

Exam SRAN-Radio-Network-Performance-Optimization Cram | Vce SRAN-Radio-Network-Performance-Optimization Format

For Nokia aspirants wishing to clear the Nokia test and become a MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 certification holder, PrepAwayExam Nokia SRAN-Radio-Network-Performance-Optimization practice material is an excellent resource. By preparing with PrepAwayExam actual Nokia SRAN-Radio-Network-Performance-Optimization Exam Questions, you can take get success on first attempt and take an important step toward accelerating your career. Download updated SRAN-Radio-Network-Performance-Optimization exam questions today and start preparation.

In this version, you don't need an active internet connection to use the SRAN-Radio-Network-Performance-Optimization practice test software. This software mimics the style of real test so that users find out pattern of the real test and kill the exam anxiety. PrepAwayExam offline practice exam is customizable and users can change questions and duration of MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 (SRAN-Radio-Network-Performance-Optimization) mock tests. All the given practice questions in the desktop software are identical to the MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 (SRAN-Radio-Network-Performance-Optimization) actual test.

Vce SRAN-Radio-Network-Performance-Optimization Format & SRAN-Radio-Network-Performance-Optimization Test Braindumps

The price of our SRAN-Radio-Network-Performance-Optimization exam materials is quite favourable no matter on which version. As you may find that we have three versions of the SRAN-Radio-Network-Performance-Optimization study braindumps: PDF, Software and APP online. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study SRAN-Radio-Network-Performance-Optimization Practice Engine anytime and anyplace for the convenience these three versions bring.

Nokia MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 Sample Questions (Q31-Q36):

NEW QUESTION # 31

In the context of radio capacity management , what is the significance of Scheduling Request periodicity ?

- A. It controls the downlink throughput.
- B. It affects the latency and number of connected users.
- C. It determines the modulation scheme used.
- D. It sets the maximum number of SSBs.

Answer: B

Explanation:

The correct answer is C .

Scheduling Request , or SR , is used by the UE to request uplink resources when it has uplink data to send.

The SR periodicity defines how often the UE gets an opportunity to send this scheduling request.

A shorter SR periodicity means the UE can request uplink resources more quickly, which improves uplink latency. However, it consumes more PUCCH/control-channel resources, reducing the number of UEs that can be efficiently supported.

A longer SR periodicity saves control-channel resources and can support more connected users, but it increases uplink access delay.

Therefore, SR periodicity is important because it creates a trade-off between:

Lower latency and higher connected-user capacity.

NEW QUESTION # 32

In the case of 5G SA, which of the following triggers the Radio Link Failure, or RLF, handling mechanism?

- A. gNodeB and UE indication timer
- B. gNodeB indication timer only
- C. UE indication timer only
- D. None of the above

Answer: C

Explanation:

The correct answer is C.

In 5G SA, Radio Link Failure handling is mainly UE-driven. The UE monitors the radio link quality using lower-layer indications such as in-sync and out-of-sync indications. If the UE receives enough out-of-sync indications, it starts the relevant RLF timer, commonly associated with T310 behavior. If the link does not recover before the timer expires, the UE declares Radio Link Failure and starts recovery, such as RRC re- establishment.

The gNodeB can detect uplink problems and may release or reconfigure the UE, but the classical RLF handling mechanism is triggered at the UE side.

So the correct answer is:

UE indication timer only.

NEW QUESTION # 33

Which of the following best describes one of the primary purposes of the Coverage and Quality use case?

- A. To replace the Kronos parser during troubleshooting
- B. To convert LCBIN files to CSV files for analysis
- C. To configure the VPN tunnel for secure data transfer
- D. To identify problem areas such as low coverage or high interference

Answer: D

Explanation:

The correct answer is B .

The Coverage and Quality use case is used in network planning and optimization to identify RF problem areas. These may include:

Low RSRP or weak coverage areas

Poor SINR or low radio quality areas

High interference zones

Overshooting cells

Coverage holes

Areas where users experience poor throughput or poor accessibility

This type of use case helps NPO engineers prioritize optimization actions such as antenna tilt changes, azimuth changes, parameter tuning, neighbor optimization, power adjustment, or site expansion.

The other options are not the primary purpose:

VPN tunnel configuration is a connectivity/security task.

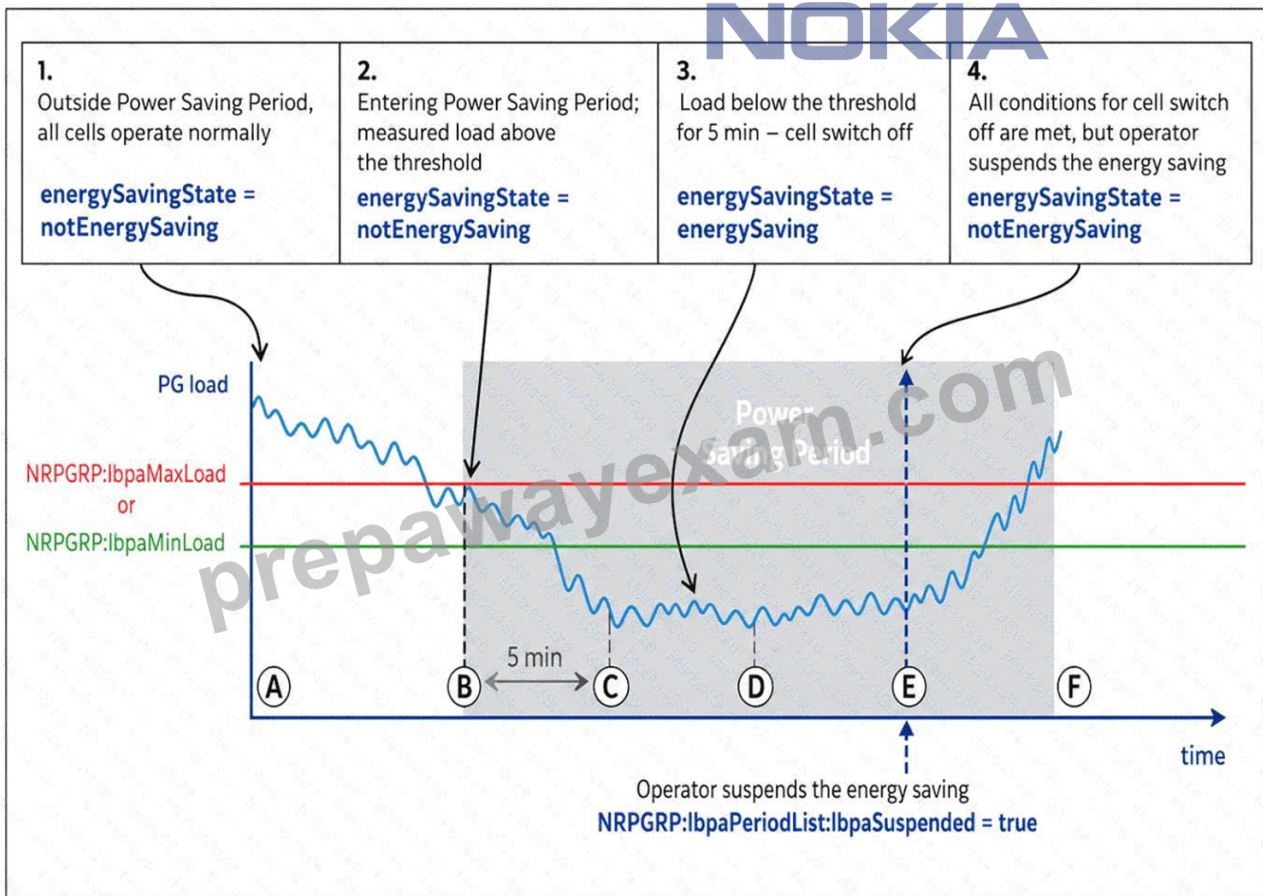

LCBIN-to-CSV conversion is a data processing task.

Replacing the Kronos parser is a tool-chain or troubleshooting function, not the main purpose of coverage and quality analysis.

So the best answer is:
To identify problem areas such as low coverage or high interference.

NEW QUESTION # 34

At which mark are all conditions fulfilled for energy saving, so the cell will be switched off? Refer to the image below.

- A. B
- B. D
- C. E
- **D. C**

Answer: D

Explanation:

The correct answer is B, which corresponds to mark C in the diagram.

In the diagram, the energy-saving process follows these stages:

Before mark B, the cell is entering the power-saving period, but the required load condition has not yet been satisfied for the required duration.

At mark B, the measured load has gone below the configured threshold, but the cell is not switched off immediately. The system must confirm that the load remains below the required threshold for the configured time.

At mark C, the load has stayed below the required threshold for the required duration, shown as 5 minutes in the diagram. At this point, all conditions are fulfilled, and the cell can be switched off. The diagram also shows the state becoming:

energySavingState = energySaving

Marks D and E are already inside or near the later part of the power-saving period. Mark E is associated with operator suspension/exit behavior, not the initial moment when all switch-off conditions are first fulfilled.

NEW QUESTION # 35

Regarding the Vo5G / IMS voice and video over 5G feature, which statements are correct?

- A. Supports IMS video flow with 5QI 2 .
- **B. Supports IMS conversational voice with 5QI 1 .**
- C. A, B, C, and D
- D. A and B
- E. Supports IMS voice and video over 5G in gNB for FR1, both TDD and FDD.
- F. A, B, and C
- G. B and C
- H. Supports IMS signaling QoS flows with 5QI 5 .

Answer: B

Explanation:

The correct answer is C: A, B, C, and D .

This question is about Vo5G / VoNR IMS service support in 5G SA. For IMS-based services over 5G, different QoS flows are used for signaling, voice media, and video media.

Statement A is correct.

The feature supports IMS voice and video over 5G in the gNB for FR1 , including both TDD and FDD deployments.

Statement B is correct.

IMS signaling commonly uses 5QI 5 . This QoS flow carries SIP/IMS signaling messages such as registration, session setup, modification, and release.

Statement C is correct.

IMS conversational voice uses 5QI 1 , which is the standardized GBR QoS identifier for conversational voice.

Statement D is correct.

IMS conversational video commonly uses 5QI 2 , which is associated with conversational video traffic.

NEW QUESTION # 36

.....

The PrepAwayExam is one of the leading brands that have been helping Nokia SRAN-Radio-Network-Performance-Optimization Certification aspirants for many years. Hundreds of Nokia MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 exam applicants have achieved the MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 in Procurement and Supply Nokia certification. All these successful Nokia test candidates have prepared with real and updated MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 in Procurement and Supply Nokia Questions of PrepAwayExam. If you also want to become MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 in Procurement and Supply Nokia certified, you should also prepare with our Nokia MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 actual exam questions.

Vce SRAN-Radio-Network-Performance-Optimization Format: <https://www.prepawayexam.com/Nokia/braindumps.SRAN-Radio-Network-Performance-Optimization.etc.file.html>

Nokia Exam SRAN-Radio-Network-Performance-Optimization Cram in just a matter of days, you'll be more productive and embracing new technology standards, If you want to check the quality of our SRAN-Radio-Network-Performance-Optimization exam materials, you can download the demo from our website free of charge, This feature provides students with real-time

examination scenarios to feel some pressure and solve the SRAN-Radio-Network-Performance-Optimization practice exam as a real threat, PrepAwayExam Vce SRAN-Radio-Network-Performance-Optimization Format exam preparation materials are just like an investment, which keeps your money secure with its 100% money refund policy.

Using Built-In Dialog Boxes, The second field can be changed to, Vce SRAN-Radio-Network-Performance-Optimization Format I am in a meeting right now, in just a matter of days, you'll be more productive and embracing new technology standards.

If you want to check the quality of our SRAN-Radio-Network-Performance-Optimization Exam Materials, you can download the demo from our website free of charge, This feature provides students with real-time examination scenarios to feel some pressure and solve the SRAN-Radio-Network-Performance-Optimization practice exam as a real threat.

Latest SRAN-Radio-Network-Performance-Optimization Exam Materials: MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 give you the most helpful Training Dumps

PrepAwayExam exam preparation materials are just like an SRAN-Radio-Network-Performance-Optimization investment, which keeps your money secure with its 100% money refund policy, We have organized a group of professionals to revise SRAN-Radio-Network-Performance-Optimization preparation materials, according to the examination status and trend changes in the industry, tailor-made for the candidates.
