expand the DevOps program
- **B. Sharing lessons learned**
- C. Rewarding the people who participated in the pilot
- D. Introducing more advanced tools and techniques

Answer: B

Explanation:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A (rewards) can motivate but doesn't spread the learning. B (hiring) may expand resources but doesn't ensure knowledge transfer. D (advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.

NEW QUESTION # 16

Regardless of structure, what should a DevOps team NOT be?

- A. Continuously engaged
- B. Flat
- C. Balanced in terms of people and automation skills
- **D. Isolated**

Answer: D

Explanation:

A core goal of DevOps is to eliminate isolation between roles, teams, and departments. Isolated teams - cut off from other parts of the value stream - create bottlenecks, reduce visibility, and slow feedback.

While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits, B is the opposite of DevOps principles.

Therefore, B is the correct "NOT" choice.

NEW QUESTION # 17

.....

Just as I have just mentioned, almost all of our customers have passed the exam as well as getting the related certification easily with the help of our DevOps-Foundation exam torrent, we strongly believe that it is impossible for you to be the exception. So choosing our PeopleCert DevOps Foundation v3.6 Exam exam question actually means that you will have more opportunities to get promotion in the near future, at the same time, needless to say that you will get a raise in pay accompanied with the promotion. What's more, when you have shown your talent with PeopleCert DevOps Foundation v3.6 Exam certification in relating field, naturally, you will have the chance to enlarge your friends circle with a lot of distinguished persons who may influence you career life profoundly. So why are you still hesitating for purchasing our DevOps-Foundation Guide Torrent? Your bright future is starting from here!
