ABPMP International Certified Business Process Associate (CBPA) Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122

In most cases, how is an indicator of process performance quality expressed?

- A. As a percentage between the actual and the maximum possible process quality
- B. As a cost that expresses the value lost due to the loss of customers
- C. By the roles of ISO certification
- D. As a score between 1 and 6 (1 = very good and 6 = insufficient)

Answer: A

Explanation:

Quality indicators are typically expressed as percentages representing the level of conformance, accuracy, or completeness. This enables straightforward comparisons and trend tracking over time.

Examples:

- * % of error-free transactions
- * % of on-time deliveries
- * % of completed tasks without rework

"Quality indicators are often expressed as percentages or ratios comparing actual performance to the ideal or standard threshold."

- ABPMP CBOK, Chapter 6 - Process Performance Management

This approach provides:

- * Clarity for non-technical audiences
- * Standardization across processes
- * Actionable performance insights

NEW QUESTION # 124

What does a business process define?

- **A. The sequence of activities to achieve an intended result**
- B. The company's strategy
- C. End-to-end interaction points with all stakeholders
- D. The internal activities to produce a product or service

Answer: A

Explanation:

A business process is defined as a structured set of activities designed to produce a specific output or result for a customer or market. It involves inputs, tasks, decision points, and outputs.

"A business process is a set of logically related tasks performed to achieve a defined business outcome. It involves a defined start and end point, inputs, steps, and outputs."

- ABPMP CBOK, Chapter 1 - BPM Overview

While business processes may include stakeholder interactions (Option C) and internal activities (Option D), the most accurate and complete definition is this sequence of activities aimed at a result.
