Updated CRT-450 Testkings | New CRT-450 Test Preparation

What's more, part of that iPassleader CRT-450 dumps now are free: https://drive.google.com/open?id=1HMmv9A5RskTCsJ-i08r5t_DQcgFNBmY9

Get the latest CRT-450 actual exam questions for CRT-450 Exam. You can practice the questions on practice software in simulated real CRT-450 exam scenario or you can use simple PDF format to go through all the real CRT-450 exam questions. Our products are better than all the cheap CRT-450 Exam braindumps you can find elsewhere, try free demo. You can pass your actual CRT-450 Exam in first attempt. Our CRT-450 exam material is good to pass the exam within a week. iPassleader is considered as the top preparation material seller for CRT-450 exam dumps, and inevitable to carry you the finest knowledge on CRT-450 exam certification syllabus contents.

The go-to resource for effective and efficient Salesforce exam preparation is iPassleader Salesforce CRT-450 practice material in

three formats. Our updated Salesforce questions are available in these three different formats: web-based practice test, desktop practice exam software, and Salesforce PDF file of real exam questions. The goal of these formats is to aid test candidates in preparing for the Salesforce CRT-450 test according their styles.

New CRT-450 Test Preparation - CRT-450 Certification Dumps

We try our best to present you the most useful and efficient CRT-450 training materials about the test and provide multiple functions and intuitive methods to help the clients learn efficiently. Learning our CRT-450 useful test guide costs you little time and energy. The passing rate and hit rate are both high thus you will encounter few obstacles to pass the test. You can further understand our CRT-450 study practice guide after you read the introduction on our web.

The CRT-450 Exam is a comprehensive assessment of a candidate's skills and expertise in developing custom applications on the Salesforce platform. CRT-450 exam consists of 60 multiple-choice questions that must be answered in 105 minutes. Candidates must achieve a passing score of 65% or higher to receive certification.

Salesforce Certified Platform Developer I Sample Questions (Q88-Q93):

NEW QUESTION # 88
A Next Best Action strategy uses an Enhance element that invokes an Apex method to determine a discount level for a Contact, based on a number of factors.
What is the correct definition of the Apex method?

- A.

```
@InvocableMethod
global Recommendation getLevel(ContactWrapper input)
{ /*implementation*/}
```

- B.

```
@InvocableMethod
global List<List<Recommendation>> getLevel(List<ContactWrapper> input)
{ /*implementation*/ }
```

- C.

```
@InvocableMethod
global static ListRecommendation getLevel(List<ContactWrapper> input)
{ /*implementation*/ }
```

- D.

```
@InvocableMethod
global static List<List<Recommendation>> getLevel(List<ContactWrapper> input)
```

Answer: C

NEW QUESTION # 89
A developer must modify the following code snippet to prevent the number of SOQL queries issued from exceeding the platform governor limit. public class without sharing OpportunityService(public static List<OpportunityLineItem> getOpportunityProducts(Set<Id> opportunityIds){ List<OpportunitylineItem> oppLineItems = new List<OpportunityLineItem>(); for(Id thisOppId :
opportunityIds){ oppLineItems.addAll([Select Id FROM OpportunityLineItems WHERE OpportunityId = :thisOppId]); } return oppLineItems; } } The above method might be called during a trigger execution via a Lightning component. Which technique should be implemented to avoid reaching the governor limit?

- A. Use the System.Limits.getlimitQueries() method to ensure the number of queries is less than 100.
- B. Use the System.Limits.getQueries() method to ensure the number of queries is less than 100.
- C. Refactor the code above to perform only one SOQL query, filtering by the Set of opportunityIds.
- D. Refector the code above to perform the SOQL query only if the Set of opportunityIds contains less 100 Ids.

Answer: B

NEW QUESTION # 90

Cloud Kicks has a multi-screen flow that its call center agents use when handling inbound service desk calls.

At one of the steps in the flow, the agents should be presented with a list order numbers and dates that are retrieved from an external order management system in real time and displayed on the screen.

What should a developer use to satisfy this requirement?

- A. An Apex controller
- B. An invocable method
- C. An Apex REST class
- D. An outbound message

Answer: B

Explanation:

To retrieve data from an external system in real time during a flow, the developer should use an invocable method.

Option B: An invocable method

public with sharing class OrderService {

@InvocableMethod(callout=true)

public static List<OrderInfo> getOrderData(List<String> inputs) {

// Callout to external system and return data

}

}

Reference:

"To invoke Apex methods that perform callouts from a flow, use the @InvocableMethod annotation with callout=true."

- Salesforce Developer Guide: Invocable Methods

Why Other Options Are Incorrect:

Option A: An Apex controller is typically used with Visualforce pages or Aura components, not directly with Flows.

Option C: An outbound message sends data to external systems but does not retrieve data.

Option D: An Apex REST class exposes endpoints for external systems to call into Salesforce, not for Salesforce to call out.

NEW QUESTION # 91

A developer working on a time management application wants to make total hours for each timecard available to applications users. A timecard entry has a Master-Detail relationship to a timecard. Which approach should the developer use to accomplish this declaratively?

- A. A Roll-up Summary field on the Timecard Object that calculates the total hours from timecard entries for that timecard.
- B. An Apex trigger that uses an Aggregate Query to calculate the hours for a given timecard and stores it in a custom field.
- C. A Process Builder process that updates a field on the timecard entry is created.
- D. A visualforce page that calculates the total number of hours for a timecard and displays it on the page.

Answer: A

NEW QUESTION # 92

What are two benefits of using External IDs?
Choose 2 answers

- A. An External ID is indexed and can improve the performance of SOQl quenes.
- B. An External ID can be a formula field to help create a unique key from two fields in Salesforce.
- C. An External ID can be used with Salesforce Mobile to make external data visible.
- D. An External ID field can be used Co reference an ID from another external system.

Answer: A,D

Explanation:

External IDs are useful for data integration and synchronization between Salesforce and other external platforms. By mapping records based on the External ID, you can easily import, update, or upsert data from external sources without relying on the

Salesforce record ID. External IDs are also indexed, which means they can speed up the SOQL queries that use them as filters or join conditions.
