問題 #107

Which of the following best describes the need for the ADM process to be governed?

- A. To verify that the method is being applied correctly
- B. To enable a fast response to market changes
- C. To enable development of reference architectures
- D. To permit the architecture domains to be integrated

答案: A

解題說明:

According to the TOGAF standard, the need for the ADM process to be governed is to ensure that the architecture development and implementation activities are conducted in a consistent, coherent, and compliant manner¹. Governance provides the means to verify that the method is being applied correctly and effectively, and that the architecture deliverables and artifacts meet the quality and standards criteria¹. Governance also enables the management of risks, issues, changes, and dependencies that may arise during the ADM process¹.

Some of the benefits of governing the ADM process are²:

*Improved alignment of the architecture with the business strategy and objectives

*Enhanced stakeholder engagement and communication

*Increased reuse and integration of architecture assets and resources

*Reduced complexity and duplication of architecture efforts

*Increased agility and adaptability of the architecture to changing needs and requirements

*Improved compliance and auditability of the architecture outcomes and outputs

問題 #108

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

1 Architecture Principles - 2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification

1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles

1 Architecture Requirements Specification - 2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts

1 Architecture Principles - 2 Architecture Contracts - 3 Architecture Requirements Specification - 4 Request for Architecture Work

Explanation:

答案：

解題說明：

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission¹. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions¹.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture². They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards².

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle³. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project³.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture⁴. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them⁴.

問題 #109

Which of the following best describes the class of information known as the Reference Library within the Architecture Repository?

- **A. Guidelines and templates used to create new architectures**
- B. Processes to support governance of the Architecture Repository
- C. Specifications to which architectures must conform
- D. A record of the governance activity across the enterprise

答案： A

解題說明：

The class of information known as the Reference Library within the Architecture Repository contains guidelines and templates used to create new architectures. The Reference Library provides a set of resources that can be leveraged or customized for specific architecture development purposes. It includes generic building blocks, patterns, models, standards, frameworks, methods, techniques, best practices, etc. Reference: The TOGAF Standard | The Open Group Website, Section 2.4 Architecture Repository.

問題 #110

Consider the following ADM phase objectives:

* Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

* Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

* Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

* Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders Which two are objectives of ADM Phase F?

- A. 2 & 3
- **B. 3 & 4**
- C. 1 & 2

- D. 1 & 3

答案： B

解題說明：

Phase F: Migration Planning - Objectives/Outputs include:

"The outputs for this phase: ... Finalized Architecture Roadmap ... Implementation and Migration Plan ... projects assigned business value and risk."

"To prioritize all work packages... by assigning business value to each and conducting a cost/business analysis." Open Group Publications Reference: The Open Group, TOGAF 9 Conformance Requirements-Phase F learning objectives, outputs.

問題 #111

Which of the following is included as part of Architecture Governance?

- A. Managing Stakeholders and their requirements
- B. Interacting with the CxO level on Enterprise Architecture
- C. Creating and maintaining the Statement of Architecture Work through out the ADM cycle
- D. Ensuring compliance with internal and external standards and regulatory obligations

答案： D

解題說明：

Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements.
