**Study Guide AZ-800 Pdf | New AZ-800 Real Exam**

Microsoft AZ-800 certification exam is among those popular IT certifications. It is also the dream of ambitious IT professionals. This part of the candidates need to be fully prepared to allow them to get the highest score in the AZ-800 Exam, make their own configuration files compatible with market demand.

The AZ-800 Exam measures the skills and knowledge required to administer and manage Windows Server hybrid core infrastructure. This includes managing virtual machines, storage, networking, and security in a hybrid environment that includes both on-premises and cloud-based resources.

The AZ-800 certification exam is an important credential for IT professionals who are looking to advance their careers in cloud computing and hybrid infrastructure management. Administering Windows Server Hybrid Core Infrastructure certification demonstrates an individual's proficiency in managing complex hybrid environments and highlights their ability to design, implement, and manage solutions that incorporate both on-premises and cloud-based technologies.

## Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q105-Q110):

### NEW QUESTION # 105

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

### NEW QUESTION # 106

Task 5

You have an application that is copied to a folder named C:\app on SRV1. C:\app also contains also a Dockerfile for the app. On SRV1, you need to create a container image for the application by using the Dockerfile. The container image must be named app1.

**Answer:**

Explanation:

See the solution of this Task below.

Explanation:

☐

Explore

To create a container image named app1 for your application using the Dockerfile in the C:\app directory on SRV1, follow these steps:

Step 1: Open PowerShell or Command Prompt First, open PowerShell or Command Prompt on SRV1.

Step 2: Navigate to the Application Directory Change to the directory where your application and Dockerfile are located:

```
cd C:\app
```

Step 3: Build the Container Image Use the docker build command to create the container image. The -t flag tags the image with the name app1:

```
docker build -t app1 .
```

The period . at the end of the command tells Docker to use the Dockerfile in the current directory.

Step 4: Verify the Image Creation After the build process completes, verify that the image app1 has been created successfully by listing all images:

```
docker images
```

You should see app1 in the list of images.

Step 5: Use the Image Now, you can use the image app1 to run containers or push it to a container registry if needed.

By following these steps, you'll have created a Docker container image named app1 using the Dockerfile located in C:\app on SRV1. Ensure that Docker is installed on SRV1 and that you have the necessary permissions to execute these commands.

### NEW QUESTION # 107

Case Study 3 - ADatum Corporation

Overview

Company Information

ADatum Corporation is a manufacturing company that has a main office in Seattle and two branch offices in Los Angeles and

Montreal.

Fabrikam Partnership

ADatum recently partnered with 2 company named Fabrikam, Inc.

Fabrikam is a manufacturing company that has a main office in Boston and a branch office in Orlando.

Both companies intend to collaborate on several joint projects.

Existing Environment

ADatum AD DS Environment

The on-premises network of ADatum contains an Active Directory Domain Services (AD DS) forest named adatum.com.

The forest contains two domains named adatum.com and east.adatum.com and the domain controllers shown in the following table.

Fabrikam AD DS Environment

The on-premises network of Fabrikam contains an AD DS forest named fabrikam.com.

The forest contains two domains named fabrikam.com and south.fabrikam.com.

The fabrikam.com domain contains an organizational unit (OU) named Marketing.

Server Infrastructure

The adatum.com domain contains the servers shown in the following table.

HyperV1 contains the virtual machines shown in the following table.

All the virtual machines on HyperV1 have only the default management tools installed.

SSPace1 contains the Storage Spaces virtual disks shown in the following table.

Azure Resources

ADatum has an Azure subscription that contains an Azure AD tenant. Azure AD Connect is configured to sync the adatum.com forest with Azure AD.

The subscription contains the virtual networks shown in the following table.

The subscription contains the Azure Private DNS zones shown in the following table.

The subscription contains the virtual machines shown in the following table.

All the servers are in a workgroup.

The subscription contains a storage account named storage1 that has a file share named share1.

Requirements

Planned Changes

ADatum plans to implement the following changes:

- Sync Data1 to share1.
- Configure an Azure runbook named Task1.
- Enable Azure AD users to sign in to Server1.
- Create an Azure DNS Private Resolver that has the following configurations:
  - Name: Private1
  - Region: West US
  - Virtual network: VNet1
  - Inbound endpoint: SubnetB
- Enable users in the adatum.com domain to access the resources in the south.fabrikam.com domain.

Technical Requirements

ADatum identifies the following technical requirements:

- The data on SSPace1 must be available always.
- DC2 must become the schema master if DC1 fails.
- VM3 must be configured to enable per-folder quotas.
- Trusts must allow access to only the required resources.
- The users in the Marketing OU must have access to storage1.
- Azure Automanage must be used on all supported Azure virtual machines.
- A direct SSH session must be used to manage all the supported virtual machines on HyperV1.

Hotspot Question

You need to ensure that data availability on SSPace1 meets the technical requirements. What is the maximum number of physical disks that can fail on each disk? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

## NEW QUESTION # 108

You have a Group Policy Object (GPO) named GPO1 that contains user settings only.
